Bharath N Lamani

Python Developer

+91 9019432039 **bharathlamani3333@gmail.com** **Bengaluru** **Bharath Lamani**

Professional Summary

- ✓ 4+ years of experience in designing, developing, and maintaining web applications.
- ✓ Proficient in creating APIs using **Flask frameworks** and **Django**.
- ✓ Strong understanding of **data structures** and **object-oriented programming** concepts in Python.
- ✓ Proficient in developing code databases such as **MySQL, Snowflake** and **PostgreSQL**.
- ✓ Skilled in UI technologies including **HTML, CSS,** and **JavaScript**.
- ✓ Experienced with **Agile** and **Scrum** methodologies.
- ✓ Familiarity with **Restful web services** and **object-oriented programming** principles.
- ✓ Experienced in integrating our application with other online services using **REST APIs**.
- ✓ Good knowledge of **Linux**, **command line**, and **server** administration.
- ✓ Experienced in crafting Docker images via Dockerfile.
- ✓ Possess a strong understanding of **AWS cloud services**, particularly **EC2 instances** and **S3 buckets**.
- ✓ One year of hands-on experience specializing in **AWS storage solutions**
- ✓ Proficient in utilizing **Azure** and **JIRA** for bug tracking.
- ✓ Skilled in writing test cases using **unit test and pytest.**
- ✓ Quick learner and adaptable to new technologies
- ✓ Strong problem-solving skills and logical thinking.

Technical Skills

Programming Languages	: **Python**
Frameworks	: **Flask(Microservices), Django, DRF, FastAPI**
Database	: **MySQL, Oracle DB, Snowflake**
Version Control Tools	: **Git, Bitbucket, Github**
Tools	: **Postman, Docker**
Cloud	: **AWS Lambda, S3, CloudWatch, EC2, ECS, RDS**
Programming IDE	: **Pycharm, Visual Studio**
SDLC	: **Agile and Scrum**
Web Technologies	: **Html, CSS, JavaScript**
Operating Systems	: **Windows, Linux**

Work Experience

Worked as **Senior Software Engineer** at **Onward technologies,** Bengaluru, from May 2024 to Aug 2025.
Worked as **Software Engineer** at **Tanama Software Private Limited**, Bengaluru, from Apr 2021 to May 2024.

Project Details

Project #3:

Project Name: Insights Hub.
Client : Caterpillar
Duration: May 2024 to Aug 2025
Role: Python Backend Developer
Technologies: Python, Flask, Rest_API, Snowflake, Github, Docker, AWS , Azure .

Project Description:

Worked on the development of Insights Hub, a web application used to host dashboards from tools like Power BI and Tableau. The application allows users to request access to specific dashboards, which are then subject to approval workflows. Based on the selected ownership and access settings, dashboards are made available to internal users or external dealers.

Role-based access control and security are enforced through integration with CWS groups, ensuring secure and targeted data visibility.

Roles and Responsibilities:

- ✓ Currently involved in the development of backend.
- ✓ Utilizing Flask framework and Snowflake database.
- ✓ Involved in unit testing for modifying requirements and implementing new ones.
- ✓ Participating in the development of role management and scheduled event.
- ✓ Contributing to the development of Proactive alerts.
- ✓ Engaged in developing the different module.
- ✓ Analyzing in the prod issue and bug fixing.
- ✓ Documenting all work in accordance with agreed standard

Project #2:

Name : Digital Petro
Duration : June 2023 to May 2024
Role : Python Backend Developer
Technologies : Python, Fast API, Pytest, MySQL.

Project Description:

Digital Petro is a leading IT product and solution provider specializing in the Oil & Gas industry, focusing on automation and digitization of retail petroleum outlets using IoT technology. The company offers an IoT enabled product that captures transactions, tracks and monitors operations, sends alerts, and ensures end-to-end reconciliation. With its command center solution, Digital Petro provides unified management across multiple geographical regions, optimizing retail petroleum operations.

Roles and Responsibilities:

- ✓ Designed and implemented scalable backend applications using Python with Flask, ensuring optimized API responses, efficient data processing, and seamless integration with IoT devices and petroleum retail systems for real-time transaction tracking and alert management.
- ✓ Utilized Python scripts for integrating CI/CD pipelines for continuous integration and seamless application updates.
- ✓ Developed API endpoints in Flask for volume calculation and audit logging, ensuring accurate fuel volume tracking, transaction reconciliation, and secure audit trails for compliance and reporting.
- ✓ Utilized Pandas and NumPy for efficient data processing, analysis, and transformation of large datasets related to IoT transaction logs and operational insights.
- ✓ Participated in client meetings and technical design discussions, providing solutions for business requirements.

Project #1:

Project Name: Capital One bank

Client : Capital one

Duration : April 2021 to May 2023

Role : Python Backend Developer

Technologies : Django, PostgreSQL, Jenkins, Bitbucket, Jira.

Project Description:

Capital One bank is a cutting-edge corporate digital banking platform tailored for small businesses and financial institutions across the U.S. As a cloud-based SaaS solution, Capital one provides secure and scalable financial services, including deposit management, money movement, lending solutions, fraud detection, and advanced security measures.

Roles and Responsibilities:

- ✓ Involved in developing features using Django Framework.
- ✓ I built backend applications using Python and Django that work efficiently with IoT devices and petrol station systems to track transactions in real-time and send alerts when needed
- ✓ Participating in unit testing for modifying existing requirements and implementing new ones.
- ✓ Actively participating in technical analysis, review, and design discussions related to enhancing the application.
- ✓ Participated in client meetings and technical design discussions, providing solutions for business requirements.
- ✓ Currently involved in finding root cause analysis and fixing issues.
- ✓ Documenting all work in accordance with agreed standards.
- ✓ Working as both an individual contributor and team member.

Education

Graduation :

2018 : B.Tech/B.E. (ISE) (2014-2018), NIE Institute of Engineering, Mysore (VTU-Belagavi), Karnataka

Declaration

I confirm that the information I've provided is accurate and correct, as far as I know.
