Profile Summary

Results-driven IT Administrator with over 6 years of hands-on experience specializing in endpoint management through Microsoft SCCM, Microsoft Intune, and VMware AirWatch. Adept at designing, deploying, and maintaining scalable device management solutions for Windows, iOS, and Android platforms. Proven ability to streamline patch management, ensure compliance, and automate deployment processes across enterprise environments. Strong troubleshooting skills, team collaboration, and focus on security best practices.

Skills

Team Management: Managed team and worked along with multiple teams such as packaging, CyberArk and AD Team.

Creating SOP and managing workload.

SCCM (System Center Configuration Manager): Application packaging, OS deployment, patching, reporting, compliance baselines

Microsoft Intune / Endpoint Manager: Mobile device management, configuration profiles, conditional access, compliance policies, Autopilot

VMware AirWatch (Workspace ONE): Mobile application management (MAM), device enrollment, policy enforcement, troubleshooting

Microsoft 365 & Azure AD: Conditional access, device join, security & compliance, identity management

OS & Platforms: Windows 10/11, Windows Server, iOS, Android

Security & Compliance: Endpoint encryption, patch compliance, Zero Trust model, data protection policies

Monitoring & Reporting: SSRS, SCCM Inbuilt reports, log analysis

Education

Bachelor of Science from CSJM University Kanpur in 2014

12th From UP Board in 2009

10th From UP Board in 2007

Professional Experience

HCL Technologies Ltd.

Feb 2023 to till now

Administer and maintain SCCM infrastructure for 70K+ endpoints including application packaging, software distribution, patch deployment, and OS imaging.

Implement and manage Microsoft Intune policies for MDM, application deployment, conditional access, and compliance enforcement across iOS, Android, and Windows devices.

Configure and manage VMware AirWatch (Workspace ONE) for device enrollment, MAM, and secure corporate application delivery.

Collaborate with security teams to ensure endpoint compliance with CIS benchmarks, vulnerability management, and patch baselines.

Automate daily tasks and reporting using PowerShell scripts, reducing manual efforts.

Conduct troubleshooting for device enrollment failures, software distribution errors, and patch deployment issues, ensuring SLA compliance.

Prepare and present monthly reports on endpoint compliance, patch status, and device health to IT leadership.

Amazon Development Center

Aug 2021 – Feb 2023

Supported and maintained SCCM infrastructure including DPs, MPs, SUPs, and troubleshooting client health.

Assisted with migration from SCCM co-management to Intune, enabling cloud-first endpoint management strategy.

Managed Windows Autopilot deployments for seamless device provisioning.

Developed and deployed compliance and configuration profiles in Intune to enforce corporate security policies.

Delivered Level 3 support for SCCM/Intune/AirWatch issues and acted as SME for endpoint management solutions.

Collaborated with application teams for application packaging and deployment using SCCM and Intune Win32 apps.

Tech Mahindra Ltd.

Nov 2018 – July 2021

Supporting and managing task and incident and providing remote support to end user.

Supported client management and application lifecycle.

Reporting via SSRS for inactive clients and patch compliance.

Aegis Ltd.

Apr 2017 – Nov 2018

Supporting and managing task and incident and providing remote support to end user.

Supported client management and application lifecycle.
