WORK EXPERIENCE

Altimetrik Pvt Ltd JAN 2022 - PRESENT

Salesforce Developer

Project Domain: Online learning platform & Unified Certification System (Service, Certification, and Credentials)

Description: Trailhead is a platform that offers multi-week learning programs, combining self-paced content with live sessions led by Salesforce Certified Instructors, designed to help and accelerate the Salesforce learning journey. In addition to learning programs, the platform facilitates exam booking, scheduling, and support services. UCS extends this by managing the certification lifecycle – including exam registration, cancellation, transcript generation, topic score emails, TBID deactivation, and role/product-based certifications – ensuring a seamless certification process.

- Functionality wise R&D and development of features requirement.
- Development and Scenario based Logic creation in the LWC component. Make a stable platform for learners and instructors.
- Developed Apex classes, Batch classes, future methods, and triggers.
- Scenario based UI modification on the lightning component using JS Utils.
- Creates test step documentation. Testing the features by unit testing and bulk Testing.
- Implementation of service cloud for support.
- Implementation of knowledge article.
- Creates custom objects and fields with relationships as per the data model.
- Creating page Layouts, Validation rules, record types, and reports.
- Configuration (Flow, Process builder, Security Model, Report, Dashboard).
- OWD, Sharing Rule, Manual Sharing, Permission Set, Profile, User, Custom permission, Public group
- Set Custom Setting and Custom Metadata.
- Connect salesforce with external REST APIs and named credentials, facilitating automated data exchange.

Stetig Consulting Pvt Ltd JAN 2020 - JAN 2022

Salesforce Developer

1. **Project Domain:** Real Estate (Sales & Service)

Description: Worked on a Real Estate Management application built on Salesforce to streamline property listings, customer inquiries, agent assignments, quotation & approval workflows, and deal closures. The system provided 360° visibility of real estate operations, including Service Management, improving customer engagement, sales tracking, and post-sales support.

- Developed custom Apex classes, triggers, and batch processes for handling property availability, lead allocation, quotation generation, approval workflow, and deal status updates.
- Built Lightning Web Components (LWC) to display property details, flat & price listings, availability, inquiry forms, and quotation builder with responsive UI.
- Automated business processes using Flows for customer inquiries, booking confirmations, lead to opportunity conversion, quotation approvals, and follow-up tasks.
- Integrated Salesforce with third-party systems (e.g., SAP ERP for Sales Order generation and property valuation APIs) for seamless transactions.
- Designed custom objects & fields for properties, bookings, agents, quotations, products, assets, and customer interactions.
- Implemented role-based sharing rules and permission sets for brokers, buyers, and admin users.
- Created reports and dashboards for sales tracking, revenue forecasting, property occupancy insights, and sales commission management.
- Enhanced system performance and data accuracy by writing test classes with 85%+ coverage.

Key Achievements:

- Reduced property booking turnaround time by 30% with automated workflows.
- Improved customer engagement by developing an interactive property search LWC with filters and flat & price listings.
- Automated quotation approvals and real-time syncing with SAP ERP for Sales Order generation.
- Enabled Service Cloud for post-sale case management and enhanced customer satisfaction.
- Implemented commission management for sales teams with automated calculations and dashboards.

2. **Project Domain:** Manufacturing and Sales

Description: Tata Solar Power company manufactures and sales the solar modules, solar cells, and other solar products, and provides services for solar power projects.

- Requirement gathering, Analysis and Solution Design
- SOAP API integration with SAP for sending opportunity data.
- REST API integration with SAP
- Custom Email to Lead, SMS to Lead, SMS integration with SFDC
- Developed Lightning Aura components and Visual Force pages with standard and custom controllers.
- Worked in the Salesforce Community cloud and built the sites to engage with customers and partners.
- Used validation rules, workflow rules, process builder, standard web to lead, Email alerts, email templates
- Reports & dashboards.

SKILL SET

S**alesforce Platform Expertise:**

- Sales, Service, and Experience Cloud Implementations
  - Deep understanding and hands-on experience with core Salesforce clouds

Development and Customization:

- Apex Programming
  - Proficient in writing Apex classes, triggers, batch Apex, and scheduled Apex

- **Visualforce Development**
  - Skilled in creating Visualforce pages, custom controllers, and components
- **Lightning Component Framework**
  - Expertise in building Lightning Web Components (LWC) and Aura components
  - Proficient with the Salesforce Lightning Design System (SLDS)

Declarative Development:
- Configuration and Customization
  - Proficient in using Salesforce's declarative features such as Process Builder, Flows, Validation Rules, and Workflow Rules
- Data Modeling
  - Experienced in creating and managing custom objects, fields, relationships (lookup, master-detail, and junction objects), and schema builder

Integration and Data Management:
- Salesforce Integrations
  - Skilled in integrating Salesforce with external systems using REST and SOAP APIs
  - Hands-on experience with Platform Events and Change Data Capture for real-time integrations
- Data Migration and Management
  - Proficient in using Data Loader, Import Wizard, and other data management tools
  - Experienced in designing and implementing data validation and cleansing processes

Salesforce Administration:
- User Management
  - Experience with setting up and managing users, roles, profiles, permission sets, and sharing rules
- Security and Compliance
  - Proficient in implementing field-level security, encryption, and org-wide defaults

Reporting and Analytics:
- Reports and Dashboards
  - Skilled in creating custom reports, dashboards, and report types
  - Experience with Salesforce Einstein Analytics for advanced data visualization and reporting

Project Management and Collaboration:
- Agile Methodology
  - Experienced in working within Agile/Scrum frameworks, participating in sprints, and using tools like Jira and Confluence
- Technical Documentation
  - Skilled in documenting technical specifications, design documents, and user manuals

Soft Skills:
- Problem-solving and Analytical Skills
  - Strong ability to analyze business requirements and translate them into technical solutions
- Communication and Collaboration
  - Excellent interpersonal skills with the ability to work effectively in team environments and communicate complex concepts to non-technical stakeholders
- Time Management and Organization
  - Proficient in managing multiple tasks and projects simultaneously, ensuring timely delivery of solutions
