EDUCATION

Master of Computer Application
GALGOTIAS UNIVERSITY
GREATER NOIDA (U.P) **2021 - 2023**

Bachelor of Computer Science
GALGOTIAS UNIVERSITY
GREATER NOIDA (U.P) **2017 - 2020**

SKILLS TECHNICAL

- Java/Kotlin
- Rest API
- MVVM
- FireBase
- Retrofit
- Gitlab
- Coroutine
- Clean Architecture
- JSON
- Postman /Swagger
- SQLite
- Hilt/Dagger
- Unit testing
- Strip

PROFILE

Highly skilled Android developer with 2.8years of experience designing and building robust, user-friendly applications for the Android platform. Strong expertise in User interface (UI) design and development, Application architecture and design patterns (e.g. MVP, MVVM)Integrating with RESTful APIs and third-party libraries. Committed to staying up to date with the latest technologies and best practices.

WORK EXPERIENCE

- **RipenApps Technologies** — DEC 2022 - SEP 2024
  Android Developer
- **Brancosoft, Noida** — DEC 2024 - SEP 2025
  Android Developer

PROJECTS

1. CargoMe Transport App (published) — JAVA

- Rider and Driver Transport App Development
- Developed a robust transport application connecting riders with drivers for efficient goods delivery, focusing on real-time logistics.
- Utilized Firebase for crash analytics and push notifications
- Implemented sockets for live location tracking, enabling users to receive accurate updates on delivery status.
- Integrated Google Maps for route navigation and optimization, enhancing the overall experience for both drivers and shippers.
- Successfully published the app on the Google Play Store

2. Servivet:- E commerce app (Published) — KOTLIN

- Developed a robust e-commerce application using MVVM pattern to enhance code maintainability and scalability.
- Integrated Paystack for seamless payment processing, ensuring secure transactions.
- Collaborated in design and development to deliver a high-quality user experience

3. Chephalgo:- IOT-based (published) — KOTLIN

- Implemented clean architecture and the MVVM pattern to ensure maintainability and scalability of the codebase
- Created a user-friendly interface that enables doctors to access and analyze patients' EEG data and emotional states remotely
- Collaborated with healthcare professionals to refine features and improve user experience, focusing on accurate emotion detection and analysis.

PROJECTS

4. Home HuntAR :- Real-state, implemented AR

KOTLIN

- Developed an augmented reality application with clean architecture and the MVVM pattern that allows users to search for properties and view available listings in their surroundings.
- The app offers 3D visualizations of property via AR
- integrate RESTful APIs and third-party libraries and social login.
- The app includes in-app purchase options, allowing users to unlock premium features for enhanced functionality.
- Implemented Google Ads to enhance monetization and drive user acquisition.

5 . Zendo Application

KOTLIN

- Technologies: ML Kit, Firebase (Authentication, Firestore, Cloud Messaging), WorkManager, AI Image Generation, Android (Kotlin/Java)
- Developed an AI-based application to detect whether a given image is of a room using ML Kit's object detection.
- Integrated AI image generation to virtually place furniture, enhancing interior design visualization.
- Utilized WorkManager for efficient image processing, object detection, and handling asynchronous tasks.
- Implemented Firebase Authentication and Firestore for social login and real-time chat, enabling seamless user interaction.
- Integrated push notifications using Firebase Cloud Messaging (FCM) to enhance user engagement with real-time updates.

6 . Rontomsongh Application.

KOTLIN

- Rontomsongh is a modern eCommerce platform built to cater to fashion-forward individuals in Ghana and the USA. Powered by Shopify, the platform offers a seamless shopping experience with a curated selection of trendy and high-quality clothing and accessories.
- The platform supports secure and convenient payments through Paystack for Ghana-based customers (including mobile money and local cards), and Stripe for international customers, especially those in the USA. With a focus on style, accessibility, and user experience, Rontomsongh bridges local fashion with global shopping standards

7. Adhyatmah :- E commerce app (Published)

KOTLIN

- Adhyatmah Bharat is an Indian-based eCommerce platform focused on spiritual products, holistic wellness, and traditional Indian lifestyles. Tailored for users in India, it offers curated items such as puja kits, Ayurvedic products, spiritual books, and handcrafted items from local artisans. Built for a seamless user experience, Adhyatmah Bharat prioritizes regional accessibility and secure payments through Razorpay, supporting UPI, cards, NetBanking, and popular Indian wallets.
