NEHA KHULE

+918050724247 – Bangalore, Karnataka –www.linkedin.com/in/neha-khule-012022234 (nehakailashkhule@gmail.com)

SUMMARY OF QUALIFICATIONS

- Highly skilled Flutter Developer with 4.6 years of experience delivering robust, scalable, and user centric mobile applications for Android and iOS. Proficient in Flutter and Dart, with expertise in state management frameworks like Bloc,Provider and MobX.
- Adept at integrating APIs, implementing Firebase services, and leveraging unit testing frameworks such as flutter_test and bloc_test to ensure application stability.
- Driven to adopt Test-Driven Development (TDD) principles and explore cutting-edge Flutter tools to deliver top-tier mobile solutions. Strong collaborator with a passion for creating intuitive, high quality user experiences.

EDUCATION

Visvesvaraya Technological University Bengaluru, Karnataka
Bachelor of Engineering in Computer Science April 2019

- Major CGPA: 7.45
- Worked on basic elements of android development as an intern.

Vidya Vardhaka PU College Bengaluru, Karnataka
PUC in Computer Science May 2015

- Percentage: 81%

SVN Group of Institutions Bengaluru, Karnataka
Elementary schooling May 2013

- Percentage: 88%

TECHNICAL SKILLS

- **Programming Languages**: SQL, C, C++, Java, Dart, Node js
- **State Management**: Bloc, Provider, MobX
- **Tools**: Flutter,Visual studio,Sanity CMS,Android studio
- **Operating Systems**: Windows NT/ 2000/ XP/ Vista, Linux, Unix
- **Database**: SQL Server
- **Software**: SQL, MS Excel, MS Word,Mystiq

PROJECT EXPERIENCE

ENBD (Emirates NBD Mobile Banking App)
Senior Flutter developer

- Developed and enhanced the **Activity Booking module** for the ENBD travel experience platform using Flutter for both Android and iOS.

- Implemented key flows such as **Activity Search, Traveller Selection, and SRP (Search Results Page)** with intuitive and dynamic UI.
- Managed API integration for real-time activity listings, suggestions, and filters using **Dio with interceptors**.
- Used **BLoC pattern** to handle complex state transitions and maintain clean separation of business logic and UI.
- Built **Modify Search bottom sheets**, recent activity tracking with **Hive local storage**, and custom pagination in SRP.
- Optimized user experience by implementing **text-based search triggering after 3 characters**, debouncing, and recent history management.
- Collaborated with backend, QA, and UI/UX teams in an Agile environment, actively contributing to sprints and feature planning.

IIFA(The Club by IIFA)
Flutter developer

- Implemented the **BLoC (Business Logic Component) architecture** for state management, ensuring clear separation of UI and business logic, resulting in scalable and maintainable code.
- Integrated social sharing features, boosting user engagement by 40%.
- Delivered push notification functionality for real-time updates, enhancing the overall user experience.

Tata Neu App (Travel Tech)
Flutter developer

- Features: Worked as a Flutter developer on the Tata Neu app, played a key role in building cross-platform features, ensuring smooth functionality across Android and iOS.
- Utilized **MobX for state management**, enabling reactive UI updates and seamless synchronization of application state, resulting in improved performance and maintainable code.
- UI/UX Development: Collaborated closely with back end teams, product managers, and UX/UI designers to deliver high-quality, user-friendly experiences for travel bookings and services.
- Functionality: Implemented core travel-related functionalities, including flight and hotel bookings, search, filters, and payment integration using Flutter's widget framework.

Hoppy (E-commerce)
Flutter developer

- UI/UX Development: Designed and implemented intuitive user interfaces using Flutter's widget-based framework, focusing on creating a visually appealing and easy-to-navigate app.
- State Management: Managed app state using Provider to ensure efficient data handling and smooth user interactions throughout the app.
- User Authentication: Implemented user authentication and profile management, allowing users to create accounts, log in, and save their preferences.

Easy Service (Repair Services)
Flutter developer

- Feature Development: Developed and maintained core features, including service listings, booking requests, scheduling, and real-time updates on service status.
- API Integration: Integrated with back-end APIs to enable service providers to update availability and manage customer bookings in real time.

Hafma (Investment banking)
Flutter developer

- Investment Features: Developed core features such as portfolio tracking, investment recommendations, real-time market data, and transaction history. Ensured that users could easily view and manage their investments with a clean, user-friendly interface.
- API Integration: Integrated real-time financial APIs to fetch stock prices, market data, and investment news, ensuring users have up-to-date information for making informed decisions.

Gamistaan (Gaming)
Flutter developer

- Gaming Features Development: Implemented key features such as game discovery, subscription management, in-app purchases, and personalized game recommendations based on user preferences and game play history.
- Subscription Integration: Integrated secure payment gateways and subscription models, allowing users to easily subscribe to games, manage their plans, and receive notifications on billing cycles

Chetana chits (Credit System)
Flutter developer

- Description: This app is developed for Chetana Chits employees who are on the field taking care of chit fund collection,meeting the leads generated from various sources like mobile,web-app and telephone inquires
- Web App: Web Application where Management can look into the productivity of the field employee by tracking the location of an employee,number of activities performed by the employee in various fields
