Summary

- Having overall 11+ Years of experience in IT and 5.6 years of experience as ETL developer using Informatica Power center 10.5.4/10.2/9.6/9.0 and IICS.
- Experience in debugging and performance tuning of sources, targets, mappings and sessions.
- Extensively worked on Informatica Designer components – Source Analyzer, Warehousing Designer, Transformations Developer, Mapplet and Mapping Designer.
- Strong experience on Informatica Workflow Manager Tools – Task developer, Workflow Manager & Worklet Designer.
- Working experience in using SQL, PL/SQL, and HTML 4.0 Windows XP/2000/98 & Unix.
- Strong Team working spirit, communication and relationship management skills
- Experience on Implementation and Integration projects.
- Having experience in documentation like LLD and Test cases.
- Developed transformation logic and designed various Complex Mappings and Mapplets using
- Experience in Control-M Scheduling Tool and Crontab.
- Having proficient knowledge on IICS

Technical Skills

ETL Tools	: Informatica power center 10.2/9.0/8.6/8.1, IICS
RDBMS	: Oracle 10g /12C
Supporting Tools	: TOAD, SQL developer
Languages	: SQL, PL/SQL
Operating Systems	: MS Windows XP/2000/98

Work Experience

- Working for Bread Financial, Bangalore from May 2024 – Present
- Worked for Luxoft, Bangalore from Oct 2023 – Feb 2024
- Worked for UST Global, Bangalore from March 2022 – May 2023
- Worked for Allstate, Bangalore from April 2021 to Feb 2022
- Worked for V2 SOFT PVT LTD Feb 2019 – March 2020
- Worked for NESS DIGITAL ENGENIEERING PRIVATE LIMITED Nov 2017 – Sep 2018
- Worked for A G EMPLOYVISION Private Limited March 2015 – Oct 2017
- Worked for HELIOS and MATHESON Information Technology Limited April 2013 – March 2015

Education

- MCA from Sri Venkateswara University, Tirupati, 2010.
- BSC from Sri Venkateswara University, Tirupati, 2007.

Project Profile

PROJECT#1

Title	: Data Marts
Client	: Bread Financial
Technologies	: Informatica PowerCenter, SQL, Unix

Duration : May 2024 to Present
Role : Sr Data Engineer

Description:

Bread Financial Holdings, Inc. is an American publicly-traded provider of loyalty and marketing services, such as private label credit cards, coalition loyalty programs, and direct marketing, derived from the capture and analysis of transaction-rich data.

Roles & Responsibilities

- Leading 6 member team.
- Involving in all technical developments and Enhancements.
- Implemented performance optimization techniques for near real time data processing
- Involved in all kinds of testing from Unit testing to Release testing.
- Running the jobs by using UNIX.
- Developing ETL Pipelines as per Business requirements by using all the transformations.
- Performance tuning and Error handling of ETL Pipelines.
- Deployment of code objects by using Deployment Groups.
- Creation of Build strategies and Test strategies.

PROJECT#3

Title : FAD Migration and Testing
Client : Blue Shield of California
Technologies : Informatica PowerCenter, SQL, Unix, IICS
Duration : Oct 2023 to Feb 2024
Role : Sr Data Engineer

Description:

Blue Shield of California is a mutual benefit corporation and health plan[6][7] founded in 1939 by the California Medical Association. It is based in Oakland, California, and serves 4.5 million health plan members and more than 65,000 physicians across the state. Blue Shield of California was founded as a not-for-profit organization. As of 2014, it is no longer tax-exempt in California and has been paying federal taxes for several years before that.

Roles & Responsibilities

- Handling a 5 member team.
- Implemented performance optimization techniques for near real time data processing
- Involved in all kinds of testing from Unit testing to Release testing..
- Running the jobs by using UNIX and Denodo.
- Setting up the jobs which needs to be scheduled on daily/weekly basis.
- Developing ETL Pipelines as per Business requirements by using all the transformations.
- Performance tuning and Error handling of ETL Pipelines.
- Deployment of code objects by using GIT and Jenkins.
- Creation of Build strategies and Test strategies.

PROJECT#3

Title : Caremore SSIS Migration
Client : Anthem Healthcare
Technologies : IICS, SQL Server, SSIS, Unix
Duration : March 2022 to May 2022
Role : Sr Informatica Developer

Roles & Responsibilities

- Developing ETL Pipelines as per Business requirements.
- Implemented performance optimization techniques for near real time data processing.
- Creating Dataflows using various sources data.
- Setting up the jobs which needs to be scheduled on daily/weekly basis.
- ETL performance optimization as per the need.
- Performance tuning and Error handling of ETL Pipelines.
- Deployment of code objects.
- Creation of Build strategies and Test strategies.

PROJECT#4

Title	: Investments
Client	: Allstate Insurance
Technologies	: Informatica 10.2, IICS, Unix
Duration	: April 2021 to Feb 2022
Role	: Sr Informatica Developer

Roles & Responsibilities

- Developed ETL programs using Informatica to implement the business requirements.
- Communicated with business customers to discuss the issues and requirements.
- Created shell scripts to fine tune the ETL flow of the Informatica workflows.
- Production Support has been done to resolve the ongoing issues and troubleshoot the problems.
- Monitoring jobs through IICS and creating mappings through IICS
- Performance tuning was done at the functional level and map level. Used relational SQL wherever possible to minimize the data transfer over the network.
- Effectively used Informatica parameter files for defining mapping variables, workflow variables, FTP connections and relational connections.
- Involved in enhancements and maintenance activities of the data warehouse including tuning, modifying of stored procedures for code enhancements.
- Used debugger in identifying bugs in existing mappings by analyzing data flow, evaluating transformations.
- Effectively worked on Onsite and Offshore work model.
- Designed workflows with many sessions with decision, assignment task, event wait, and event raise tasks, used informatica scheduler to schedule jobs.
- Reviewed and analyzed functional requirements, mapping documents, problem solving and trouble shooting.
- Performed unit testing at various levels of the ETL and actively involved in team code reviews.
- Identified problems in existing production data and developed one time scripts to correct them.
- Fixed the invalid mappings and troubleshoot the technical problems of the database.

PROJECT#5:

Title	:DB-PBC-BEL-OLBODS
Client	: Deutsche Bank
Technologies	: Informatica 10.2, Unix
Role	: ETL Developer

Description:

Deutsche Bank is a leading global investment bank with a strong and profitable private clients franchise. A leader in Germany and Europe, the Bank is continuously growing in North America, Asia and key emerging markets. With more than 78,000 employees in over 70 countries worldwide, Deutsche Bank offers unparalleled financial services throughout the world. The Bank competes to be the leading global provider of financial solutions for demanding clients creating exceptional value for its shareholders and people. This project is about MIFIR transaction reporting.
MiFIR introduces rules with respect to transparency obligations that require the publication of transparency thresholds applicable to each financial instrument.The reporting instructions specify the provision of data necessary to support the MiFIR transparency regime describing the characteristics of information required for the uploading interface between Trading Venue or NCAs systems and the FIRDS for transparency.

Roles & Responsibilities:

- Understanding Business requirements.
- Creating LLD, Test documents and provide assistance in creating DSRS documents
- Creating Informatica mappings, mapplets and reusable transformations.
- Extracted data from Oracle, Flat files using Informatica PowerCenter6.1
- Developed several reusable transformations and mapplets that were used in other mappings.
- Involved in Unit Testing.
- Responsible for Extracting, Transforming and Loading data from Oracle, Flat files and placing it into Oracle tables.
- Perform debugging and tuning of mapping.
- Preparation of ETL mapping documents.
- Analyzed Mappings and sessions for better Performance.
- Responsible for monitoring all the sessions that are scheduled, running completed and failed Involved in debugging the Mappings that failed and fixing.
- Scheduling the irregular jobs using crontab

PROJECT#6:

Title	:HR-INTERPAY
Client	: GE-Corporate
Technologies	: Informatica 9.6, Unix
Role	: ETL Developer

Description:
Interpay Payroll has been designed and developed to allow payroll process simplification and is user friendly. Interpay Payroll has been implemented at numerous local sites within different business sectors; thus our customers may rest assured that Interpay backed by a fully conversant support team, is compliant with all the necessary Local Regulatory Bodies.

Roles & Responsibilities:

- Understanding Business requirements.
- Created Informatica mappings, sessions, workflows, and mapplets.
- Involved in capturing incremental data.
- Developed and implemented data verification and tested methods for the data warehouse to ensure data accuracy, including error handling and notification.
- Responsible for the performance and tuning of the ETL application.
- Created SQL Queries to check the row counts for source and target tables.

- Extracting, Transforming and Loading data from Oracle and placing it into Data Warehouse.
- Created Informatica mappings to build business rules to load data. Most of the Transformations were used like the Source qualifier, Aggregators, lookups, Filters, Update and Sorter & Sequence Generator.
- Created Informatica mappings, sessions, workflows, and mapplets.
- Creation and Execution of Control-M jobs

PROJECT#7:

Title : EVO-Convergence
Client : VODAFONE_INDIA
Technologies : Informatica 9.0
Role : ETL Developer

Description:
Vodafone Group is one of the world's largest mobile communications companies with over 403 million customers as on December 31, 2012. Vodafone currently has equity interests in over 30 countries across five continents and more than 40 partner networks worldwide. The objective of this project is migration of data into SAP by the on-site/offshore mechanism.

Roles & Responsibilities:
- Understanding Business requirements.
- Extracting, Transforming and Loading data from flat files and placing it into Oracle tables.
- Created Informatica mappings to build business rules to load data.
- Transformations were used are Source qualifier, Aggregators, lookups, Filters, Update Strategy, Sorter and Sequence Generator.
- Development of mappings and mapplets using Informatica.
- Created mapping variables for incremental extraction.
- Developed Unit Testing for mappings and tested them.
- Supporting production team during implementation of the mapping. Created and Monitored workflows using workflow designer and workflow monitor.

PROJECT#8:

Title : PORTAL Development
Client : REFLIK Inc
Technologies : Informatica 9.0
Role : ETL Developer

Description:
Reflik provides a new and technologically advanced way to hire top employees without any administrative burden. Learn about our recruiting platform today.

Roles & Responsibilities:
- Prepared user manual, training manual and install plans.
- Extraction, Transformation and Loading of data from flat files, Oracle sources into oracle database.
- Used various transformations like Source Qualifier, Filter, Aggregator, Expression, Lookup and update Strategy to create mappings.
- Involved in understanding the Business needs and gathering the necessary requirements from

Clients.

- Optimizing/Tuning mappings for better performance and efficiency.
- Preparation of ETL mapping documents.

.
