# HARSHAVARDHAN B

SOFTWARE ENGINEER

harshavardhanborra79@gmail.com 8971255286 Bengaluru, Karnataka

## PROFILE

**Backend Developer** with **4.1+ years** of experience designing and building scalable **REST APIs** using **Django** and **FastAPI.** Proficient in **Python, Docker, PostgreSQL**, and test automation tools like **Pytest and Mock**. Experienced with **AWS (EC2, S3, Lambda), Apache Kafka**, and **CI/CD pipelines**. Adept at translating business needs into technical solutions and collaborating with **Agile** teams to deliver clean, maintainable code. Passionate about backend engineering, system design, and test-driven development.

## PROFESSIONAL EXPERIENCE

**Software Engineer,** Mirafra Technologies Private Limited 07/2023 – present

**Software Trainee,** Hexaware Technologies 08/2021 – 06/2023

## TECHNICAL SKILLS

**Programming Languages**
Python

**Frameworks**
Django, Flask, FastAPI

**Testing Frameworks**
Pytest, Unit Test, Mock

**Cloud Technologies**
AWS-S3, Lambda, CloudWatch, EC2, Secrets Manager

**Version Control**
Git, GitHub

**Others**
Apache Kafka, Linux ,Docker ,Jira

**Database**
MySQL, PostgreSQL

**API Development**
RESTful APIs, Django REST Framework (DRF), Async APIs

**API Testing**
Postman, Swagger

**Methodologies**
Agile, Scrum

**Development Practices**
TDD

## PROJECTS

**Project Name : Ace Hardware** 07/2023 – Present
**Client : Mirafra Technologies Private Limited**
**Role : Software Engineer**
**Technologies Used :** Python, Django, FastAPI, PostgreSQL, Agile, Scrum, Apache Kafka, Linux, Docker, Unit test, Mock, TDD, Pytest

**Description :** Ace is the largest retailer-owned hardware cooperative in the world with more than 5,200 locally owned and operated hardware stores in approximately 70 countries. The Ecommerce Website project at Ace Hardware, powered by **Django** in **Python** is a sophisticated digital platform designed to enhance the online shopping experience for customers. This dynamic website offers a wide range of hardware and home improvement products, seamlessly connecting users to Ace Hardware's extensive catalog.

**Roles and Responsibilities :**
- Developing Business Logic using **Python** on **Django** Web Framework.
- Writing validation scripts in **PostgreSQL** to validate data loading.

- By using **SQL** server management studio import Imported/Exported data between different data sources.
- To access the database create **Django REST APIs** using **python** and used to retrieve and save data.
- Developed asynchronous **REST APIs** with **FastAPI to** support high-throughput e-commerce operations and real-time data processing.
- Implementing and enhancing CRUD operations for the applications using the MVT (Model View Template) architecture of **Django** framework.
- Creating Business Logic using **Python** to create Planning and Tracking functions.
- Involving in capturing the requirements for the serial functional interface and other software requirements specification document.
- Involved in communicating with team members as well as clients.

**project name: Airline Operations and Logistics System** 08/2021 – 06/2023
**Client : Hexaware Technologies**
**Role : Software Trainee**
**Technologies Used :** Python, Django, Flask, MySQL, Git, Agile and Scrum, Docker, REST API, Pytest, Unit test, Mock

**Description :** Sharp Airline provides airlines services throughout Australia. The airline also has a base at Adelaide Airport with 4-6 aircraft based there at any given time. Although there are no longer any regular passenger services out of Adelaide, the company operates frequent charters, mainly to mine sites throughout South Australia, some to Queensland and the Northern Territory. The scheduled services are operated using the airline's Metro III and Metro 23 aircraft. It also operates charter services using the Cessna 441 as well as the Metros throughout Australia.

**Roles and Responsibilities :**
- Responsible to understanding the business specs documents.
- Used **SQL** for modifying, inserting, querying the data in the database.
- Utilized **Git** for version control, maintaining code repositories, and facilitating collaboration among team members through effective branching and merging strategies.
- Design and develop new **python** scripts based on requirements and also involved in bug fixes. Developed **python** code for back-end processing.
- Built lightweight microservices using **Flask** to expose **RESTful** endpoints for flight scheduling and logistics management.
- Actively communicated with team members and clients to gather feedback address concerns, and ensure alignment throughout the development process.
- Analyzed and understood business specifications to translate requirements into technical solutions.
- Developed and tested **REST APIs** to facilitate seamless communication between systems and ensure smooth data exchange.
- Implemented unit testing using **Pytest** and **Mock** to verify code functionality and maintain software reliability.

## EDUCATION

**Bachelor of Technology,**

Annamacharya Institute of Technology & Science – Tirupati

## DECLARATION

I hereby declare that the information provided in this resume is true and correct to the best of my knowledge and belief.
