LATHEESH KUMAR MANGALA

Mobile: 8074311629

E-mail: latheeshkumar786@gmail.com

Synopsis

- A competent professional with over 5 years of rich cultural experience in Information Technology **(Software Engineering)** under **Telecom Domain.**
- Worked with **LG Soft India Pvt. Ltd., Bangalore** as **Software Application Developer**
- Well versed with **C, C++ & Data structures, UNIX, LINUX, SDLC & MDLC Process of Software Development, GSM Architecture, Call Control, Supplementary service, PDK 3GPP & TCP IP protocols, WISE (Wireless Interoperable Software Environment) IDE**
- Undertaken the projects - **Call Control and I-Mailer for NTT DoCoMo**
- Ability to manage and complete projects to the highest standards meticulously and within specified deadlines of the work. Possess good communication and presentation skills.

Organizational Forte

LG Soft India Pvt. Ltd., Bangalore
Software Engineer

Projects Undertaken:

1

Project Name:	Call Control
Client:	LG Electronics, South Korea
Duration:	June'21 to Present
Team:	20
Tools:	C, C++, Windows, LINUX(Ubuntu), Mobile Analyzer, Clear case, QT/QML
Characterization:	Call control module is the part of LG soft WISE Mobile Software development. This project is aimed at implementation of basic MO/MT, Conference calls and Transfer calls on new LG Mobile phone based on AGR Engine layer using the BAL interface. The application communicates with Lgoem Layer Call Control module through function call back Interface and the application will generate the events related to call control depending upon the user input/ keys and that event is routed to lgoem layer. The Lgoem layers handles request messages related to the calling functionality and translates it to corresponding lgoem layer events and passes it to AGR Engine Layer through BAL interface. The response also will come through BAL to lgoem layer and Lgoem layer will pass the corresponding events to application.
Accountability:	Establishing the call, supplementary services and STK modules to support the basic call functionality and basic supplementary services along with developing framework for Unit Testing setup to complete the API testing through Simulator. Adhering to LG's quality process and involving in all phases of Mobile Development Life Cycle like Coding, Debugging &Testing, Delivery and Running Change. Interconnecting with the FTE (Field Engineers) to understand the Customer's requirement and executing the same in the handset.

2.

Project Name:	I-Mailer for NTT DoCoMo
Client:	LG Electronics, South Korea
Designation:	Team Member
Duration:	Jun'13 to Nov'15
Team:	8

Tools: C, C++, UNIX (Ubuntu/ VM Ware Workstation), OpenGL (Graphics Library), **GLUI (GL User Interface), GLUT (GL Utility Tool Kit**) & Embedded AWS and Arm 9

Characterization: I Mail is E-Mail client in mobile for NTT DoCoMo with special XHTML features with the I Mode Technology. This project aimed at retrieving various types of mails (I Mail, Message R/F), sends and manages mails in mobile. It supports rules to move mails into appropriate folders, depending upon email address or specified subject. It helps in sending/Receiving SMS from SMSC and supports user acquisition type of attachments. It supports in interacting with other modules for supporting features like File Manager, Image Viewer, Media Player, Call modules, etc. and consist of predefined Header, Footer, Quotation and template mails.

Accountability: Responsible for the porting of the I Mailer Solution components on Android platform along with taking care of the performance matrix for different Mailer components which needs to be in sync with existing solution on WISE. I am accountable for building Open-source shared libraries like OpenGL. I am porting AWS (Abstract Windowing System) or Mobile User Interface part using **OpenGL(GraphicsLibrary),GLUI(GL User Interface)**,**GLUT**(GL Utility Toolkit) etc.

3. **Project Name:** I-Mailer for NTT DoCoMo
Client: LG Electronics, South Korea
Designation: Team Member
Duration: May'11 to Apr'13
Team: 15
Tools: C, Windows, QXDM, Mobile Analyzer, Genie, IBM-Rational Suite Enterprise 2003 (Rational Administrator, Rational Robot, Rational Test Manager), Weiss Server, Clear Case,3GPP (31.124, 51.010-4) L708i or L-04A/06A Handsets etc.

Characterization: I Mail is an E-Mail client in mobile for NTT DoCoMo with special XHTML features with the I Mode Technology. I Mail Client retrieve various types of mails (I Mail, Message R/F), send and manage mails in mobile. This project aimed at supporting rules to move mails into appropriate folders, depending upon email address or specified subject. It helps in sending/Receiving SMS from SMSC and supports user acquisition type of attachments. It supports in interacting with other modules for supporting features like File Manager, Image Viewer, Media Player, Call modules, etc. and consist of predefined Header, Footer, Quotation and template mails.

Accountability: Accountable for functional, integration and system testing activities along with performing positive and negative testing of the application for the identification of bugs after fixing of errors in each subsequent build during of Mobile Development Life Cycle like Coding,Socket programming with TCP/IP protocols,Debugging &Testing, Delivery and Running Change.

Notable Attainments

- Successfully fixed some very high priority issues found during the system test and have fixed them in scheduled time and was highly appreciated for the same.
- Effectively performed manual testing on Mobile Phones, analyze defects, developed defect reports and tracked status along with managed and controlled the Test Cases, Test Scripts and Test Results using Rational Test Manager.
- Commendably porting Embedded AWS using Open source imLib2 library.

Academic Credentials

2010 **PG Diploma (Embedded System Design)** from Cranes Varsity, Bangalore.

2009 **B.Tech (Electronics and Communication Engineering)** from J.N.T.U, Hyderabad. **1 st Division**.

2004 **12th (Math's, Physics, Chemistry**) from S.P Gowtham Junior College, A.P (Board of Intermediate Education) **1st Division**.

2002 **10th** from Sathya Sai Z.P High School, A.P (Board of Secondary Education) **1 st Division**

Accolades

- Successfully completed **IIIT-B** Certification Course on WLAN, WIFI & TCP/IP Protocols.
- Received Snap Award during Commercialization of L708i Mobile Handsets for presenting Extraordinary Commitment, Ownership and Team Spirit.
- Bagged Snap Award during Commercialization ETNA+ Mobile Handset for screening Extraordinary Commitment, Ownership and Team Spirit.

IT Skills

Operating Systems:	Windows, UNIX, LINUX-UBUNTU
Programming Languages:	C,C++ 2011/14/17 versions
Database:	SQL, MySQL
IDEs:	SDK/PDK,WISE,DevC++,VisualStudio
Configuration Management:	Clear case
Compliers:	RVCT
Debuggers:	Mobile Analyzer, QXDM, GDB
Protocols:	GSM/4G/5G Protocols, 3GPP (31.124, 51.010-4), TCP/IP, 802.11 std.
HW interface:	USB

Personal Snippets

Date of Birth:	1stJuly1989
Address:	D. No 101, Yeshwantpur, Bengaluru - 560022, Karnataka.
