PROFESSIONAL SUMMARY:

- Having **5.3 years** around of experience in software developer in **web applications** with a demonstrated history in designing, development of the UI for large- scale applications. Proven ability to balance big picture thinking while conceptualizing and executing project details. Played a key role in UI Development. Passionate about coding and learning. Converted innovations either as a product or part of the product. Adept at prioritizing and balancing multiple projects in a constantly evolving environment.
- Develop user-facing features using Angular /6/8/12/16/17, ensuring implementation of the visual elements that users interact with in the web application.
- Involved in all the phases of Software Development Lifecycle (**SDLC**) - Requirement gathering, Analysis, Design, Reviews, Coding, Code Reviews, Unit and Integration Testing.
- A good communicator with team in planning as well as problem solving.
- Experienced in integration and testing with web-services using **REST**.
- Good understanding of AWS, Git.
- Experience Building self-contained, reusable, and testable modules and components
- Experience in Writing custom form controls for Angular using Control Value AccessorInterface.
- Technical Expertise in JavaScript, OOJS, ES6, angular 16 version, angular 2+, angular 12, styled-component, TypeScript, Nodejs, REST API, jQuery, HTML5, CSS3 and Ajax.
- Optimize applications for maximum speed and scalability, ensuring optimal performance across various web-capable devices and browsers.
- Reusable components and front-end libraries for future use, enhancing efficiency and readability of code.
- Participate in code reviews and ensure that the code adheres to best practices. This can include proper commenting, formatting, and use of design patterns.
- Strong proficiency in HTML, CSS3, and JavaScript (ES6+).
- Implemented the service projects on the Agile Methodology.
- Hands on experience in client-side validation, as well as HTML, CSS, JavaScript
- Experience in solving issues regarding the Cross-Browser compatibility for the web Application.
- Closing involved with UX/UI Team and BA Team
- Developed the functionalities under Agile Methodology and used Azure devops task assignments and bug tracking.
- Writing clean and well-documented code with TypeScript best practices
- Ensuring a clear dependency chain, in terms of both application logic as well as file relationships.

EDUCATION:

- **Bachelor of Technology** in Mechanical Engineering (2015) **CGPA: 7.38%**
  Pondicherry university Kalapet Puducherry

TECHNICAL SKILLS:

Web Technologies	Angular, HTML5, CSS3, Bootstrap 4, JavaScript(ES6 +),TypeScript, Angular Material, Ngrx, Rxjs
IDE & Editors	VS Code, Notepad++
Software Methodology	Agile
Version Control Tools	GIT

PROFESSIONAL EXPERIENCE:

PWC India **May 22nd 2025 – Till Date**

Project Name : **PatientCare**
Team Size: **10**
Role: Angular Developer
Technology: Angular 16,TypeScript,Javascript,CSS,HTML,Rxjs
Details: Patient Care is a comprehensive healthcare management system developed for multi specialty hospital to streamline outpatient(OP), inpatient(IP), and emergency care Work flows. The platform digitizes patient registration, Vitals recordings, and Discharge summaries in a secure and efficient manner.

Responsibilities:

- I played a pivotal role in developing and enhancing innovative solutions to elevate user experiences. Collaborating closely with cross-functional teams, I leveraged my expertise in Angular to design and implement robust front-end applications that streamlined processes and optimized efficiency. Through agile development methodologies, I contributed to the creation of user-friendly interfaces, incorporating intuitive navigation, responsive design, and seamless data integration. By staying up-to-date with industry trends and best practices, I continuously sought opportunities to improve performance, scalability, and maintainability of the applications.
- Build reusable components, code, and libraries for future use.
- Followed Sonar lint coding guidelines.
- Code reviewed for junior developers as for coding guidelines and standards.

Ascendion Digital **June 14th 2023 – April 23rd 2025**

Project Name: **COLUMBIA ASIA**
Team Size: 10
Role: Angular Developer
Technology: Angular 16, TypeScript, JavaScript, CSS, HTML, Rxjs,
Details: CA is web application for Health care domain used by doctors, Nurses and Staff. Implement features for OP And IP Screens from scratch.
I played a pivotal role in developing and enhancing innovative solutions to elevate user experiences. Collaborating closely with cross-functional

teams, I leveraged my expertise in Angular 16 to design and implement robust front-end applications that streamlined processes and optimized efficiency. Through agile development methodologies, I contributed to the creation of user-friendly interfaces, incorporating intuitive navigation, responsive design, and seamless data integration. By staying up-to-date with industry trends and best practices, I continuously sought opportunities to improve performance, scalability, and maintainability of the applications.

Responsibilities:

- I played a pivotal role in developing and enhancing innovative solutions to elevate user experiences. Collaborating closely with cross-functional teams, I leveraged my expertise in Angular to design and implement robust front-end applications that streamlined processes and optimized efficiency. Through agile development methodologies, I contributed to the creation of user-friendly interfaces, incorporating intuitive navigation, responsive design, and seamless data integration. By staying up-to-date with industry trends and best practices, I continuously sought opportunities to improve performance, scalability, and maintainability of the applications.
- Build reusable components, code, and libraries for future use.
- Followed Sonar lint coding guidelines.
- Code reviewed for junior developers as for coding guidelines and standards.
- Implemented generic code for common functionality to reusable components.
- Develop application features as per approved requirements and according to approved practices and procedures including unit tests and required documentation.
- Optimize application for maximum speed and scalability.
- Assure that all user input is validated before submitting to server.
- Closely worked with BA and UX team.
- Collaborate with other team members and stakeholders.

HCL TECH **Sept 14th 2021 – April 21st 2023**

Project Name:	**Conduent Highways England**
Team Size:	20
Role:	Front End Developer
Technology:	Angular 8, TypeScript, JavaScript, CSS, HTML, Rxjs
Details:	Developed a web application for Highways England that allows users to register their vehicles and make payments when crossing a bridge. The system ensures seamless toll collection whenever a vehicle crosses the bridge.

Responsibilities:

- Developed components as an independent module for re-usability across the application fordesktop as well as mobile app.
- Involved in the Sprint Planning and Application Framework designing for the application.
- Closely worked with Client Microsoft team.
- Working with back-end programmers to integrate REST API's
- Configuring, constructing, and testing scripts within an ongoing integration environment

- Making decisions regarding technical and design aspects of the Angular project
- Developed Custom Directives, Custom Pipes and Custom Form Controls for the specific

Project Name: **RCA-QUERY MANAGER**
Team Size: 10
Role: Front End Developer
Technology: Angular 8
Details: The Query Manager (QM) project aims to automate responses and ticketing for employee compliance-related queries raised by staff members. Utilizing the bank's recommended technology stack, the project focuses on building a scalable and future-ready query management system. QM is being developed using an Agile approach, ensuring collaboration, clear communication, and a flat management structure for efficient delivery.

Responsibilities:

- Develop application features as per approved requirements and according to approved practices and procedures including unit tests and required documentation.
- Optimize application for maximum speed and scalability.
- Assure that all user input is validated before submitting to server.
- Closely worked with BA and UX team.
- Collaborate with other team members and stakeholders

PROGUE TECHNOLOGIES **Nov 1st 2019 – June 30th 2021**

Project Name: **Electronic Health Record (EHR) Management System**
Team Size: 20
Role: Front End Developer
Technology: Angular 8, TypeScript, JavaScript, CSS, HTML, Rxjs
Details: Developed a web-based **Electronic Health Record (EHR) Management System** to streamline patient data management in hospitals and clinics. The system allows healthcare professionals to securely store, access, and update patient records, including medical history, prescriptions, and lab reports.

Responsibilities:

- Developed responsive web applications using Angular and Bootstrap to ensure a seamless user experience across devices.
- Designed and implemented reusable components to enhance modularity and maintainability.
- Created and managed Angular service**s** for efficient data handling and communication between components.
- Wrote optimized and scalable business logic for service layers.
- Ensured code quality and code coverage by writing unit tests and following best practices.
