PROFESSIONAL SUMMARY

- 7.4 years of experience as a Specialist Software Engineer.
- Full-time MTech graduate actively seeking roles in Software Development/Engineering.
- Skilled Lead Analyst with expertise in .NET Core, C#, and Azure cloud services.
- Proficient in building scalable microservices, secure REST APIs, and integrating with API Management and Service Bus.
- Experienced in Agile environments, delivering reliable, business-aligned solutions across distributed systems.

EXPERIENCE / PROJECTS

Lead Analyst - Full Stack Developer, CGI **September '23 - Present**

1. Designed and developed scalable .NET Core APIs, Azure Functions, and microservices using C# for real-time and background processing.
2. Built full-stack solutions using react (frontend) and ASP.NET Core (backend), improving user experience and system responsiveness.
3. Secured APIs with Azure API Management (APIM) using OAuth2, JWT, and role-based access control, and implemented CORS for secure communication.
4. Developed and containerized services using Docker and deployed them in DevOps via pipelines.
5. Automated builds and deployments using Azure DevOps enabling continuous integration and delivery.
6. Practiced TDD using xUnit and Moq and worked in Agile teams across projects to ensure code quality and timely delivery.

Key tech: C#, .NET Core, ASP.NET Core, react, Azure Functions, APIM, Service Bus, Event Grid, Docker, xUnit, Moq, Azure DevOps, SQL Server, Git, Agile Methodology

Specialist Software Engineer, Société Générale **May '23 – September '23**

1. Supported two enterprise platforms involving queue sender and receiver systems, focusing on message flow analysis using RabbitMQ.
2. Contributed to backend system design discussions and documentation for ASP.NET Core microservices, emphasizing scalability and maintainability.
3. Collaborated with developers using GitHub for code reviews, version control, and branch management.

Key Tech: C#, .NET Core, ASP.NET Core, RabbitMQ, Git, Microservices

Full Stack Cloud Specialist at Danske IT **May '18 – May '23**

1. Developed robust microservices and APIs using C#, .NET, and Entity Framework, contributing to key business modules.
2. Created and maintained CI/CD pipelines, ensuring consistent integration and delivery across environments.
3. Containerized services with Docker and implemented Swagger for service documentation and testing.
4. Built and published internal NuGet packages and integrated RabbitMQ for inter-service communication.
5. Managed virtual machine setups, DNS configurations, and cloud service deployments.
6. Collaborated in Agile teams, practicing TDD fundamentals and delivering high-quality code.

Key tech: C#, ASP.NET, Docker, Swagger, NuGet, RabbitMQ, CI/CD, Azure, Git

Document Developer at Danske IT

End-to-End process in the transmission of documents using Papyrus, Mainframes, PLI, COBOL, Non - central systems in the whole bank and in all departments across the bank.

MASTER'S DEGREE INTERNSHIP **at BSNL, Bangalore** **AUG '15 – DEC '15**

Hands-on exposure to fiber optics, broadband networks, and telecom-layer technologies

EDUCATION

- Master Of Technology in Digital Communication and Networking, ECE | REVA ITM | July '14 - Jun '16
- Bachelor Of Engineering in Electronics and Communication Engineering | MVJCE | July '09 - Jun'13

KEY SKILLS

- C#, Asp.net, .Net Entity Framework	- Docker, CI/CD, Dot Net Core	- Azure DevOps
- Microsoft Azure	- Micro services, APIs, GIT	- React
- Basics of TDD	- Postman, Swagger	- LINQ
- Microsoft SQL Management Studio	- Visual Studios	- Agile methodology

CERTIFICATIONS

- GEM Award from DIT, 2021 for the extra support and development in Campaigns
- Certification on SQL, MySQL from JSpiders, Bangalore.
- Advance Trends in Robotics and Industry Automation, 2011 from MVJCE, Bangalore.
- 2014 International Conference on Advance in Electronics, Computers and Communication from REVA ITM, Bangalore.

PERSONAL INFORMATION

Date of Birth: 24th Sept 1991
Permanent Address: Bangalore
