KONGA REDDEPPA

E-Mail: **kongareddeppa111@gmail.com** Mobile: **+91-8217025623**

PROFILE SUMMARY

- **Having 6 Years** of experience in Informatica Power Center using various transformations, ETL Framework and Design/Development.
- Expertise in Data Integration, Extract, Transform and Load from different Data Source Systems like DB2,Oracle,SQL Server and Flat Files Using Informatica Power Center
- Currently Working on ETL tool Informatica Vs 10.5
- Solid experience in Informatica Power Centre (versions 10.X) including Designer, Workflow Manager, Workflow Monitor, Repository Manager.
- Experience in Designing, developing, and testing Informatica mappings, workflows, and data integration processes.
- Optimizing the SQL to improve performance.
- Optimizing Informatica Mappings and sessions to improve performance.
- Experience in performance tuning of sources, transformations, targets, mappings, worklets, workflows, and sessions.
- Good knowledge in identifying performance bottlenecks and also in tuning the Mappings and Sessions
- Have Knowledge in UNIX shell scripting and Experience in writing complex SQL Queries.
- Good experience in performing and supporting unit testing, system integration testing.
- Experience in identifying and resolve ETL production root cause issues.
- Experience in working Agile Projects.
- Excellent communication, interpersonal, analytical and leadership skills, self-motivated, quick learner and a team player Ability to work in a team and individually, independent thinker, focused on meeting deliverables in a remote environment
- Ability to communicate & present designer support ideas in a team-related environment.
- Experience in maintenance, enhancements, performance tuning of ETL code.

TECHNICAL SKILLS

ETL Tools : Informatica 10.5/10.4/9.6.1
Database : DB2,Oracle, MS SQL Server
Operating Systems : Windows XP/ Windows 7,8,10,Unix/Linux
Languages : SQL,UNIX
Supporting Tools :SQL Developer, IBM Data Studio,Service now,Putty,Winscp , IBM TWS.

EDUCATIONAL QUALIFICATIONS

- **Bachelor of Technology** from Jawaharlal Nehru Technological University (JNTUH), Hyderabad, (Telangana) with 79%

PROFESSIONAL SUMMARY

- Previously worked as **ETL Developer** in **Sonata software, Bangalore** from 11 Oct 2018 to 05 April 2022.
- Previously worked as **ETL Informatica Developer** in **Ascendion , Bangalore** from 09 Nov 2022 to 16 Oct 2023.
- Currently working as **ETL Informatica Developer** in **Evry India Pvt ltd , Bangalore** from 02 Nov 2023 to 29 Aug 2025.

PROFESSIONAL EXPERIENCE

Project :

Client	: HMS
Role	: ETL Developer
Environment	: Informatica,DB2, Flat files, Unix
Duration	: 02 Nov 2023 to 29 Aug 2025

Description:

Project CAV is basically cost avoidance and verification. It is part of cost containment area where it handles Insurance cost reduction. It avoid unnecessary costs for different Insurance groups

Responsibilities:

- Extensively used Source Analyzer, Transformation Developer, Mapping Designer and Mapplet Designer to develop mappings.
- Extensively used Transformations like Expression, Filter, Joiner, Lookup, Source Qualifier, Router, Aggregator and Update Strategy transformations, Mapping Variables and Parameters, Sorter, Union,etc..
- Created Workflows, Sessions, worklets, Link Tasks, Control task, Assignment task, Command Tasks in Workflow Manager monitored the workflows using Workflow Monitor.
- Used designer debugger to test the data flow and fix the mappings.
- Designing & Developing the ETL mappings using Informatica Power Centre Designer as per the requirements.
- Data extraction from source systems, cleansing & transforming the data in staging and finally loading the data into Target schemas.
- Worked on Putty and Winscp Server.
- Involved in the deployment of code in QA and Production Environment.

- Performed efficient testing of the ETL mappings and the transformed & cleansed data in Dev and Test environments to match user requirements and data quality in warehouse
- Analysing the job running time and improving the performance.
- Involved in reviews, performance testing and Unit Testing..

Project:

Client	: Arrow Electronics (US)
Role	: ETL Development/Support
Environment	: Informatica, MS SQL Server, Flat files, Unix
Duration	: 09 Nov 2022 to 16 Oct 2023

Description:

Arrow's incredibly broad portfolio brings a unique vantage over the entire technology landscape to every conversation with every customer as we help them design, source, build and launch products that improve the quality of life for people around the world and make the benefits of innovation more accessible to all.

Responsibilities:

- Enhanced the Informatica Mappings as per Requirements.
- Monitoring the Workflows and fixed the issues and resolved.
- Created Mapplets and reusable transformations for code reusability in different requirements
- Created ETL and Data warehouse standards documents-Naming Standards, ETL methodologies and strategies, Standard input file formats, data cleansing and pre processing strategies
- Used various Transformations like Source Qualifier, Aggregator, Expression, Joiner, Filter, Lookup, Update Strategy , Transaction control Transformation, Rank, Union, Sorter, etc..
- Created the Workflows, Worklets, Sessions, Scheduling the Workflows.
- Effectively understood session error logs, used Debugger to test mapping, and fixed bugs in Dev in following change procedures and validation.
- Validating the mappings as per ETL specification.
- Worked on Putty and Winscp Server.
- Reviewed the mappings developed by other team members
- Developed the Informatica mappings based on requirements
- Involved in every task of the project.
- Implemented Pushdown Optimization and Partitioning to increase Performance.

Project:

Client	: Ameriprise Financial Services
Role	: ETL Development/Support
Environment	: Informatica, MS SQL Server, Oracle ,Flat files,Unix
Duration	: 11 Oct 2018 to 05 April 2022

Description:

MODE is single, consistent, Business validated data source of commonly used Business critical operational Master data used for operational analytical needs by the wealth management.

Responsibilities:

- Enhanced the Informatica Mappings as per Requirements.
- Extensively used transformations-Aggregator, Expression, Filter, Joiner, Lookup(connected and unconnected), Rank, Router, Sequence Generator, Sorter, and Union Transformations etc..
- Created the Workflows, Worklets, Sessions, Scheduling the Workflows.
- Implemented slowly changing dimensions to maintain Historical and updated data
- Designing the Mapplets, Reusable Transformations and documentation.
- Monitoring the Workflows and fixed the issues and resolved.
- Gathering and understanding the requirements and implement them into source to target mappings in landing, Staging, Intermediate and Target layers.
- Created mapping documents with detailed source to target transformation logic, Source data column information and target data column information
- Implementd Concurrent Execution of Workfkows to reduce load time.
- Implemented incremental loading, Created Dynamically Target files based on Data
- Validating the mappings as per ETL specification.
- Reviewed the mappings developed by other team members
- Developed the Informatica mappings based on requirements
- Extensively used Informatica Functions LTRIM,RTRIM,DECODE,ISNULL ,IIF, INSTR and Date functions in Transformations. Applied slowly changing Dimensions Type I and Type II on business requirements.
- Involved in every task of the project.
- Implemented Pushdown Optimization and Partitioning to increase Performance.
- Worked on **Putty** and **Winscp** Server.

DECLARATION

I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned particulars.
