Naresh Vi

Email Id : v.nareshk15@gmail.com **Mobile No :** +91-9966679896

Experience Summary

- ✓ **Having 9+ years** of Total experience in IT Industry with Data warehousing and **ETL tools (IICS Cloud, PWC**) using industry accepted methodologies &procedures,
- ✓ **5+ years of experience** into production, enhancement& development projects for ETL Power center.
- ✓ Extensive experience in using various Informatica Designer Tools like Source Analyzer, Mapping Designer, Transformation Developer, Mapplet Designer, Warehouse Designer.
- ✓ **4+ year's experience** working with **Informatica IICS cloud** and **Migration** process, knowledge on **IDMC**.
- ✓ Having work experience on **CDI** in **Informatica IICS cloud** and good experience on **Snowflake** database.
- ✓ Extensively worked on Informatica Power Center Transformations such as Source Qualifier, Lookup, Filter, Expression, Router, Joiner, Update Strategy, Rank, Aggregator, Sorter, Seq Generator, Normalizer, Union etc.
- ✓ Highly experienced in developing, designing, reviewing and documenting Informatica work products like Mappings, Mapplets, Sessions, Workflows, Worklets.
- ✓ Extensive experience in supporting Informatica applications, data extraction from heterogeneous sources using informatica Power Center.
- ✓ Designed **Complex mappings** and **expertise in Performance tuning** in mapping and session level**.**
- ✓ Experience in identify resolve performance bottlenecks in various levels source, target, mappings/session levels.
- ✓ Involved in Implementing Slowly Change Dimensions, Star Schema modeling, Fact tables, Dimension tables.
- ✓ Experienced in developing SQL with various relational databases like **Oracle, SQL Server,** and **Snowflake** Basic knowledge on OBIEE 10g Reporting tool.
- ✓ Extensive Experience in **UNIX** and **Windows** Operating system.
- ✓ Basic knowledge on python.

Technical Skills :

ETL Tool	**:**	**Informatica IICS cloud , Informatica 10.5 / 9.1 / 8.6. Airflow DAG**
RDBMS	**:**	Oracle 9i / 10g / 11g, Sql Server 2008. Snowflake, Data contrast
Operating Systems	**:**	Windows , Unix.
Reporting tool	**:**	OBIEE 10g, 11g. Power Bi
Scheduling tools	**:**	Control M , Tidal.

Professional Experience:

- ☞ Working as a Consultant with **Genpact India Pvt Ltd,** Hyderabad from Jun'21 to Oct'25.
- ☞ Worked as a Consultant with **Capgemini India Pvt Ltd,** Hyderabad from Dec'2017 to Feb'21.
- ☞ Worked as a Informatica developer with **Royal bank of Scotland,** Bangalore from Dec'2015 to Mar' 2017.
- ☞ Worked as a ETL developer with **Accenture Services Pvt Ltd,** Bangalore from Sept'2013 to Jul'2015.

Educational Details:

- ☞ Master of Computer Applications (**MCA**) from Osmania University.

PROJECT Details

Project 1 : Allergan BOTOX Pharmaceutical, Allergan, USA.
Role : Senior software engineer
Environment : Informatica IICS, Oracle, Snowflake DB, Windows 10, Unix.Azure

Description:

Allergan is one of the key player in the pharmaceutical business in US. We are dealing with one of their blockbuster product- Botox , which is mainly used in a wide variety of treatments for migraine, muscle stiffness/spasms, to reduce the cosmetic appearance of wrinkles etc . We are providing clear insights about TAT(Turn Around Time) taken to complete any BV(Benefit Verification) or PA (Prior Authorization) transactions. Also we are providing the counts of Patients and outcome-wise counts of BV/PA transactions. We are providing all details about a BV/PA transactions, so that the business can track/view the transaction's status on the BPS Dashboard

Responsibilities:

- ✓ Extraction, Transformation and Loading (ETL) of data by using Informatica cloud.
- ✓ Extracted source data from flat iles Oracle and loaded to an Target Oracle tables
- ✓ Handling developed mappings in Informatica PowerCenter Designer to load data from Staging Envi to dwh.
- ✓ Handling Created mappings using the transformations such as the Source Qualifier, Aggregator, Expression, Router, Filter, Sequence Generator and Update Strategy.
- ✓ Design the mapping with a SCD type2 to keep track of historical data
- ✓ Involved in UNIT testing and resolving issues.

Project 2 : Devon Energy System**, DEVON Oklahoma, USA.**
Role : ETL Developer
Environment : Informatica Power center, Oracle 10g,SAP BW, Toad, Windows XP.

Description:

Devon Energy Corporation is a leading independent oil and natural gas exploration and production company. Devon's operations are focused onshore in the United States and Canada. We also own natural gas pipelines and treatment facilities in many of our producing areas, making us one of North America's larger processors of natural gas liquids.

The company's portfolio of oil and gas properties provides stable, environmentally responsible production and a platform for future growth. Devon has nearly doubled its onshore North American oil production since 2008 and has a deep inventory of development opportunities to deliver future oil growth. Devon also produces about 2.6 billion cubic feet of natural gas a day — more than 3 percent of all the gas consumed in North America.

Responsibilities:

- ✓ Extraction, Transformation and Loading (ETL) of data by using Informatica Power Center.
- ✓ Extracted source data from SAP BW Oracle and loaded to an Oracle..
- ✓ Handling developed mappings in Informatica PowerCenter Designer to load data from Staging Envi to dwh.

- ✓ Handling Created mappings using the transformations such as the Source Qualifier, Aggregator, Expression, Router, Filter, Sequence Generator and Update Strategy.
- ✓ Design the mapping with a SCD type2 to keep track of historical data.
- ✓ Creating the Workflow and Running the Workflow by using Workflow Manager.
- ✓ Checked and tuned the performance of Informatica Mappings.

Project 3 : FATCA, Royal Bank of Scotland, UK.
Role : Informaica Developer
Environment: Informatica 9.6, Oracle 10g, Teradata, Mainframes, Toad, Windows XP.

Description:

Fatca stands for (Foreign Account Tax Complaint Act), USA government passed FATCA in order to obtain information about US citizens invested offshore both direct and indirect through controlled entities.

Who lives outside the USA , that citizens to report their financial account held outside of the US and required Foreign Institution(RBS) to report (IRS) internal revenue service about their US client.

Here phase 1 and phase 2 , in phase 1 USA citizens reportable information will be handled and in phase 2 reportable and no reportable information will be handled and updated in TAX status table.

Responsibilities:

- ✓ Involved in Extraction, Transformation and Loading (ETL) of data by using Informatica Power Center.
- ✓ Extracted source data from DB2(QREP / NON-QREP) and loaded to Teradata..
- ✓ Involved in mappings in Informatica PowerCenter Designer to load data from Staging Environment to dwh.
- ✓ Involved mappings using the transformations such as the Source Qualifier, Aggregator, Expression, Router, Filter, Sequence Generator and Update Strategy.
- ✓ CA7 mainframes scheduler tool to handle over all informatica batch jobs.
- ✓ Support the application for Tax status information for the Bank customers .
- ✓ Monitored jobs using DAC scheduler and Informatica Workflow Monitor.
- ✓ Checked and tuned the performance of Informatica Mappings.

Project 4 : SC Johnson & Sons, **USA**
Role **:** ETL developer
Environment : Informatica 9.1, Informatica IDQ, SAP BW, Oracle. HIVE, Hadoop.
Description:

The Current project is a POV (Proof of validation) pilot project for the client (SC Johnson & Sons).The client wants to build (EDW) environment based on BIG data technologies. We migrated the data from SAP BW system to Hadoop (HIVE) environment. The data is all about (Manufacturing and Materials) data migrated from SAP Tables to Hadoop file system. We have used Informatica Power Center and Informatica Developer as tools of migration from SAP BW environment to Hadoop Environment. We have implemented 47 Master data objects for migrating the data with extensive implementation of Business Logics.

Responsibilities:

- ✓ Extraction, Transformation and Loading (ETL) of data by using Informatica Power Center.
- ✓ Extracted source data from SAP BW loaded to HIVE.

- ✓ Involved in creating and developing the Mappings and workflows.
- ✓ Developed key design loading strategy.
- ✓ Checked and tuned the performance of Informatica Mappings.
- ✓ Managing project having onsite-offshore model.

Project 5 : Farmers Insurance **(Zurich)**, **USA**
Role **:** ETL developer
Environment : Informatica 9.1, DB2, Mainframes, Unix, WINSCP, Toad., Tidal

Description:

Farmers is one of the largest and most respected insurance brands in the United states , which is part of the Zurich Financial Services Group. we have to extract the data from FDWS (mainframes) to load (daily as well as monthly jobs) into DB2 , In this project we have different teams .My Involvement is in EFBI team, in that we are segregating 3 segments (like Auto, Home, Umbrella) , Finally we are processing the data to the Mainframes team. Mainframe team will convert the file (FTP) and send it to the business. In daily load we are strictly following the SLAs.

Responsibilities:

- ✓ Extraction, Transformation and Loading (ETL) of data by using Informatica Power Center.
- ✓ Extracted source data from Mainframe system, and loaded to an DB2..
- ✓ Developed mappings in Informatica Power Center Designer to load data from Staging Environment to dwh.
- ✓ Created mappings using the transformations such as the Source Qualifier, Aggregator, Expression, Router, Filter, Sequence Generator and Update Strategy.
- ✓ Creating the Workflow and Running the Workflow by using Workflow Manager.
- ✓ Involved in Creating Sessions, Workflows Using Workflow Manager.
- ✓ Involved extensively in Unit testing and UAT testing.
