PROFESSIONAL SUMMARY

- Having 6+ Years of total IT experience.
- Around 4 years of exclusive experience in Hadoop and its components like HDFS, Hive, Pyspark, Python have worked in strong AWS, S3 bucket, AWS EMR, AWS GLUE, Amazon Redshiftt, SQL
- Experienced in working with spark ecosystem using Python and HIVE Queries on different data formats like text file and parquet
- Experience with all flavor of Hadoop distributions, including Cloudera, Horton works.
- Experience in importing and exporting data using Apache Sqoop from Relational Data Base Systems to HDFS and vice-versa.
- Collecting and Aggregating large amount of Log Data using Apache Flume and storing data in HDFS for further analysis.
- Experience in building hive, pig and MapReduce scripts.
- Experience in building hive, pig and Map Reduce scripts.
- Designing and creating Hive external tables using shared meta-store instead of derby with partitioning, dynamic partitioning and buckets.
- Designing and creating Hive external tables using shared meta-store instead of derby with partitioning, dynamic partitioning and buckets.
- Experience in building Pig scripts to extract, transform and load data onto HDFS for processing.
- Expertise in Apache Spark & Python.
- Experience in developing scripts in Python and Spark-SQL for faster testing and processing of data. Import the data from different sources like HDFS/HBase into SparkRDD.
- Having good exposer on Spark (RDD) and its working functionality.
- Strong Knowledge on Spark architecture and its integrations like Spark SQL, Data Frames and Datasets API.
- Experience working on GitHub and JIRA to track issues and crucible for code review.
- Expertise in troubleshooting the problems generated while building, deploying and also in production support.
- Have excellent problem solving, time management skills, ability to work independently and under pressure and as part of a team.

TECHNICAL SKILLS

Big Data	**: SQL, Hive, Sqoop, HDFS, Oozie, Spark, PySpark, Python**
Cloud	**: AWS, S3 bucketing, AWS glue, Redshift**
Other Tool	**: WinSCP, Putty, Jupiter Notebook, PyCharm.**
Operating Systems	**: Windows, Linux.**
Languages	**: SQL, Python.**

EDUCATION

- **I have Completed Osmania University in 2015.**

EXPERIENCE

- **Grayradiant Data Services Pvt Ltd May 2019 - till date**

PROJECT# 4:

Client : SCB
Role : Data Engineer
Environment : SQL, Hadoop, HDFS, Hive, Sqoop, PySpark, Linux.

Description:

Standard Chartered PLC is a multinational bank with operations in consumer, corporate and investment banking and treasury services. The name Standard Chartered comes from the names of two banks (The Chartered Bank of India, Australia, and China, and the Standard Bank of British South Africa.

Responsibilities:

- Gather requirements from upstream and downstream teams and resolve dependencies (about the data sources,required columns)
- Developing the tables in different accounts based on the requirements for various regions.
- Worked on improving the run time of query by implementing optimization techniques to thus brought a queryrunning for 20 mints to 6mints. (Broadcast join, cache/persist, coalesce etc.)
- Implementing coding best practices and unit testing, code coverage for better pipeline.
- Document the work carried out and best practices.
- Analyzing the business requirements of the projects by studying the business requirementspecification document.
- Creating indexes on the tables for faster retrieval of the data to enhance database performance.
- Writing complex SQL queries including Joins for fast data retrieval from multiple tables.
- Used different joins, sub queries and nested query in SQL query.
- Creating and modifying stored procedures and views.
- Responsible for writing SQL Queries for Front-end developers.
- Created and modified tables and views.
- Handling exceptions as per business requirements.

PROJECT# 3:

Client : IKEA
Role : Data Engineer
Environment : Hadoop (Hive), Spark, Spark Batch, Spark-SQL, pyspark, AWS, Python.

Description:-

Edge Mobility is an internal talent management suite, enables companies to internally allocate resources based on open demands to evaluate against competencies & skills. It seamlessly integrates with 3rd party systems, making it easy to optimize the workforce for profitability.

Responsibilities:

- Designing, developing and maintaining data pipelines using Spark, Python, and related technologies on Hadoop.
- Handling on high volume data and ensure data quality and accuracy.
- Implement data security and privacy best practices to protect sensitive data.
- Developing data set processes for data modeling, mining and production.
- Monitoring and troubleshoot data pipelines to ensure they are performing optimally. Optimize data

pipelines for cost and performance.
- Automate data processing tasks and workflows to reduce manual intervention.
- Working on Agile Feature teams.
- Self-Motivator to perform Design/Develop user requirements, test and deploy the changes into production.

PROJECT# 1:

Client : ISF General Insurance
Role : Data Engineer Trainee
Environment : SQL

Description:

ISF GENERAL covers all major insurance classes of General Insurance. It is easy to use, customization, comprehensive and easy to implement. ISF GENERAL is designed to meet today's business challenges ofGeneral Insurance Organizations. It incorporates the functionalities of a futuristic insurance processing solution.

Responsibilities:

- Creating packages, procedures, functions using SQL coding to implement the complex business logic. writing complex queries using multiple tables.
- Analyzed, developed Packages, Procedures and Functions as per the requirement.
- Optimizing SQLs using explain plan, Auto trace feature and TKPROF to analyze the execution plan and tune the statements.
- Developed the reports through materialized views
- Developed New Form as per the Client Requirement.
- Prepared TSD as per the Client Requirement.
