Name : Kalyankar Sharath Chandra
Mail Id : sharathchandra.kalyankar@gmail.com
Mob No : 9538608898

Professional Summary:

- Having 5 years of IT experience in developing Web and Enterprise Application using Java/J2EE, spring boot , Spring Data JPA, Restful web services and Microservice.
- Expertise working with Design Patterns like - Singleton, Session Facade,DAO, DTO, MVC and Business Delegate, Factory Pattern.
- Working experience in windows, Linux and UNIX operating system.
- Good experience in Microservices,Spring,Spring boot,Hibernate,JPA and Frameworks.
- Solid foundation in software programming concepts of OOPS,Exception Handling,Collections & Multithreading.
- Having Java based design patterns like MVC, Business Delegate,DAO,DTO/VO,Factory.
- Experience in writing Maven building scripts and configuring and using Log4j, writing J Unit test cases.
- Successful in resolving issues involved in development of the onshore-offshore model.
- Experience in working with front-end technologies like JSP, HTML,Javascript,CSS,JDBC,Jquery,Angular,React JS.
- Experience with iterative software development methodologies like Agile.
- Experience with multiple Servers like Apache Tomcat, Web Sphere, Web Logic.
- Ability to successfully lead and manage complex and projects in a challenging environment by consistently applying various project techniques.
- Possesses excellent communication skills, analytic problem solving, leading and learning skills as well as a keen interest in emerging technologies, excellent team player.

Educational Qualifications:

- **B.Com** from **Avanthi Degree college,Osmania University.**

Technical Proficiency:

Language	Java
Frame works	Spring,Microservices,Spring boot,Hibernate,JPA
Frame work Modules	Spring MVC,Spring ORM,Spring Security
Web Technologies	HTML,CSS,Java Script,Angular,React JS,Node JS
Build Tools	Maven,Jenkins
IDE	Eclipse,IntelliJ
Web Server	Tomcat, Web Sphere
Database	SQL,PostgreSQL
API Tool	Postman,SoapUI
Version Control	Git hub,Bit bucket
Other Tools	Jira,Postman,Junit,Multithreading,Kubernetes,Kafka

Project Details:

Project-1: Sept 2024 to Till date.

Project Name : Operational Data Store
Client : American International

Description:

The Operational Data Store (ODS) is a consolidation hub for regions that holds atomic level transactions relating to the Policy and Claims domains. The ODS also holds related Party and Object (e.g. Vehicle, Vessel) data as well as a common set of reference data. This allows each application to publish and subscribe to data from other aligned applications via a single standardized interface, versus customized interfaces to each other application.

Responsibilities:

- Develop reusable, modular, and scalable backend components using JavaApply object-oriented programming (OOP) principles, design patterns and best practices in clean code.

- Design and implement RESTful APIs using Spring Boot.
- Break down monolithic functionality into independent microservices.
- Implement API versioning, rate limiting, and gateway routing using Spring Cloud Gateway.
- Involved in the designing of activities.
- Involved to implement the restful web services.
- Writing the Business logic for a given activity.
- Implemented hibernate components.
- Participated onsite discussion for the requirement gathering .
- Doing the Code reviews.
- Test the Developer test cases and doing the unit testing.
- Coordinated the Onsite, Offshore teams for Requirements, development, deployment and delivery.
- Working with Agile methodology using Jira tool.

Environment :
Java,Spring,Spring boot,Microservices
Hibernate,Angular,Nodes JS,IntelliJ,Maven
Jenkins,Jira,Tomcat,Multithreading,AWS,Rest API
Bit bucket,Spring Security,PostgreSQL,Postman.

Project-2: June 2023 to Aug 2024

Project Name : Banking and Finance services Data Lake
Client : United Overseas Bank(UOB)

Description:
This bank is involved in amounts for various purposes like Personal Loan, Vehicle Loan, Housing Loan, Consumer Durable Loans, etc. The company requires different levels of analysis regarding loan amount, type of customers' type of payment schedules, interest rates, defaulters list and the penal interest calculations, etc.The data warehouse, basically it is a Data Mart as it covers only one domain of the business and captures data from their Historical Database.
This system is required to extract, transform, and load data from the different client systems into a relational table environment that can be accessible for reporting purposes. A set of reports will be developed against the relational tables to deliver the information to its customers in the form of PDF files. The data from the different systems will be extracted into a set of text-based and Graphical reports.

Responsibilities:
- Involved in developing Controllers using Spring ORM.
- Implementation of Web Pages in JSP using Javascript for validations.
- Implementation of Web Pages using JSP and HTML.
- Implement the code as per design and developed business logic.
- Develop the site and integrate the dynamic pages with the static designs.
- Used Spring Framework for Dependency injection.
- Implementation of Web Pages in JSP using Spring Form Tag Library.
- Involved in developing JSP forms and navigation using View Resolver.
- Used Spring Hibernate for Querying data from the database.

Environment :
Java,Spring,HTML,CSS,Javascript,Spring ORM
JSP,Angular,Docker,AWS,GIT,Eclipse
Hibernate,Visual Studio,Boot strap,Junit,SQL.

Project-3: Sept 2020 to May 2023

Project Name : Well Point OLS
Client : Well Point

Description:
Well Point is the largest managed health care for Profit Company Blue Cross and Blue Shield Association. Health care is changing and Well Point is leading the way to help improve the system, make health care easier for consumers to access and use, and improve the health of the people we serve. INTACT is a tool to key-in to the application. This is to develop the online applications for the forms which are already submitted by the business users in paper forms. This application is accessible through SQL tool by invoking INTACT URL. SQL will pass the required parameters like brand, state, application type, requested Effdate, user Id, agent Id, parent Agent Id and resolution. SQL will invoke INTACT URL with “ACN’’ – Application Control Number..

Responsibilities:
- Implementing on Spring Boot and Microservices.
- Getting the Requirements from the requirement analysis and Bug Tracking tool JIRA.

- Implementing on Spring Data JPA and Restful web services.
- Wrote JUnit test cases to ensure the reliability and accuracy of the system.
- Implementing written Service and Repository interface along with their implementations.
- Injected the Repository into service classes using Spring IOC pattern.

Environment :

Java,Spring,Algorithms,Spring boot,Microservices
React JS,Kafka,Collections,JPA,Junit,GIT,Rest API,Eclipse
Kubernetes,Tomcat,Maven,Jenkins,Jira,Postman,SQL.

Employeer:

- **| Software Engineer | Persistent System | Sept 2024 to Till date |**
- **| Software Engineer | Franklin Templeton International Service | June 2023 to Aug 2024 |**
- **| Associate Software Engineer | Virtusa Consulting | Sept 2020 to May 2023 |**
