Project Details

Project Experience

Project 1: Johnson Controls

- **Client:** Johnson Controls (JCI)
- **Environment:** Salesforce (Sales Cloud, Service Cloud), ServiceMax, Apex, Lightning Web Components (LWC), Oracle/Iscala integration.
- **Description:** Implemented and customized the ServiceMax solution to manage field service operations.
- **Key Contributions:**
- Designed and developed custom features using Apex, LWC, and Flows.
- Worked on data integration with SAP using REST APIs.
- Developed Apex triggers, classes, and batch jobs for automation.
- Designed and maintained Lightning components to enhance user experience.
- Supported production issue resolution and maintained technical documentation.
- Managed complex ServiceMax configurations and customizations.

Project 2: Hillenbrand Mould Maker

- **Client:** Hillenbrand
- **Environment:** Salesforce FSL, Apex, SOQL, Flow, SAP integration.
- **Description:** Implemented Salesforce FSL to digitize and optimize field service operations for industrial manufacturing.
- **Key Contributions:**
- Configured FSL components like Service Resources, Work Types, and Service Territories.
- Developed scalable Apex triggers, classes, and batch jobs.
- Created custom Flows and Screen Flows for guided processes and reports.
- Customized the FSL Mobile App for field technicians.
- Implemented role-based access controls and sharing rules.

Project 3: Vz1 SLED Migration project

- **Client:** Verizon, New York, United States
- **Environment:** Salesforce.com Platform, Apex, Visualforce, JavaScript, Force.com, Data Loader.
- **Description:** A migration project focused on GBM case management and integrating Salesforce with third-party tools via REST API web services.
- **Key Contributions:**
- Developed REST API Web Services to integrate Salesforce with BizTalk.
- Wrote Visualforce pages and Apex controllers to design business processes.
- Used batch processing for web service callouts and implemented workflow rules and process builder processes.
- Performed various administration tasks, including creating custom objects, fields, and profiles.

Project 4: Wealth Management Business (CBA)

- **Client:** Commonwealth Bank Of Australia (CBA)
- **Environment:** Salesforce.com Platform, Apex, Visualforce, JavaScript, Force.com, Data Loader.
- **Description:** Implemented Salesforce customization requirements across three instances for CBA's wealth management business.
- **Key Contributions:**
- Redesigned the Opportunity object and related objects.
- Created new record types, a Visualforce page for dynamic rendering, and complex approval processes.
- Developed Apex triggers and classes to implement complex business logic.
- Used Custom Metadata Types for configuration and managed deployments using changesets.
- Configured page layouts, workflows, and security profiles.
