CHETAN M B

Architect Lead Analyst at Citibank Pvt Ltd

Address: #52, 12th Cross Vidyagiri ◆ Phone: +91 9743432258

Email: bulla.chetan@gmail.com

Experience Summary

Experienced Data and Cloud Professional with 10+ years in the BFSI banking sector, delivering end-to-end solutions across data analytics, engineering, and business analysis for clients including, Citibank, HSBC, Empower and Chicago Merchant Exchange. Adept at designing scalable ETL/ELT pipelines, building real-time data streaming solutions using Kafka, Spark, and Flink, and developing interactive dashboards with Tableau. Skilled in cloud migration, data remediation, KYC automation, and regulatory compliance. Proven ability to bridge technical and business teams, document technical solutions, ensure high data quality and governance across complex financial ecosystems..

Followings are summary of professional experience:

- Design, implement, and maintain end-to-end data architecture blueprints covering ingestion, storage, curation, and serving layers. Ensure scalability, security, and interoperability across GCP (BigQuery, Pub/Sub, Dataflow, Dataplex) or hybrid cloud environments.
- Architect cloud-native data lake houses and pipelines leveraging BigQuery, Dataform, Vertex AI, GCS, and Cloud Composer. Migrate legacy systems to cloud with a focus on performance, cost optimization, and resilience.
- Develop conceptual, logical, and physical models (Star, Snowflake, Data Vault) that align with business KPIs, finance metrics, and risk indicators. Collaborate with stakeholders to ensure traceability from source to dashboard.
- Develop and optimize ETL/ELT pipelines using Informatica, dbt, Spark, Dataflow, and Kafka. Handle structured, semi-structured, and streaming data ensuring idempotency, watermarking, and data lineage.
- Establish governance standards for metadata management, data lineage, ownership, and access control using tools like Collibra or Apache Atlas.
- Work with business and technology teams to translate requirements, data flows, and process gaps into actionable data specifications and mapping documents. Perform impact analysis for system changes and process enhancements.
- Implement query optimization, partitioning, clustering, and caching strategies in BigQuery. Enforce data encryption, masking, IAM roles, and audit logging to maintain security and cost-efficient operations.
- Lead cross-functional teams (data engineers, analysts, testers, and architects) in Agile environments.
- Drive PoCs in Agentic AI, AIML and AIDL and promote data observability, simplification, modernization, and MLOps practices for continuous improvement.

Skills

Tools & Technologies:

- Cloud Technologies: Amazon Web Services - EC2, EMR, S3, GCP- Cloud storage, BigQuery, IAM, DataFlow
- Cloud Database: BiqQuery, RedShift
- Legacy Database: Oracle, MS SQL, PostgresSQL
- Programming/Scripting Languages: Python, Shell Scripting, Core Java
- ETL/ELT: PySpark, Informatica Power Center, Cloud ETL service , AWS Glue and GCP DataFusion
- Data Governance: Data Security, Data Masking, Data Quality, Data Reconciliation, Data Profiling
- Enterprise Data Catalog: Informatica Axon, Collibra, and Cloud Data Catalogue
- Visualization/Reporting : Tableau and Looker
- Versioning: GitHub, Bitbucket
- AIML: Neural Network, LSTM, Random Forest, and SHAP

Work History

Nov 2024 - Present

Job Title: Vice President | Architect Lead Analyst| Employer: Citibank

Client: Citibank

Projects:

- USPB Data Concern and Remediation Management
- Data Frameworks, Data Hub and KYC automation

Responsibilities:

Led efforts to standardize Unique ID generation across banking applications, achieving critical compliance milestones

- Architect and maintain scalable, secure, and cost-efficient data platforms (on-prem and cloud: GCP, AWS, Snowflake) by defining data models, integration layers, and governance frameworks aligned with business objectives.
- Develop ETL/ELT pipelines to unify data from multiple systems using tools like Dataflow, Informatica, Kafka, or dbt, ensuring data

consistency, lineage, and high-performance ingestion across real-time and batch processes.
- Define and enforce data ownership, metadata management, quality validation, and regulatory compliance (GDPR, SOC2, ISO 27001) with platforms like Collibra or Apache Atlas for visibility and trust in data assets.
- Build semantic layers, data marts, and analytical models (Star, Snowflake, Vault) that empower self-service BI, ML, and GenAI initiatives, improving decision-making and operational efficiency.
- Partner with cross-functional teams to modernize legacy systems to cloud architectures, lead data strategy reviews and PoCs, and promote best practices in modeling, security, and performance optimization.

May 2024 – Oct 2024

Job Title: Associate Data Modeler | Employer: Empower

Client: Empower

Projects:
- Data migration between Empower and Personal Capital Data warehouse

Responsibilities:
- Defined data models, schemas, and reference architecture for analytical and operational workloads in GCP and RedShift
- Created data roadmaps and modernization frameworks ensuring scalability, reliability, and cost-efficiency.
- Designed and implemented ETL/ELT pipelines using modern data engineering frameworks (Spark, dbt, Dataflow, Informatica, etc.).
- Integrated structured, semi-structured, and unstructured data from APIs, databases, and streaming sources (Kafka, Pub/Sub).
- Built real-time and batch data ingestion pipelines ensuring low-latency and high-throughput.
- Lead data platform standardization across multiple lines of business (LoBs).
- Developed conceptual, logical, and physical data models (OLTP, OLAP, Star, Snowflake, and Data Vault).
- Ensured all deliverables adhered to internal data governance and regulatory guidelines, documenting control points and exception handling workflows.
- Implemented data governance frameworks covering cataloging, ownership, access control, and stewardship.
- Assisted in building data lakes and data warehouses using BigQuery, Redshift, or Snowflake.
- Developed basic ETL/ELT scripts and workflows using Dataflow, Dataproc, or Cloud Composer.
- Established data quality validation layers (file, record, batch, sequencing, compliance).
-

Feb 2022 – May 2024

Job Title: Associate Cloud Architect Technology| Business Analyst| Employer: Synechron Pvt Ltd

Client: Chicago Mercantile Exchange (CME)

Projects:

- Enterprise Data Warehouse Modernization (from on-premises platform to cloud platform) using Multi Tenancy model
- Fresh multi tenancy Enterprise Data Warehouse and Data Lake implementation
- Migration of client's Global Enterprise Data Warehouse from on-premises platform to Google cloud platform

Responsibilities:
- Supported senior architects in designing scalable, secure, and cost-effective cloud architectures across IaaS, PaaS, and SaaS models.
- Contributed to high-level design (HLD) and low-level design (LLD) documents for application and data modernization.
- Participated in on-prem to cloud migration of data warehouses, applications, and ETL pipelines.
- Configured Identity and Access Management (IAM) roles, policies, and encryption standards.
- Implemented data protection, audit logging, and network security controls aligned with compliance frameworks (SOC2, ISO27001).

October 2017 – Feb 2022

Job Title: Data Analyst | Employer: Capella e Systems

Client: Maveric System, HSBC Bank

Projects:

- Customer Service Operations data analytics and sentiment analysis.
- Analyze multiple Data Marts and Business Intelligence (reporting) solutions for Accounting, Finance, Sales and Credit Bureau enterprise business units.
- Design of ETL driven priority-based Master Data Management Data Engineering solutions for Enterprise Data Warehouse.

Responsibilities:

- Collect, clean, and preprocess data from various sources and ensure data integrity and accuracy by performing quality checks.
- Data Analysis and Profiling of data to understand data patterns, nature and quality of data which are pre-requisite of data model and design activities.
- Preparation of technical design document, data mapping documents, data flow diagram etc.
- Preparation of design document for ingesting and processing data into On-premises Big Data platform for data Analytics.
- Coordination for developing Data Engineering components using Python, PySpark and Apache Hive for data loading for data Analytics.
- Performed exploratory data analysis to understand the data and uncover patterns and Use statistical techniques to analyze data and generate insights.
- Applied various analytical methods, such as regression analysis, cluster analysis, and time series analysis.
- Used visualization tools (e.g., Tableau, Power BI, Matplotlib) to create charts and graphs and Communicate insights and recommendations to stakeholders through presentations and reports.
- Translated data findings into actionable business insights and Identify trends, patterns, and correlations in complex data sets.
- Conducted demo sessions with Business Users, Product Owners and client's leadership team to walk-through the features and functionalities of the deployed technical products.

May 2015 – October 2017

Job Title: DWH Test Engineer | Employer: FreeKyat

Client: Save Mart

Projects:

- Retail Demand Forecasting Data Mart and Data Analytics system development

Responsibilities:

- Understanding the transformation rules in mapping documents as per client requirements.
- Analyzed the Informatica mappings and Workflow.
- Developed Test Scenarios and Test Cases for each sprint.
- Designed and documented test cases based on Functional Specifications and Business Requirement Documents
- Execution of Test Cases and reporting the bugs through defect tracking tool HPALM.
- Validated data in target database according to business rules.
- Prepared SQL queries to validate the ETL processed data in target database.
- validated the column mapping between source and target database.
-

Award

Employee of the Month – STAR Award in Synechron Pvt Ltd.

Certifications

1. Google Cloud Platform: Associate Cloud Engineer
2. Google Cloud Platform: Professional Data Engineer
3. Snowflake Core Pro

Education

Qualification	Stream	University/Board
Master of Technology	Computer Science	Visvesvaraya Technological University, Belagavi
Bachelor of Engineering	Computer Science	Visvesvaraya Technological University, Belagavi
