JAVA SOFTWARE DEVELOPER

Results-driven and highly motivated Java Full Stack Developer with 4.2 years of experience in designing and developing enterprise-grade applications. Skilled in utilizing Java, Spring Boot, AngularJS, Hibernate, and microservices architecture to build scalable and robust solutions. Demonstrated expertise in integrating payment gateways and third-party APIs, delivering seamless user experiences. Strong problem-solving abilities, with a track record of successfully leading cross-functional teams and collaborating effectively in Agile environments. Adept at translating business requirements into technical solutions, with excellent communication and leadership skills.

TECHNICAL SKILLS

- CORE JAVA /J2EE
- Angular 10
- STREAM API
- JAVA 8 , 17 FEATURES
- COLLECTION
- SPRING BOOT
- HIBERNATE JPA
- REST API
- JWT TOKEN
- SPRING SECURITY
- GIT HUB
- MICROSERVICES
- AGILE SCRUM METHOD
- DEFECT TRACKING
- AWS
- SQL
- MVC ARCHITECTURE
- SERVLET
- JSTL
- HTML
- CI/CD
- JUnit
- SONARQUBE
- PAYMENT GATEWAY
- LOMBOK, MODEL MAPER

PROFESSIONAL EXPERIENCE:

CURRENT COMPANY-- PINESWIFT TECHNOLOGIES CLIENT -(AIRTEL INTERNATIONAL LLP)
MAGNASOFT PVT LTD
SDE (JAVA DEVELOPER) MARCH 2021 TO SEPTEMBER 2024

SKILL AND EXPERTISE:

- **Java & Frameworks: Proficient in Java 8, utilizing Stream API and Future for reducing boilerplate code. Strong expertise in Spring Framework (dependency injection, inversion of control, aspect-oriented programming) and Spring Boot (auto-configuration, starters, annotations).**
- **RESTful API Development: Solid understanding of REST principles (HTTP methods, resource URIs, status codes) and best practices in API design (versioning, error handling, authentication with JWT). Experienced in testing APIs using Postman.**
- **Database Management: Skilled in SQL, JDBC, JPA, Hibernate, and ORM concepts. Proficient in writing SQL queries and managing database schemas.**
- **Cloud Services: Experienced with AWS (EC2, S3, Lambda, API Gateway, RDS) and adept at utilizing AWS SDKs to integrate cloud services with Java applications.**
- **CI/CD & Deployment: Knowledgeable in CI/CD pipelines for automated testing and deployment. Proficient in using Docker for containerization and Kubernetes for orchestrating containerized applications.**
- **Unit Testing & Build Tools: Proficient in unit testing frameworks (JUnit), build tools (Maven), and version control systems (Git).**
- **Security: Knowledgeable in implementing security features with Spring Security for authentication and authorization.**
- **Frontend Development: Familiar with AngularJS, including creating modules and using templates for UI development. Experience in designing and implementing DTOs using Model Mapper.**
- **OOP Principles: Strong understanding of object-oriented programming concepts, including encapsulation, inheritance, polymorphism, and abstraction.**
- **Technical Troubleshooting: Skilled in diagnosing and resolving technical issues related to Java applications and frameworks. Proficient in debugging applications and ensuring seamless communication between systems.**
- **JSON Proficiency: Experienced in parsing, generating, and manipulating JSON data.**

TOOLS AND SOFTWARE :

- **ECLIPSE IDE**
- **INTELLIJ IDEA**
- **MYSQL WORKBENCH**
- **POSTMAN**
- **SWAGGER**
- **AWS**
- **GITHUB**
- **DOCKER**

Education details:

B.TECH (ECE) (REGULAR)
GIET UNIVERSITY (GUNUPUR ODISHA)

DETAILS OF PROJECT BREAKDOWN: Method :

METHOD: Agile Scrum Method

PROJECT NAME - HOMES LIBRARY , CLIENT COMPANY: ZILLOW

Deployed : Java 8 , 17, Spring Boot, Angular 8, Hibernate JPA, GitHub ,Aws, Microservices

PROJECT ROLES AND RESPONSIBILITIES:

- **System Design: Designed system architecture following the MVC pattern and defined data models for enhanced application structure.**
- **API Design and Implementation: Developed RESTful APIs for Owners Plan, Buyers Plan, and Legal Services using Spring MVC, ensuring robust functionality and performance.**
- **Data Modeling: Created entity classes with Hibernate JPA annotations, utilizing Lombok to reduce boilerplate code and improve readability.**
- **DTO Mapping: Developed DTO classes for data transfer and implemented mapping between DTOs and entity classes using Model Mapper.**
- **Repository Layer Development: Built and maintained the repository layer, executing data access operations and queries with Spring Data JPA.**
- **Service Layer Implementation: Developed the service layer to handle business logic and coordinate application processes.**
- **API Testing: Conducted API testing using Postman and JUnit to ensure reliability and performance.**
- **Database Management: Managed MySQL database for data storage and performed CRUD operations using JPA.**
- **Designed and implemented efficient algorithms to solve complex problems,Analyzed time and space complexity to improve code efficiency, performance using advanced data structures.**
- **Frontend Development: Utilized AngularJS for dependency injection, managing component dependencies efficiently, and created custom directives for reusable UI components.**
- **Testing Frameworks: Executed unit tests using Karma and Jasmine to validate controllers, services, and directives.**
- **Deployment: Deployed the AngularJS application on web servers and cloud platforms for production use.**
- **Payment Gateway Integration: Integrated a test payment gateway to ensure secure financial transactions.**
- **Debugging: Diagnosed and resolved defects using IntelliJ IDEA, contributing to application stability and reliability.**
- **Monitoring and Logging: Implemented comprehensive monitoring and logging for microservices to track performance and error patterns.**
- **Inter-Service Communication: Established communication protocols for microservices using RESTful APIs, gRPC or messaging protocols like Kafka.**
- **Agile Methodology: Actively participated in Agile ceremonies (sprint planning, daily stand-ups, reviews, retrospectives) to enhance team collaboration.**
- **Stakeholder Coordination: Collaborated with stakeholders to schedule and implement software updates, ensuring smooth releases.**
- **AWS Architecture: Designed and deployed a multi-tiered web application architecture on AWS using EC2, RDS, and Elastic Load Balancing for scalability during peak traffic.**
- **Cost Optimization: Implemented AWS cost optimization strategies using Trusted Advisor, Cost Explorer, and Budgets, achieving significant savings.**

DECLARATION

I hereby declare that the above mentioned information is correct up to my knowledge, and I bear the responsibility for the correctness of the above mentioned particulars.
