## PROFESSIONAL SUMMARY

ServiceNow Developer with 3+ years of hands-on experience in designing, developing, and implementing solutions across SAM Pro, HAM, ITSM, and CMDB modules. Proven track record in optimizing license compliance, automating asset lifecycle workflows, and integrating external systems like SCCM, JAMF, Office 365, Salesforce, and Zuora using REST APIs and IntegrationHub. Adept at workflow automation, stakeholder training, and CMDB data accuracy. Strong communicator and team player with successful collaborations across global teams.

## CORE COMPETENCIES

- **ServiceNow Modules:** ITSM, SAM Pro, HAM, CMDB, APM, Asset Management, Compliance
- **Integration Tools:** IntegrationHub, MID Server, REST/SOAP APIs, Flow Designer
- **Development:** JavaScript, GlideScript, Script Includes, Business Rules, UI Policies
- **Tools:** Performance Analytics, Service Graph Connector, Data Manager
- **Platforms:** GitHub, Jira, Linux, Eclipse, VS Code

## PROFESSIONAL EXPERIENCE

**ServiceNow Developer — NCR Corp** *May 2022 – Present*

- Replaced a legacy system with 80+ software request catalog items, improving fulfillment time by 40%.
- Automated SaaS license compliance workflows, reducing manual tracking efforts by 50%.
- Managed ITSM modules including Incident, Change, Problem, and Request with SLA automation.
- Designed and implemented full HAM lifecycle covering procurement, allocation, and disposal.
- Integrated HAM with vendor stockrooms and discovery tools, reducing ghost assets by 45%.
- Improved CMDB reliability by 35% using IRE optimization and CSDM alignment.
- Developed business logic using Business Rules, Script Includes, Access Controls, and Client Scripts.
- Created dashboards to track license usage, contract expiry, and workflow bottlenecks.
- Collaborated with Microsoft and Salesforce vendors for audit readiness and license compliance.
- Led quarterly compliance campaigns to reduce software waste and optimize usage.
- Trained teams through one-on-one and group sessions on SAM/HAM processes and tools.

**Software Engineer — BluePi Consulting** *Nov 2021 – May 2022*

- Built JSP/Spring-based password recovery module for national toll system.
- Integrated REST APIs for real-time chargeback reporting used by financial operations.
- Contributed to SDLC phases from requirement gathering to deployment.

## PROJECTS

- **Multi-System Integration for SAM Compliance:** Connected ServiceNow with SCCM, JAMF, Office 365, Salesforce, and GitHub to automate license data ingestion using REST APIs.
- **SAM Lifecycle Automation:** Managed onboarding, renewals, harvesting, and reclamation for 10+ software titles, achieving a 30% increase in licensing efficiency.
- **Compliance Reporting Suite:** Developed dashboards and tools that reduced audit prep time by 60%.

- **ITSM Workflow Redesign:** Enhanced Incident and Change workflows, improving resolution metrics.
- **Salesforce and Zuora Integration:** Built integrations for syncing subscriber and billing data with ServiceNow.
- **HAM Process Automation:** Deployed complete hardware lifecycle automation integrated with vendor logistics and asset discovery.
- **Process Training Initiative:** Delivered structured training for SAM and HAM end-users and title owners.

## CERTIFICATIONS

- ServiceNow Certified System Administrator (CSA) – Aug 2023
- Micro-Certification: Configure the CMDB – Jul 2022

## EDUCATION

**B.Tech in Computer Science** — GLA University 2018–2022
CPI: 7.65
**Intermediate** — VidyaGyan Leadership Academy 2016–2017
Score: 86.2%
**High School** — VidyaGyan Leadership Academy 2014–2015
CGPA: 10
