Place : Bangalore

Professional Summary

Experienced and results-driven Flutter Developer with **5 years of experience** in designing, developing, and deploying scalable cross-platform **mobile applications**. Proficient in **Flutter, Dart, RESTful APIs, Firebase, and state management (Provider, BLoC)**, with expertise in building pixel-perfect UIs and delivering high-performance, secure, and reliable apps. Skilled in **database management (SQLite, Firebase Firestore), CI/CD pipelines, and app deployment** to Google Play Store and Apple App Store. Adept at gathering requirements, **applying modern architecture patterns**, and collaborating with stakeholders to translate business needs into robust technical solutions.

Technical skills

- Programming Languages : Dart
- Development Frameworks : Flutter, Android SDK
- State Management : Provider, BLoC
- Hardware Integrations : Bluetooth, Camera
- Database Management : SQLite, Firebase Firestore
- Version Control : Git, GitHub, GitLab, Bitbucket
- CI/CD Tools : GitHub Actions
- Backend & API Integration : RESTful APIs, GraphQL, Firebase,
- Dependency : Pub (Flutter), Gradle (Android)
- Testing & Debugging : Unit Testing, Widget Testing, Integration Testing,
- App Deployment : Google Play Store, Apple App Store, Firebase App Distribution
- Push Notifications : Firebase Cloud Messaging (FCM), OneSignal
- UI/UX Design : Material Design, Cupertino Design, Responsive UI, Animations
- Security & Performance : Code Obfuscation, Secure Storage, Performance Profiling

Professional Experience

SIDgs — Flutter Developer — July 2022 to present

Roles and Responsibilities

- **Developed** cross-platform mobile applications using **Flutter and Dart**, ensuring seamless **performance and responsiveness** across Android and iOS devices.
- Wrote clean, **well-documented, and maintainable Dart code** to ensure scalability, ease of upgrades, and long-term application support.
- **Implemented** state management solutions using **Provider** and **BLoC** to handle complex **booking workflows** and **maintain scalable application architecture**.
- Built and customized **mobile applications** using **Flutter Flow, leveraging its low-code environment to accelerate development** and deliver scalable, production-ready apps.
- Applied architectural patterns such as **MVC, MVVM, and Clean Architecture** to build **scalable, maintainable, and modular** Flutter applications.
- **Integrated** RESTful **APIs**, **Firebase Firestore**, and GraphQL for real-time data synchronization, enabling dynamic room cost, ratings, and booking details.
- **Designed** intuitive and responsive **UIs following Material and Cupertino design principles**, incorporating animations for smooth room browsing experiences.
- Integrated Firebase services including **Firestore, Authentication, and Cloud Functions to enable secure data management**, user authentication, and real-time app functionality.
- **Optimized** application performance through **profiling, code obfuscation**, and secure storage practices, ensuring fast load times and secure user data.
- Debugged and **resolved issues in existing Flutter applications**, improving stability, performance, and overall user experience.
- **Configured Firebase Cloud Messaging** (FCM) and OneSignal for push notifications, keeping users updated on booking confirmations and offers.
- **Automated** build and deployment pipelines with GitHub Actions, delivering apps to **Google Play Store, Apple App Store,** and Firebase App Distribution.
- Participated in **code reviews, design discussions, and Agile ceremonies to ensure code quality**, collaborative development, and timely project delivery.

Agasthya technologies — Flutter developer — Nov 2020 to July 2022

Roles and Responsibilities

- **Developed and deployed** a cross-platform mobile **application using Flutter and Dart, enabling users** to join professional communities and refer candidates for open positions.
- **Integrated** RESTful APIs and Firebase services to manage user **authentication, referrals, and credit-based** reward tracking.
- **Implemented** state management with Provider and **BLoC to ensure seamless navigation**, data handling, and app scalability.
- **Designed and optimized** responsive **UI/UX with Material Design** and Cupertino principles, delivering a smooth and engaging user experience.
- **Performed** unit, widget, and integration testing to ensure reliability, reduce bugs, and maintain high code quality throughout the development cycle.

K2 Health Service — Flutter developer — Nov 2019 to Nov 2020

Roles and Responsibilities

- **Developed and maintained** a tele-consultation mobile application using **Flutter and Dart**, enabling doctors to track and manage patient records efficiently.
- **Implemented** state management with Provider and **BLoC to ensure smooth data flow** and scalable app architecture.
- **Integrated** RESTful APIs and Firebase services to enable real-time data synchronization, secure authentication, and seamless communication between doctors and patients.
- **Designed and optimized** intuitive **UI/UX with Material and Cupertino** design principles, ensuring responsive layouts and user-friendly navigation.
- **Configured and managed** local and cloud databases (SQLite, Firebase Firestore) for storing patient records securely with high reliability.
- **Performed** unit, widget, and **integration testing to validate features, improve code quality**, and reduce production defects.
- **Deployed and released** the app to Google Play Store and Apple App Store, streamlining delivery with CI/CD pipelines using GitHub Actions.

Altorum-Leren Operation — Flutter Developer — Dec 2018 to Sept 2019

Roles and Responsibilities

- **Developed and maintained** scalable cross-platform mobile applications using **Flutter and Dart, ensuring high performance, responsiveness**, and reliability.
- **Translated** UI/UX designs into **pixel-perfect, responsive, and animated interfaces** using Material and Cupertino design principles.
- **Implemented** state management solutions such as **Provider and BLoC to streamline data flow** and improve app stability.
- Developed and deployed **cross-platform Android and iOS applications using Flutter**, publishing successfully on Google Play Store and Apple App Store.
- **Integrated RESTful APIs**, GraphQL, **Firebase services, and hardware features** (Bluetooth, Camera) to deliver seamless functionality and user experiences.
- **Managed and optimized** local (SQLite) and cloud (**Firebase Firestore**) databases to ensure secure, reliable, and efficient data storage.
- **Configured and deployed** applications to Google **Play Store, Apple App Store, and Firebase App Distribution with CI/CD pipelines** using GitHub Actions.
- **Enhanced** app security and performance by applying code **obfuscation, secure storage, and performance profiling** techniques.
- **Conducted** unit, widget, and integration testing to validate **booking workflows, improve reliability**, and reduce post-release defects.

Education

Information Science and Engineering Dr.AIT (Autonomous under VTU) 2017
