Profile

Experienced and results-driven Flutter Developer with approx 6 years of expertise in building robust, high-performance mobile applications for iOS and Android. Proficient in Dart and the Flutter framework, with a strong emphasis on clean architecture, SOLID principles, and responsive UI design. Skilled in implementing unit testing to ensure code quality and reliability. Adept at transforming complex requirements into intuitive, visually appealing, and user-centric applications using modern development best practices.

Professional Experience

09/2022 – present
Noida, India

Chetu Inc
Senior Software Engineer

- Developed and maintained cross-platform iOS and Android applications for multiple domains.
- Worked on the **Banktech** project for several months, focusing on integrating and managing **payment gateways** with support for credit and debit card transactions.
- Implemented push notification functionality, leading to a **30% increase in user engagement time** and a **15% rise in app usage frequency**.
- Designed and built visually appealing and intuitive user interfaces, achieving a **4.5/5 satisfaction rating** from the client's design review team.
- Collaborated closely with client teams to integrate RESTful APIs, achieving a **99.9% success rate** in API call reliability and responsiveness.
- Utilized **Bloc state management with Bloc Test** to ensure a clean, testable, and maintainable architecture across the app lifecycle.
- Strengthened app security using **Secure Shared Preferences, encryption protocols, jailbreak/root detection**, and **on-device biometric authentication** (Face Unlock and Fingerprint Recognition), ensuring **100% protection of user data** and significantly reducing vulnerability to data breaches.
- Integrated **Google Maps APIs** to deliver real-time information on nearby hospitals and clinics.

12/2019 – 08/2022
Indore, India

EPS Infotech
Software Developer

- Developed and deployed cross-platform **iOS and Android applications** for **4 clients**, delivering robust, scalable, and responsive solutions tailored to each client's needs.
- Integrated **Syncfusion DataGrid** in a mobile application to effectively display **large datasets in a horizontal scroll format**, optimizing usability and performance on mobile screens.
- Implemented **video recording and upload functionality** using **Dart isolates** to offload intensive tasks to background threads, ensuring a smooth and responsive user experience while uploading to AWS servers.
- Developed the **Miconic mobile application** using the **BLoC pattern** with the flutter_bloc library, incorporating **StreamBuilder** and **FutureBuilder** to manage asynchronous data streams and enhance app responsiveness.
- Designed and implemented the **Bosch Android application UI** using native Android layouts, including **ConstraintLayout, LinearLayout,** and **RelativeLayout**, ensuring adaptive and visually consistent user interfaces across different devices

Education

08/2015 — **B.E. (computer science)**
Ujjain, India — *Rajiv gandhi proudyogiki vishwavidyalaya*

Skills

Solid principles / TDD

Unit testing

Firebase

RESTful APIs

Version control
Git, SVN

Payment gateway
Stripe, Paypal

Architecture
Clean, MVC, MVVM

State Management
Bloc, Provider, GetX

Languages
Dart, Java, Kotlin, Swift

Tools & Frameworks

- **Flutter SDK**
- **Firebase Suite** (Firestore, Auth, Crashlytics, Cloud Messaging)
- **Android Studio / XCode/ VS Code**
- **Postman**
- **Syncfusion Widgets**
- **Google Maps API**
- **AWS (S3 – for media uploads)**
- **Dart DevTools / Flutter Inspector**
- **Jira**
