JNANESH K

SOFTWARE TEST ENGINEER

Bengaluru ♦ +91-9739175575 ♦ jnaneshkuppinakere567@gmail.com

PROFESSIONAL SUMMARY

Software Test Engineer with 3 years of experience in **Manual and Automation Testing** of web applications across **E-Commerce**, **AI-driven**, and **Media & Entertainment** domains. Proficient in **Java**, **Selenium**, **JIRA** and **Git** with strong expertise in **test case design**, **defect tracking**, **integration**, and **Agile methodologies**. Demonstrated success in enhancing software quality, accelerating release cycles, and fostering effective cross-functional collaboration

SKILLS

- **Testing Tools**: JIRA, Selenium WebDriver
- **Testing Methodologies**: SDLC, STLC, Agile, Black Box Testing
- **Operating Systems**: Windows
- **Programming**: Java
- **Version Control**: Git
- **Database**: MongoDB

WORK HISTORY

Software Engineer Tester II April 2024 - Current
NEURALGARAGE PRIVATE LIMITED – Bengaluru, India

- Executed manual and automated test cases, achieving 98% defect detection pre-release.
- Built Selenium automation scripts in Java, cutting regression cycles by 30%.
- Conducted smoke, regression, integration, and system testing using JIRA, Jenkins, Git.
- Collaborated with developers and product managers, reducing post-release bugs by 20%.
- Maintained test plans, documentation, and traceability matrices ensuring complete coverage.

Software Test Engineer Oct 2022 – Feb 2024
LAKSHYA SPACE – Bengaluru, India

- Designed and executed comprehensive test cases for website modules including Home, About, Projects, and Services.
- Performed UI, functional, and cross-browser testing to ensure a seamless user experience across devices.
- Developed and maintained Selenium WebDriver scripts for regression and smoke testing.
- Logged and tracked defects using JIRA, collaborating with developers to ensure timely resolution.

PROJECT

MEDIA & ENTERTAINMENT DOMAIN
Worked on Visual Dub, an advanced media application that enables clients to dub English-language videos into multiple target languages with automated lip synchronization. The system processes dubbed voice overs and adjusts the video output to match lip movements with up to 80% accuracy, significantly reducing manual editing time and improving content localization efficiency for global audiences.

EDUCATION

Bachelor of Engineering from **PES Institute of Technology & Management | Aug 2015 – Jun 2019**
