SATISH KAMAL G

Senior Jira Administrator

E-mail: satish.garimella019@gmail.com,

Mobile: +(91) - 9380116699.

IT PROFESSIONAL:

Having 7 years of IT experience in

- Atlassian
  - JIRA Software
  - Confluence
  - Jira Align
  - Jira Service Desk/ JSM
  - Bit bucket
  - Bamboo - Development, Administration and Integration
- Groovy, Shell, Python Programming
- Automation Rules
- 24/7 Support
- Migration from Server to Data Center/ DR
- Migration from Data Center to Atlassian Cloud
- Oracle, MySQL, MS SQL Server and Oracle
- ITIL V3.0 Certified
- Atlassian Data Center and Digester Recovery Configuration in AWS

PROFESSIONAL SUMMARY:

JIRA

- Created JIRA workflows including advanced workflows with Post-functions, Conditions, Validators and Triggers.
- JIRA customization - Issue Schemes, Workflow Schemes, Screen Schemes, Field Configuration Schemes, Permission Schemes, Notification Schemes.
- Manage users & groups – add and invite users through AD, LDAP and CROWD.
- Performed JIRA Re-Indexing and Integrity checker.
- Used built in Add-on's as well as third party add-on's for extending the functionality of the tool.
- Prepared Groovy & Shell Scripts.
- Good hands on in writing JQL queries and filters for JIRA.
- Very good exposure in Agile Boards – Scrum and Kanban project implementation, Epics, Stories and bug. Configured columns, Filters and reports for sprints.
- Created events, email notification schemes and assigned project roles on JIRA.
- Worked on generating reports for senior management on JIRA using gadgets.
- Profound in JIRA Service Desk/ Tickets.
- Hands on customization of SLA s and calendar for projects.
- Good exposure in projects export and imports and merged different environments into single Integrated JIRA with Single Sign-on (SSO) plug-in.

CONFLUENCE

- Created and restricted spaces, templates, layouts for the users and groups
- Managed space permissions and global permissions for the users
- Participated in Version and license up-gradation with the team
- Organized master and branches pages' well
- Implemented Macros/ User Defined Macros
- Had good knowledge in database clustering and taking the Jira, Confluence DB backup's

CROWD

- I have good experience in creation of users, groups and directories and their access permissions
- Integrated with other atlassian products like Jira, Confluence, etc., and synchronized the users along with the groups.
- Managed Audit log timely.

GIT & BITBUCKET

- Extensively worked with GIT in Creating the repositories.
- Good at integrating GIT to Bit-Bucket repositories, Creating the projects and cloning the repositories.
- Have good knowledge in handling multiple repositories with fork, Merging of repositories, Creation of hooks and web-hooks.

BAMBOO

- Done the CI/CD pipelines for code deployment using Atlassian bamboo with different types of triggers.
- Integrated the bamboo jobs with APACHE Products like ANT and MAVEN.
- Installed the ANT & MAVEN and linked with bamboo for deployment successfully.
- Processed the Release management process and linked the bamboo with JIRA issues.

- Configuring the Global Permissions, User, Group and Anonymous Permissions.
- Managed the local and remote agents while deployment.
- Experienced in Client Focused Environment.

JENKINS

- I have Configured the global tools and its management for CI/ CD implementation.
- Linked with GIT, GITHUB, Bit-Bucket repositories for its deployment.
- Created users and given permission access throughout the application tool.

ACADEMICS:

- Bachelor of Technology.

TECHNICAL PROFICIENCIES:

Tools	JIRA, JIRA Agile, Jira Align, Crowd, Jira Service Management (JSD), Confluence, Bit bucket, and Bamboo.
Operating Systems	UNIX, Centos, Linux and Windows.
Databases	Oracle12C/19C, MySQL 5.7/8.0, MS SQL Server 2013 and Postgre SQL.
Application Servers	JBOSS, WebLogic & Apache Tomcat.
Documentation Tools	MS Office 2016, Share Point and Confluence.
Cloud	AWS-EC2 and Atlassian Cloud.

WORK EXPERIENCE:

- Working as, a Senior Jira Administrator with GRAY RADIANT DATA SERVICES PVT LTD, Since May 2023 to till date.
- Worked as, a Senior Jira Administrator with UST GLOBAL SOLUTIONS, Bengaluru. Since Feb 2021 to Apr 2023.
- Worked as, a Jira Administrator with REIGNS INFO TECH PVT LTD, Bengaluru. Since Sept 2018 to Jan 2021.

PROJECT DETAILS:

PROJECT #1:

Project	:	S & P Global
Duration	:	May 2023 to till Date
Role	:	Sr. Jira Administrator
Operating System	:	AWS/Linux/DC & DR/Atlassian Cloud
Tools/Software's	:	Jira Align, Jira Software, JSM, Confluence, GitHub, MySQL/Oracle, ITIL management

Roles and Responsibilities:

- Creation of Jira Projects based on user request.
- Cloning the Jira Projects
- Integrated Jira Software with Jira Align
- Migrated the data from Jira Data Center to Atlassian Cloud
- 24/7 support
- REST API, Groovy and Python Scripts preparation
- Migrated the Jira, JSM, Confluence data from Server & DC to Atlassian Cloud
- Bulk Import of issues through CSV files into Jira projects.
- Maintain Documentation about new releases and best practices for both users and team.
- Mentored several users/Teams in the usage of Jira Agile.
- Evaluated existing JIRA instance and resolved performance issues.
- Installed and managed plug-ins for JIRA like EazyBI, nfeed, Zephyr for JIRA, Automation for JIRA, Template Epic cloner, Project Configurator, Action for JIRA Service desk, Cannon responses
- Lead and provided training to end users.
- Created JQL scripts to access JIRA issue content to create customized JIRA queries, filters, ports, agile board content, both scrum and Kanban system and project dashboards.
- Weekly and daily status calls with Agility Team.
- Supporting complex Atlassian environments and have experience with integrating Atlassian tools with other internal & external systems.
- Addressed user questions and develop training as needed, worked on incoming questions and inquiries related to JIRA applications.
- Created Projects, Issues and Custom Fields in JIRA using REST API programs.
- Managed build results in Jenkins and deployed using workflows.

- Users Administration and Handling Licenses Performed JIRA configuration.
- Re-indexing Jira on timely basis
- Creating spaces in Confluence
- Providing privileges to the users
- Creation of new Jira users and Jira groups
- Implementing Jira workflows using advanced features such as Post functions, Conditions and Validators
- Experience in configuring Field configurations, Notification schemes, Screen Schemes, Permission Schemes in Jira Projects
- Creating Jira Service Desk projects, Custom fields, Issue Types and screens for Customer portals
- Configure the Customer Portal, request types, queues, SLA metrics and automation.
- Installing plug-ins and maintaining the licenses
- Troubleshooting the problems in Jira
- Linking GIT Repositories to Fisheye Projects
- Creating and managing filters.
- Managing Groups and Role management based on projects.
- Prioritizing workload and resolving tickets based on Service Level Agreements
- Integration of Jira with other applications using plug-ins
- Importing bulk issues into Jira Projects using CSV files
- Migrating Jira Service Desk project
- Restarting Jira, performance monitoring of Jira instances and checking log and backup files
- Managing Users in Crowd Directories
- Troubleshooting user queries on Jira, Confluence, Fisheye and Crucible applications
- Worked on JIRA customization - Issue Schemes, Workflow Schemes, Field Configuration Schemes, Screen Schemes, Permission Schemes, and Notification Schemes.
- Integrated GIT into Jenkins to automate the code checkout process.
- Extensively worked on UNIX Editor Commands to edit the logs.
- Installed and managed plug-ins for JIRA and confluence in production environment.
- Worked with various teams on setting new JIRA & Confluence instances for new teams.
- Worked on integrating (migrating) JIRA with Confluence, Fisheye and Crucible.
- Generated scripts for effective integration of JIRA applications with other tools.
- Conducted analysis and evaluation of existing systems to upgrade latest version.
- Created custom templates for use within Confluence.
- Used JIRA Connector for the integration of Service Now and Share Point with JIRA.
- Created search bar to custom to perform text-based searches for different groups.
- Added Valuators, post-functions, conditions on required transitions when requested by users.
- Added Validators such as permission validators to restrict users for a specific transition, added conditions made few fields mandatory on required transitions.

PROJECT #2:

Project	:	PLM, EWIS – FLAMM
Duration	:	Feb2021 to Apr2023
Role	:	Sr. Jira Administrator Operating
System	:	AWS/Linux/DC & DR
Operating System	:	AWS/Linux/DC & DR/Atlassian Cloud
Tools/Software's	:	JSD 4.5, Jira Agile 8.5.4, Confluence, Git, MySQL, Fisheye &Crucible, ITIL management

Roles and Responsibilities:

- Worked in 24/7 Production support
- Create complex JIRA workflows including project workflows, Field Configurations, Screen schemes, Permission schemes and Notification schemes.
- I have very good exposure in Jira, Confluence, Crowd installation configuration, up gradation, migration from Windows to Linux environment.
- Good Exposure in implementation of Work flows, Screens, Custom Variables and Post functions in Work flows.
- I have upgraded from Jira 7.10.4 to 8.5.4
- I have upgraded from Jira 8.5.4 to 8.20/9.2
- Migrated from Oracle Database to MY SQL Server
- Implemented post functions in advance workflows.
- Good Exposure in Dash and Scrum boards implementation.
- Implemented Single Sign-on implementation – SSO.
- Ability to work in a team and Independent.
- Prepared REST API calls
- I have prepared various Groovy and Shell Scripts
- Dash boards Creation, Custom fields creation

- Creating Spaces, providing Confluence user access and roles
- Workflows & Advance Workflows, Screens Developments.
- Helping Scrum master across the company to customize JIRA for their requirements.
- Work closely with stakeholders to successfully complete IT infrastructure projects.
- Take the overall responsibility for the Jira configuration and be the go-to person for any Jira issues, enhancements or best practice question.
- Serve as a technical advisor and the primary implementer for new capabilities in JIRA.
- Create team specific agile process flow in JIRA to move tasks from one activity to another.
- Installation and configuration of continuous Integration servers.
- Create customized dashboards for teams.
- Developing confluence pages.
- Provide support for the application and infrastructure including troubleshooting, performance tuning.
- Integrate User with Microsoft Active Directory.
- Worked on Build Automation and Continuous Integration tools like ANT1.8, Maven2.x/3.x, Jenkins, Bamboo and Fisheye & Crucible.
- Worked on most of the add-on like Structure, Tempo Folio, Jira Workflow Toolbox, Zephyr, Jira Suit Utilities, and Links Hierarchy for JIRA and Agile. Portfolio, Quick, Multi-Level Cascading sheet and Quick.
- Responsible for working on a queue of JIRA tickets to address system issues, user requests, etc. on a daily basis.
- Very Good Knowledge in Agile Boards – scrum and Kanban project implementation, Epics, Stories and bug. Configured columns, boards, Filters and reports for sprints.
- Performed application and system administration tasks including data backups.
- Created users on Jira Internal Directory, LDAP, Crowd and Active Directory.
- Up gradation, Migration and Fine tuning of Jira/Confluence instance.
- Integrating JIRA with single sign-on (SSO –SAML) plugins.
- Implemented Bulk Operations, Issue import and exports, JIRA Re-Indexing and Integrity checker.
- Maintained build scripts for the application builds, Compiled and generated the packages and push it to Windows, and Linux platforms.
- Configured GIT and GitHub for Bamboo and Bit bucket.
- Taken backups of various systems including Atlassian tools and restore at various environments.
- Upgraded Jira, Confluence, Bit bucket and Bamboo from Lower versions to higher versions.
- Merge & Migrated Jira, Confluence, Bit bucket and Bamboo from Windows to Linux and Cloud.
- Installed Bit bucket for code review. Also, configured various Repositories into Bit bucket.
- I have created Bamboo projects, jobs, plans, releases, versions and deployed at various environments.
- Implemented Continuous Integration [CI] & Continuous Deployment [CD] using Jenkins and Bamboo
- Configured Master and Slave for Jenkins to maintain the load balancing.
- Installed various add-on for Jenkins and Bamboo for Builds.
- Basic scripting knowledge using shell and Groovy script.
- Excellent knowledge and working experience in Requirement Analysis, Test planning, Effort Estimation, Test Design, Test execution, Defect Management & Test Metrics/ Status report preparation

Environment: JIRA, Confluence, JSD/JSM, AWS, Linux, Bit bucket, Git/ GitHub, Bamboo, Jenkins, Docker and MySQL 5.7

PROJECT #3:

Project	:	P&G
Duration	:	Sep2019 to Jan2020
Role	:	Jira/ Confluence Administrator Operating
System	:	Linux
Tools/Software's	:	Jira, JSD, Confluence, Bit bucket & Bamboo

Description: The Procter & Gamble Company (P&G) is an American multinational consumer goods corporation headquartered in Cincinnati, Ohio, founded in 1837 by William Procter and James Gamble. It specializes in a wide range of personal health/consumer health, personal care and hygiene products; these products are organized into several segments including beauty; grooming; health care; fabric and home care; and baby, feminine, and family care. Roles and Responsibilities:

- Creation of new Jira Projects
- Responsible for creating new users and groups in Jira
- Managing Issue type screens
- Create comprehensive JIRA workflows including project workflows, screen schemes, permission schemes, notification schemes etc.
- JIRA project management.

- Creation of new Jira users and Jira groups
- Creating Spaces, providing Confluence user access and roles
- Cloning the Jira Projects.
- Implemented and connected with AD to maintain the users
- Maintaining Jira issue types with specified Custom fields
- Managing issue type screens
- Managing Groups and Role management.
- Customized JIRA Configurations based on project level requirements.
- Perform Jira Re-indexing and Integrity Checker.
- Managing Users and Groups permissions.
- Preparing Documents.
- Managing Add-on
- Providing Project level and plan based permissions.
- Responsible for creation of custom workflows
- Managing Jira – Issue Types with specified custom fields
- Providing permissions to the users for Confluence Wiki Pages
- Resolving tickets based on SLA (Service Level Agreement)
- Managed Users on AD.
- Enhanced JIRA application to customize as required.
- Troubleshooter any JIRA issues for users.
- Created events, email notification schemes and assigned project roles on JIRA.
- Worked on confluence- Assigned user personal space and provided assistance in using Confluence.
- Responsible for maintaining integrity of all builds and environments.
- Performed code freeze on the development branches and informed the development teams to merge in the changes to integration branch before the scheduled date of staging.
- Installed various Jira plugins such as Jira client, Jira importer plugin, Jira Charting Plugin, the connector for Microsoft project and Jira Misc.
- Created development and integration Branches after a major release for various development teams.
- Worked with JIRA Service Desk 3.0.x to set up service desk, create service desk request types, and make queues for service desk teams and Setup Jira Service Desk Portals for help desk and other teams.
- Mentored several users/Teams in the usage of Jira/Jira Agile and Evaluated existing JIRA instance and resolved performance issues.
- Maintained JIRA team Confluence System Engineering pages that included: Process Flow Management, Team Requirements, Roles and Responsibilities.
- Data Management: DB configuration, Site backup, configuration of attachments, Data import and Export.
- Helping Scrum master across the company to customize JIRA for their requirements.
- Prepared projects, dashboards, reports and questions for all JIRA related services.
- Providing required permissions to the users based on the request.

Environment: JIRA, MS SQL Server 2013, Linux, Jira Service Desk, REST API, Groovy Scripting, Bit bucket, SVN, GIT/GITHUB, Bamboo, Jenkins and AWS
