Experience Summary:

Deloitte

Exp: 5 Years

Career Objective

Experienced Cloud Security Engineer with over 5 years of expertise in safeguarding cloud-based systems and infrastructure. Proficient in identity and access management, threat modeling, and incident response. Adept at implementing security measures across AWS, Azure, and Google Cloud platforms. Proven track record in enhancing security posture, ensuring compliance with industry standards and reducing vulnerabilities through automated solutions. Strong problem-solving skills and a collaborative approach to securing cloud environments.

Skill Sets

- **Public Cloud :** Google, Azure, AWS, OCI.
- **DevOps Tools :** Terraform, Jenkins, Docker, Kubernetes.
- **OS :** Windows Server 2016, 2019 and Linux Ubuntu
- **Monitoring Tool :** Prisma Cloud, Wiz.io, Tenable, GCP Logging, CloudWatch, Azure Log Analytics
- **Vulnerability Tool :** Prisma Cloud, Wiz.io, Tenable, AWS Security Hub, MS Defender, GCP SCC
- **Compliance Tool :** Prisma Cloud, Wiz.io, Tenable, AWS Config, CloudTrail, Macie
- **Compliance Standard :** PCIDSS, CIS, GDPR, NIST, MBSS, CSPM, CIEM
- **Ticketing Tool :** Service Now

Work Experience:

Deloitte – Advisory Solution Advisor - Cloud & Cyber Security [Jan 2025 – Till Date]

Responsibilities:

- Developed and implemented a security monitoring system using Google Cloud's Security Command Centre & Prisma Cloud which improved threat detection and response time.
- Ensure client's cloud environments adhere to relevant compliance standards CIS, GDPR, PCI DSS, SOC2, DMZ, MBSS.
- Review cloud architecture design and configure cloud environments to ensure alignment with industry and regulatory requirements.
- Designed and implemented RBAC policies and governance frameworks across Azure and AWS environments to enforce least privilege and maintain separation of duties.
- Implemented CIEM solutions to continuously monitor and govern cloud entitlements across AWS, Azure, and GCP, ensuring least-privilege access and reducing identity-based attack surface.
- Implemented auditing and monitoring mechanisms using CloudTrail, Azure Monitor, and Cloud Audit Logs for complete visibility into JIT access sessions and privilege escalations
- Implemented IAM policies and roles to manage user permissions and access controls across Google Cloud resources which reduced unauthorized access incidents.
- Designed and implemented data encryption strategies using Google Cloud Key Management Service (KMS) and External CMEK provider tool which enhanced data security and compliance with industry standards.
- Integrated AWS Identity and Access Management (IAM) with on-premises identity providers to streamline user access.
- Developed and audited custom Azure Policies for regulatory compliance (CIS/NIST) covering encryption, location restrictions, tagging, and network security.
- Implemented SCPs to enforce least privilege access, ensuring that users and roles only had the permissions necessary for their tasks.
- Collaborated with cross-functional teams to identify and address security requirements and compliance needs.
- Monitored and audited the effectiveness of SCPs, adjusting as necessary to address new security threats and

compliance requirements.

- Developed automated compliance auditing and reporting using AWS Config and AWS CloudTrail.
- Provided training and guidance to junior security staff on cloud security best practices and tools.
- Collaborated with development and operations teams to integrate security best practices into CI/CD pipelines, enhancing overall security posture.
- Configured ingress and egress rules within VPC Service Controls to secure data exchange across organizational boundaries.

NTT Data & Niveus Solutions Pvt. Ltd. – Senior Cloud Security Engineer [Oct 2022 – Dec 2024]

Responsibilities:

- Designed and deployed a comprehensive Google Cloud Landing Zone to support enterprise cloud adoption. Enabled secure and scalable cloud infrastructure, reducing setup time for new projects by 50%.
- Designed and implemented Just-in-Time (JIT) access models for elevated privileges across AWS, Azure, and GCP using native and custom workflows.
- Enforced least-privilege and zero-standing-access principles by configuring Azure AD PIM, AWS IAM STS (AssumeRole), and GCP IAM impersonation bindings
- Conduct comprehensive assessments of client's cloud platforms and identify security vulnerabilities, compliance gaps, potential risks.
- Provide guidance on the selection of cloud security solutions and technologies and address security challenges with appropriate solutions.
- Implemented Enterprise Policy-as-Code (EPAC) framework using Open Policy Agent (OPA), Azure Policy, and Rego for centralized, scalable policy governance.
- Implemented Infrastructure as Code (IaC) using Terraform to automate the deployment and management of the landing zone. Increased deployment efficiency and consistency, reducing manual errors by 40%.
- Applied security best practices across the landing zone, including encryption, logging, and monitoring. Enhanced overall security posture and reduced security incidents by using Google Cloud KMS, Cloud Logging, Cloud Monitoring.
- Managed and secured multiple projects within the landing zone, ensuring consistent security policies and resource management. Google Cloud Resource Manager, IAM, Security Policies.
- Created and configured VPC Service Controls perimeters to protect sensitive data in Google Cloud services such as Cloud Storage and BigQuery.
- Identified and resolved service perimeter violations using VPC Service Controls and ensuring secure access to cloud resources.

DXC Technology – Cloud DevOps and Security Engineer [June 2020 – September 2022]

Responsibilities:

- Server Migration from On-Prim vCenter to Azure cloud followed by change management process.
- Used Azure-Migrate Tool to initiate Replication / Perform Test cutover.
- Performing health check and un-installing existing monitoring tool.
- Built and integrated DevSecOps pipelines with security tools (Trivy, Checkov, Snyk, SonarQube) to scan IaC, container images, and application code within GitHub Actions and Azure DevOps.
- Automated security guardrails using Security-as-Code principles in Terraform, Azure Bicep, and AWS CloudFormation to ensure consistent secure deployments.
- Implemented IAM policies to manage user permissions and access controls in a simulated AWS environment.
- Enabled JIT access in GCP through service account impersonation, conditional IAM bindings, and scheduled revocation via Cloud Scheduler
- Developed a security monitoring system using AWS CloudWatch and AWS Lambda
- Provision VPC, Subnets, VM, Security Groups as per the customer requirements.
- Work closely with client stakeholders and mitigate security gaps by providing technical guidance and assistance.
- Conduct compliance assessments of cloud environments and ensure adherence to applicable regulatory requirements.
- Develop and refine cloud security policies, procedures, standards and align policies with regulatory and industry frameworks.

Sensitivity Label: General

Certification Courses:

Microsoft Azure / AWS / Google / Oracle.

- Google Cloud Certified Professional Cloud Architect
- Google Cloud Certified Professional Cloud Security Engineer
- Google Cloud Certified Professional Cloud Network Engineer
- Google Cloud Certified Professional Cloud DevOps Engineer
- AWS Certified Cloud Practitioner
- Microsoft Azure Administrator Associate
- Oracle Cloud Infrastructure Foundations

Soft Skills:

- Problem-Solving and Adaptability
- Leadership and Communication
- Teamwork and Collaboration
- Attention to Detail and Continuous Learning
- Time Management and Critical Thinking

Education Acquired:

University Name	Degree	Percentage/ CGPA	Stream/Subjects
VTU 2016 -2020	B.E.	6.84	I have completed my Bachelor's Degree from Visvesvaraya Technological University (VTU) in Electronics and Communication stream with 6.84 CGPA
KSEEB 2014-2016	PU	78.83	Science (Physics, Chemistry, Mathematics, CS
KSEEB 2011-2014	High school	77.76	English, Mathematics, Science, SS, Kannada, Hindi

Other information:

Awards:

- Received Champ Award for 4 consecutive quarter.
- Received appreciation from Leadership Team for completing project on-time.
- Getting more Business/Projects from the client.
- Recognized with best customer handling skills via presentation and attending weekly hurdle calls.

Personal Dossier:

Languages:
English, Kannada, Hindi

Interest:
Music, Traveling

➢ I hope you will find that I am qualified for the position you are trying to fill please let me know, if I can provide you with any further Information on my background and qualifications. I appreciate your taking the time to review my credentials and experience. Again, Thank You for your consideration.

Sincerely,
Tilak Naik
