Work Experience

FedEx , Hyderabad **Full Stack Software Engineer - I (March 2024 - Present)**

- Worked on SI runner Automation testing tool for system environment testing , using Jms topic and queue.
- Led the development **optimization of Rating-GUI**, a web-based platform for shipping rate calculations, focusing on scalability, real-time processing, and robust system integration.
- Reduced latency of rating gui from **500 ms to 100 ms** and handled around **10K QPS** efficiently.
- Built a high-performance backend service for dynamic pricing using Spring Boot, integrating **Kafka**, JMS, and Oracle DB. Designed modular workflow orchestration with fault-tolerant "stations" handling pricing logic. Implemented async processing, caching (Caffeine), and connection pooling (HikariCP) for scalability. Integrated **AWS (S3, Secrets Manager, CloudWatch)** for secure config, **logging**, and data storage. Ensured reliability with circuit breakers, retries.
- Utilized JMS topic queue, Feign client, and RestTemplate for inter-service communication.
- Refactored an application to Java 17 Spring Boot 3, managing dependencies, added new features.
- Implemented **distributed locks** to efficiently manage concurrency, resulting in **90% reduced issue**
- Developed new features for a Hold Release Scheduler Application, utilizing the Scheduler, asynchronous programming, to manage & hold traffic for events in orchestration applications.

Tech stack: Spring Boot, Gradle, SQL, JMS Topic and Queue,Kafka, Angular,AWS

Accenture India Ltd, Bengaluru **Software Developer Analyst s (Feb 2021 - March2024)**

- Worked on designing and developing two new microservices, carefully analyzing each aspect with architects to ensure a comprehensive implementation from scratch.
- Reduced critical APIs response time by **1/10th using caching** and async programming technique.
- Implemented security best practices such as authentication, authorization using JWT & OAuth .
- Actively participated in Agile ceremonies ,contributing to sprint planning and backlog refinement.
- Enhanced fault tolerance by implementing **Kafka Retryer** and Resilience 4J.
- Implemented and managed **GIT Workflows**, including branching, merging and code reviews to facilitate collaborative development.
- Worked on Ready api application, wrote queries in **cassandraDB**, used groovy scripts.

Tech stack: Spring Boot, Gradle, SQL, Maven, MySql, GitHub, Elasticsearch, Kafka, React, AWS

Imagine Huge Pvt Ltd **Software Development Intern (July 2020- Feb 2021)**

- Developed APIs for latest views, comments and upvotes/downvotes on user actions.

Tech stack: Jsp, Servlet ,Java Beans, Sql , Hibernate , maven

Education Details

Kamla Nehru Institute Of Technology, Sultanpur B.Tech, Computer Science Engr , 77.88% (2016-2020)

Courses & Certificates

Coding Ninja Data Structure and Competitive Coding Course in Java
Java In-Depth (Concurrency, JVM Internals, Lambdas & Streams API) by Dheeru Mundluru

Skills

Technical Skills: Data Structure and Algorithms, High Level Design, Low Level Design
Languages : Java, C++, JavaScript, TypeScript
Databases : CassendraDB, MySQL, SQL Server, Elasticsearch
Tools & Others: Redis, JMS Topic, Apache Kafka, Kibana, Grafana , Appdynamic, Jenkins, Putty, Splunk

Position of Responsibility and Achievements

- Former Mentor At Software Development Cell, KNIT Sultanpur
- Got five star rating in annual performance review and in each quarter review as well in Accenture.
- Solved 800+ Programming Questions on code studio, Codechef, Codeforces, Leetcode etc.

Candidate Skill Report

by codingninjas & naukri

Krishna Pratap Singh View complete coding profile

Top skills

Evaluated by tests and Coding Ninjas experts

	Proficiency
Java	87%
DSA	86%

188 difficult problems solved

Mastered complex topics across different skills

Coding problems solved — **379** DSA problems

Trained to be industry ready

Candidate put in dedicated efforts over 5 months of intensive training

Data Structures in JAVA

Duration: 3 months | Awarded in: February, 2025

Introduction to JAVA

Duration: 2 months | Awarded in: December, 2022

Ankush Singla (CEO, Coding Ninjas)
