Pkandari0@gmail.com | 9654009727 | Endpoint Managment | Vulnerability Management

## SKILLS

**MDM Tool**: Intune (Windows and Mobile Devices)
**Scripting**: PowerShell, VB Scripting and Batch
**Application Packaging**: Admin studio, InstallShield and PSADT.
**Vulnerability Managment**: Qualys
**OS Platform**: Windows, Mobile Device (IOS, Android)
**Ticketing Tool**: JIRA, ServiceNow.

## WORK EXPERIENCE

**Moodys Shared Services**

***System Engineer*** March 24– Till Present

- Expertise in Microsoft Intune and Azure Active Directory.
- Managed end-to-end deployment of Microsoft Intune across 20K devices.
- Proficient in device management for Windows, macOS, iOS, and Android platforms.
- Strong knowledge of cloud security protocols and compliance.
- Application packaging, deployment, and management.
- Creating and implementing device configuration and compliance policies.
- Excellent problem-solving and communication skills.
- Familiar with PowerShell scripting and automation for Intune tasks.
- Vulnerability and Patch Management Via **Qualys**.
- Have experience in Managing **AutoPilot**.
- Support Co-Pilot Related issue

**Projects** : O365 Migration from Semi Annual to Monthly Enterprise
Migration from Windows 10 To Windows 11
Application Migration from SCCM(On-Prem) to Intune.
POC on MSIX application for AVD environment.

---

**Wipro**

**Lead Administrator** **April 23- March 24**

- Managing/Leading Complete Transition for EUC Tracks (Intune, Application Packaging, Software distribution and Patch management)
- Proficient in device management for Windows, macOS, iOS, and Android platforms.
- Validate Target Operating model and map with overall transition plan and timeliness.
- Participate in strategic discussions for transition stages.
- Experience in asking the right questions to build a solution, working with product
- management and COE teams in designing and delivering Digital Workplace solutions.
- Excellent problem-solving and communication skills.
- Align with Delivery teams for transformation tools, implementation, and setup BAU operations.

**HCL Technologies**

**Technical Specialist (Packaging , SW and Patch Managment Via Intune ) Jan 22- April 23**

- Creating Installers: Develop application packages in formats like MSI, App-V, or for deployment.
- Testing and Troubleshooting: Ensure packages work seamlessly across different environments and resolve any issues.
- Automation: Use tools like AdminStudio or PowerShell for efficient packaging workflows.
- Documentation: Maintain detailed records of packaging processes and configurations.
- Software Distribution
- Deployment Planning: Design strategies for distributing software across devices using Intune.
- Monitoring: Track deployment success rates and troubleshoot failures.
- User Support: Assist end-users with software installation issues.
- Compliance: Ensure software distribution aligns with organizational policies.
- Patch Management
- Vulnerability Assessment: Identify and prioritize patches based on security risks.
- Deployment: Roll out patches using Intune.
- Testing: Validate patches in test environments before deployment.
- Reporting: Generate reports on patch compliance and effectiveness.
