Thrishali Shetty

EDUCATION

Bachelor of Engineering
Electronics & Communication
Mangalore Institute of Technology & Engineering
Jun 2017 - Jun 2021

SKILLS

- Azure Databricks
- Apache Spark
- PySpark
- Spark SQL
- Delta Lake
- ADLS Gen2
- Blob Storage
- Lakehouse Architecture
- Azure Data Factory
- Synapse Analytics
- Hadoop
- HDFS
- SQL
- Python
- Git,GitHub
- CI/CD (Azure DevOps, GitHub Actions)
- Agile (Scrum)
- Unity Catalog (exposure)

CAREER OBJECTIVE

Data Engineer with 3.5 years of experience building scalable data pipelines and cloud-native solutions using Azure Databricks, PySpark, Delta Lake, and SQL. Proficient in distributed data processing, real-time and batch workloads, and delivering high-quality, curated datasets to support analytics and reporting. Strong focus on performance optimization, data quality, and reliability at scale.

WORK EXPERIENCE

Data Engineer (Custom Software Engineering Analyst)

Accenture Private Limited

Jan 2023 - current

- Engineered and optimized PySpark and Spark SQL transformations in Databricks for large-scale structured and semi-structured data.
- Boosted query performance by 30% through advanced tuning in Databricks, reducing Power BI dashboard load times.
- Built a robust Orders Delta Table pipeline in Databricks using PySpark and Delta Lake, enabling efficient handling of large-scale structured and semi-structured data.
- Implemented Change Data Capture (CDC) and SCD2 techniques to ensure accurate and incremental data updates for historical tracking.
- Delivered curated datasets from Delta Lake in Databricks to downstream systems, enabling 15+ Power BI dashboards and supporting real-time reporting on key business metrics.
- Collaborated with BI teams to design dimensional models that support efficient querying and visualization in Power BI.
- Involved in facilitating daily Scrum and sprint retrospectives, promoting team collaboration and process improvement.
- Monitored and resolved pipeline failures to improve stability and reduce downtime, ensuring smooth and reliable operations.
- Accelerated reporting performance by 30% by implementing distributed data processing techniques.

Associate Data Engineer

Accenture Private Limited

Oct 2021 - Dec 2022

- Applied core Spark concepts to prepare and analyze high-volume datasets in distributed processing environments.
- Monitored and maintained high-volume PySpark data pipelines in Databricks, ensuring stable and efficient daily processing.
- Leveraged Azure Databricks to enhance data quality by conducting data cleaning and transforming large datasets using PySpark.
