Profile Summary

- Frontend Developer over 5 Years of Web Development experience in Angular, React.js, JavaScript, RxJS, Nodejs, MySQL, HTML, CSS, Bootstrap with proven background successfully managing all aspects of site development, from initial design and architecture to site deployment and client management.
- Skilled in building RESTful APIs, integrating third-party services, and deploying applications to cloud platforms.
- Demonstrated ability to complete end-to-end projects in deadline-oriented environments.
- Skilled at successfully revamping Webapps to enhance user satisfaction and retention time.
- Able to effectively communicate with wide range of clients and coworkers.

Technical Skills

- **Programming Skills**: JavaScript, Typescript
- **Framework & Libraries**: Angular, React.js
- **Database:** MySQL
- **Version Management**: GitHub, Bitbucket
- **Web Technologies**: Nodejs, HTML5, CSS3, SCSS, RxJS, NgRx, Unit Testing, REST API, Bootstrap, Flex-box, Angular Material, PrimeNg
- **Other**: NPM, Responsive Design, Media Query, Postman, VS Code, Eclipse, SQLYog, CICD

Organizational Experience:

1. **Microinch Hub** (March 2024 to Jan 2025)
   Role: Frontend Developer
   Project Title: Food Delivery App
   Project Description: This app helps people order food from their favorite restaurants and get it delivered to their doorstep. With just a few taps on their phone, users can explore a variety of dishes, place orders, and track their delivery in real-time.

   - Led the development of Food Delivery app using Angular 16 and Node.js with MySQL.
   - Designed and implemented secure RESTful APIs and JWT-based user authentication.
   - Integrated REST APIs and optimized UI performance with lazy loading and OnPush change detection.
   - Collaborated with backend teams for seamless API integration and reduced load time by 35%.
   - Mentored junior developer and conducted weekly code reviews to improve code quality.

   Technologies: Angular 16, JavaScript, Node.js, Typescript, RxJS, Angular Material

2. **SA Tech Software** (May 2022 to Nov.2023)
   Role: Frontend Developer
   Project Title: Chargeback Tool
   Project Description: Auto route the chargeback cases to different baskets depending on required conditions. Also tracking and transferring cases based on current details of cases. Generating letters and reports based on current details of the case. Along with this uploading of new cases and categorizing by case types.

- Understanding project requirements and developing frontend website architecture
- Built reusable components using Angular 14, improving development efficiency by 25%.
- Working very closely with Business Owner and On-Shore management for User Story Grooming and Implementation. Ensuring web design is optimized for smartphones
- Integrated RESTful APIs and implemented reactive forms with validation using RxJS.
- Collaborated with designers to ensure pixel-perfect UI implementation using SCSS and Bootstrap.

Technologies: Angular 14, JavaScript, Typescript, RxJS, Angular Material

3. **Itistu Products &Services Pvt. Ltd.** (June 2018 to April 2022)

a) **Role: Frontend Developer**
Project Title: Asta Research
Project Description: Asta research is a dynamic team of market professionals which offers seamless research insights based on a 360-degree research methodology and exclusive data model. It holds expertise in a precise analysis of various industry verticals such as automotive, chemical, consumer goods, aerodynamics, healthcare, IT, and others. In this project, developed the functionality to accept the detailed information of project papers, categories the projects and developed functionality to sale & buy the projects papers.

- Understanding the project requirement and architecture of webapp.
- Developed and maintained scalable Angular application for client.
- Integrated RESTful APIs & implemented reactive forms with validation using RxJS.
- Built dynamic components and managed state.

Technologies: Angular 12, JavaScript, Typescript, Angular Material, HTML, CSS, Bootstrap

b) **Role: Frontend Developer**
Project Title: Childline - Swaraj NGO
Project Description: Worked on Childline project which maintains the records of orphan children in the society and pass-on the details to Baal Vikas Mandal. In this project, developed the functionality to accept the detailed information of children and maintain database accordingly. Developed Admin panel to administer the data according to regions, search, and maintain records of volunteers.

- Understanding the project requirement and architecture of web app.
- Planning, designing end-to-end development of webapp using technologies such as Angular, Nodejs, MySQL, ExpressJS, MySQL.
- Involved in designing view templates using Angular8, bootstrap, css3, Html5, Scss.
- Developed and maintained RESTful APIs using Node.js and Express for internal and client-facing applications.
- Created custom pipes and directives to handle business logic and UI behavior.
- Use NPM to manage the modules and used it to install useful tools such as express.
- Improved API performance by optimizing database queries (MYSQL) and middleware usage.
- Optimized application by refactoring the code and implementing lazy loading reducing initial load times and improving overall performance

- **Technologies**: Angular 8, JavaScript, Typescript, RxJS, Angular Material, CI/CD, MYSQL, Node.js

c) **Role: MEAN Stack Developer**
Project Title: Carautodoc
(July 2018 to Jan. 2020)

Project Description: Network of technology-enabled car services, offering a seamless service experience. It provides online car servicing platform intended to help people to schedule their car servicing online in a desired time. Includes almost all types of car options from which we can select required car and book required service. Also developed admin panel to track and administer service, mechanic, garage, booking details records.

- Understanding the project requirement and architecture of webapp.
- Planning, designing end-to-end development of webapp using such as (Angular 6/7, Nodejs, Mysql, ExpressJS).
- Developed user interfaces using Angular and implemented component-based architecture.
- Managed data using MySQL and optimized queries for better performance.
- Automated CI/CD pipelines using GitHub Actions
- Implemented authentication and authorization using JWT and OAuth2.
- Collaborated with cross-functional teams using Agile practices.
- Designed and implemented REST APIs to manage customer data, resulting in 25% reduced response time.

Technologies: Angular 6/7, Nodejs, MySQL, CI/CD, JavaScript, Typescript, Angular Material, AWS

Key Skills

- Developed and maintained user-facing features for 7+ high-traffic websites and applications using HTML, CSS, and JavaScript, Angular, React.js resulting in 20% increase in user engagement.
- Played a pivotal role in the entire software development lifecycle, from concept to deployment, ensuring timely project deliveries and a 100% bug-free product.
- Collaborated seamlessly with back-end developers and web designers to enhance application usability, which received 95% positive feedback in user surveys.
- Involvement with product owner regarding the requirements.
- Proper discussion and implementation of work related to efforts, technical work, technical difficulties, etc.
- Managing assigned component of projectwith100% commitment to deliver before time.
- Responsible for scalable web development with debugging &troubleshooting of webapps.
- Follow good coding practices, web standards &guidelines for implementing webapps.

EXAM	UNIVERSITY/INSTITUTE	MARKS (%)
Bachelor of Engineering (Computer)	University of Pune	60
HSC(Science)	Higher Secondary College	62
SSC	Secondary School College	81
