EXPERIENCE

Institutional Shareholder Services (ISS) July 2022 – Present

ESG Corporate Rating *Mumbai, India*

- Designed and Implemented an enterprise **ESG rating system** using **Angular, Java and Spring Boot**, integrating **D3.js** for interactive data visualisation charts.
- Developed a **multi-threaded Excel download feature** using executor framework, enabling internal users to download multiple reports simultaneously, reducing processing time by **50%**.
- Optimized stored procedures in **Practice Area Outliers** Module by restructuring queries, eliminating redundant joins and indexing key columns-improving backend response time by **40%**.
- Led and managed two junior developers, managing feature distribution and ensuring timely delivery while maintaining code quality.

ESRS Project, Celsia Team

- Built a scalable ESG compliance platform using **React**, **GraphQL and Hasura** ensuring efficient data handling and real-time updates.
- Implemented a hierarchical data model to manage **Groups, Subsidiaries and Business Units**, making it easy to structure and retrieve ESG data. Developed a material metrics model with **parent-child relationships** supporting structured data input and reporting for **1100+** ESG metrics.
- Designed and Implemented a **GHG Accounting Calculator,** enabling automated calculations of Scope 1, Scope 2 and Scope 3 emissions for ESG reporting, reducing manual data entry efforts by **60%** (Planned for phased rollout.)

Tata Consultancy Services (TCS) Sept 2019 – Jun 2022

Banking Service Bureau, Israel Team *Gurgaon, India*

- Independently Designed and developed the functionality of **Account Delinquency** in the System.
- Developed functionalities of Various services which includes Onboarding of Customers in the System, KYC Verification of customers.
- Utilize **Java, Enterprise Java Bean, Java EE and Web Services** to develop product TCS BaNCS responsible for financial activities of the client.
