## Summary

iOS Developer with 3+ years of experience in building scalable, user-centric mobile applications. Proficient in Swift, SwiftUI, UIKit, and third-party integrations. Skilled at building clean architecture, improving app performance, and enhancing user experiences through intuitive UI/UX design.

## Education

**BSc in Information Technology**, University of Mumbai CGPA: 7.4/10

## Experience

**Ascra Technologies (NSDL Payments Bank)**, iOS Developer Mumbai (June 2024 – May 2025)
- Developed and maintained the NSDL Payments Bank iOS application with a focus on secure transactions and smooth UX.
- Built custom SDKs for Account Opening and Card features across integrated partner apps.
- Integrated RESTful APIs with efficient data parsing and error handling.
- Implemented biometric authentication, OTP verification, secure storage, and certificate pinning.

**Watch Your Health**, iOS Developer Thane (Feb 2023 – Mar 2024)
- Developed healthcare apps using Swift and MVVM architecture.
- Integrated HealthKit and background data sync for vitals and fitness data.
- Collaborated across teams to ensure secure data handling.
- Built push notifications, custom UI components, and accessibility features.

**Image Online Pvt Ltd**, iOS Developer Mulund (Aug 2022 – Feb 2023)
- Upgraded Objective-C projects for iOS compatibility and performance.
- Integrated Razorpay for seamless in-app payments and subscriptions.
- Built a document scanner app with features like cropping, edge detection, and PDF generation.

**MISCOS Technologies**, iOS Developer Pune (Oct 2021 – Mar 2022)
- Developed an iOS app for secure visitor entry and digital access passes.
- Used camera, location services, and push notifications for real-time check-ins.
- Worked with REST APIs for real-time updates and authorization.

## Projects

**NSDL Jiffy**(Live on App Store)
- Contributed to a cross-platform finance app using Flutter, ensuring high performance across Android and iOS.
- Implemented secure login, onboarding flows, and payment modules with proper state management using Bloc.
- Integrated REST APIs and handled complex UI with custom widgets and adaptive layouts.

**NSDL Partners SDK**
- Designed and implemented an iOS SDK enabling NSDL partners to integrate account opening, KYC verification, and card issuance functionalities within their apps.
- Built secure API integration modules for onboarding, document upload, and e-sign processes with real-time validation and error handling.
- Ensured data security and compliance with regulatory standards (RBI, SEBI, NSDL), including encryption and secure session management.
- Developed modular, reusable components for digital forms, photo capture, and signature verification to ensure seamless partner integration.
- Collaborated with backend/API teams to align SDK contract and versioning for seamless partner onboarding.
- Built a configurable UI framework allowing partner apps to customize branding, color schemes, and flow navigation without modifying SDK core code.

**Care Health SDK**

- Designed and implemented an iOS SDK to track steps, sleep patterns, and health metrics using Apple HealthKit and Background Processing.
- Built modular, reusable components for step counting, sleep analysis, calorie estimation, and activity summaries to integrate seamlessly with multiple Care Health applications.
- Created detailed SDK documentation, integration guides, and sample apps for third-party developers to ensure easy adoption.

**Chola MS** (Live on App Store)

- Integrated push notifications and deep linking for personalized alerts and smooth navigation.
- Enhanced UI/UX using UIKit, Auto Layout, and adaptive design for iPhone.
- Ensured compliance with IRDAI regulations by implementing secure authentication (OAuth 2.0), data encryption, and API security measures.

**Happy You by Kotak** (Live on App Store)

- Integrated HealthKit for tracking user activity and vitals.
- Built interactive analytics with charts and personalized insights.
- Implemented push notifications and secure API handling.
- Integrated daily goals, activity leaderboard, and reward system to boost user participation.
- Implemented modular architecture (MVVM) for scalability and maintainability.
- real-time health data synchronization for a smooth user experience.

**Life Rewards by HDFC Life** (Live on App Store)

- Designed responsive layout using Auto Layout.
- Developed features for loyalty and rewards program, enabling users to earn, redeem, and track reward points for HDFC Life services.
- Implemented partner offers, vouchers, and personalized deals within the app using secure API integrations.
- Managed App Store submissions, version control, and release processes.

## Skills

**iOS Development:** Swift, SwiftUI, UIKit, Objective-C
**Flutter Development:** Dart, Flutter, State Management (Bloc), Custom Widgets
**Architecture:** MVVM, MVC
**APIs/SDKs:** RESTful APIs, Firebase, Alamofire, HealthKit, Razorpay
**UI/UX:** Auto Layout, Adaptive UI, Accessibility, Human Interface Guidelines
**Security:** SSL Pinning, Biometric Auth, Keychain, Encryption
**Tools:** Xcode, Git, GitHub, Bitbucket, Postman, Jira

## Technologies

**Languages:** Swift,Dart, Objective-C, Java, JavaScript, HTML, CSS
**Tools/Platforms:** Xcode, Postman, GitHub, Figma, Jira, Firebase, TestFlight
