SUMMARY

Experienced ETL Developer with over 12+ years of expertise in designing, developing, and optimizing end-to-end data integration solutions using tools like Informatica Powercenter, IICS. Proven ability to manage large-scale data pipelines, ensure data quality, and support data warehousing initiatives. Skilled in performance tuning, debugging, and working with cross-functional teams to meet business requirements.

EXPERIENCE

Associate Consultant

Tata Consultancy Services

08/2021 - 09/2025 Pune, India

Client: Postnord

Postnord is a leading provider of communication and logistics solutions across the Nordic regions. The engagement focused on developing and enhancing data-driven solutions to support communication, e-commerce, distribution, and logistics services.
Managed and maintained critical master data, including addresses of private individuals in Sweden and Denmark, as well as business locations and service Address, Product, Business Location, Process, and Equipment.

Roles and Responsibilities:

- Designed and developed scalable and high-performance ETL workflows using Informatica PowerCenter to integrate and process data from diverse source systems across Nordic regions.
- Designed, developed, and maintained IICS mappings, mapping tasks, synchronization tasks and taskflows, along with Informatica PowerCenter mappings and workflows for robust and scalable data integration solutions.
- Led the migration of legacy processes from Informatica PowerCenter to IICS.
- Worked closely with stakeholders to gather and analyze business requirements, translating them into efficient ETL solutions aligned with PostNord's logistics and communication objectives.
- Conducted knowledge-sharing sessions and coached junior team members.

Technical Lead

Wipro

10/2019 - 07/2021 Pune, India

Client: T-Mobile, Netherlands

Developed a Communication Data Model (CDM) to support churn prediction and marketing campaigns. The solution followed a classical layered architecture comprising staging, history, CDM, dimensional modeling and export layers for streamlined data processing and analysis.

Roles and Responsibilities:

- Led a team of ETL developers, provided technical mentorship, and contributed to business analysis activities by bridging gaps between technical teams and stakeholders.
- Collaborated with business users for requirement gathering and issue resolution.
- Developed complex ETL mappings and generic workflows to support data integration across multiple systems, ensuring and reusable solutions.

STRENGTHS

Analytical Thinking

Strong analytical skills in evaluating complex data flows and identifying optimization opportunities to improve ETL performance and data accuracy.

Problem-solving Capabilities

Effectively troubleshot and resolved critical production issues under tight deadlines, ensuring minimal disruption to business operations

Effective Collaboration

Collaborated closely with cross-functional teams including business analysts, QA, and data architects to deliver high-quality ETL solutions aligned with business goals.

SKILLS

ETL Development · IICS · IDMC · Informatica PowerCenter · Oracle · SQL · Teradata · Unix Shell Scripting · Data Modeling · Data Warehousing · PowerShell · Autosys · SAFe Agile · Informatica Scheduler · Windows · Migration from PowerCenter to IICS · Team Leadership · Incident Management · JIRA · GitHub

EDUCATION

Bachelor of Engineering

Oriental Institute of Science Technology (OIST)

2008 - 2012 Bhopal, India

CERTIFICATION

SAFe Agile Practitioner Certification

Certificate provides knowledge of Agile principles to deliver scalable and high-quality data integration.

EXPERIENCE

Associate Consultant

Atos

03/2018 - 10/2019 Pune, India

Client : T-Mobile, Netherlands

Developed a Communication Data Model (CDM) to support churn prediction and marketing campaigns. The solution followed a classical layered architecture comprising staging, history, CDM, dimensional modeling and export layers for streamlined data processing and analysis.

Roles and Responsibilities:

- Worked at client location in Netherlands for 5 months.
- Played a key role in ETL development, testing, production deployment, and post-deployment support, including defect fixes and incident resolution.
- Designed and developed advanced ETL mappings and reusable, parameterized workflows to enable smooth data integration across different source systems, ensuring the solution is scalable and easy to maintain.
- Enhanced ETL performance through extensive use of Pushdown Optimization (PDO), session partitioning, and query tuning techniques, significantly reducing data processing time and improving throughput.

Associate Consultant

Capgemini

03/2016 - 03/2018 Pune, India

Client: Barclays

Client Migration Simplification (CMS) project aims to streamline and automate the client migration process across segments, propositions, and legal entities, enabling a sustainable and efficient migration model for Corporate Banking.

Roles and Responsibilities:

- Analyzed and understood business requirements, designed data flow architecture, and prepared detailed ETL design documents.
- Assessed the impact of source system changes on existing ETL processes and implemented necessary modifications to ensure data integrity and consistency.
- Developed and tested ETL code as per system specifications and provided post-deployment support in the live environment.

Programmer Analyst

Cognizant

04/2013 - 03/2016 Pune, India

Client: JP Morgan Chase

The project focuses on building an Operational Data Store (ODS) to store real- time or near real-time atomic data with limited history. Feed files from various an Oracle database to create the ODS.

Roles and Responsibilities:

- Worked on multiple project modules, including data consolidation from various source systems and distribution to multiple external systems.
- Collaborated with the onsite team and occasionally with the client for requirement gathering and prepared detailed design documents.
- Developed ETL code using Informatica PowerCenter, created test cases, and performed unit and functional testing based on system requirements.
