CAREER OBJECTIVE

- Aspiring to take on a challenging and stimulating position where I can employ my skills and capabilities to support organizational achievements. I am dedicated to pursuing excellence in corporate goals and advancing my personal and professional aspirations for a rewarding long-term career.

PROFESSIONAL SUMMARY

- With more than six years of IT industry experience, I possess a strong foundation in both manual and automation testing. I am skilled in methodologies such as Smoke, Sanity, Retesting, Regression, and UAT Testing, consistently delivering results that meet the highest standards throughout the Software Testing Life Cycle (STLC).
- My expertise in automation includes the use of Testim.io to automate applications, as well as designing and maintaining automation scripts. I also have a solid grasp of Selenium WebDriver with Java and have played a key role in building page object model-driven frameworks.
- In addition to my technical abilities, I excel in analyzing requirements, problem-solving, and fostering collaboration within teams. I am experienced in creating detailed defect reports and ensuring clear communication across teams. My track record in Agile Scrum and Waterfall models demonstrates my ability to meet deadlines and deliver quality in fast-paced environments.

WORK EXPERIENCE

QA ENGINEER Aug 2022 – Sep 2023
EY | Bengaluru, India

- Conducted Manual and Automation Testing on the application.
- Leveraged Testim.io to automate application testing processes.
- Employed efficient wait strategies in scripts, ensuring stable and reliable test execution.
- Developed and utilized custom action functions to simplify test case design, reducing complexity and maintenance overhead.
- Performed root cause analysis for defects to enhance application quality.
- Executed test suites and grid-based testing.
- Managed and tracked defects using Testim.io, ensuring timely defect resolution.
- Created and followed Quality Assurance Testing procedures.
- Reproduced customer-reported issues by deploying builds and restoring databases, enabling detailed analysis.

- Reported identified issues to the Team Lead and Product Owner for prioritization as requirements or defects.
- Reviewed and worked on issues in Azure DevOps, preparing scenarios and test cases.
- Conducted regression testing during validation and raised defects in Azure DevOps for identified issues.
- Planned, scheduled, and analyzed test requirements and results.

QA Analyst Jan 2018 - Jul 2022
SABB | Hyderabad, India

- Develop a tailored test automation strategy based on project requirements, considering factors such as application architecture, technology stack, and testing objectives.
- Write, enhance, and debug automated test scripts using Testim. io to cover functional and regression test scenarios for the application.
- Manage test data for automated testing, including setup, manipulation, and clean- up to ensure reliable test results.
- Execute automated test suites regularly to validate application functionality and performance, updating and maintaining scripts as necessary.
- Identify, report, and track defects found during automated testing, collaborating with stakeholders for timely resolution.
- Document test automation processes, procedures, and best practices for team reference and knowledge sharing.
- Continuously evaluate and improve test automation processes and methodologies to enhance efficiency and reliability.
- Collaborate effectively with cross- functional teams, including developers and product managers, communicating automation progress and challenges clearly and promptly.

PROJECTS

Center Of Excellence (COE) **Aug 2022- Sep 2023**

Center of Excellence (COE) aimed at enhancing service delivery across multiple client sites in the domains of Assurance, Consulting, Strategy and Transactions, and Tax. The COE served as a centralized hub for providing specialized expertise and support, ensuring that all client engagements met the highest standards of quality and consistency.

Identity And Access Management (IAM) **Jan 2018- Jun 2022**

Comprehensive Identity and Access Management System, which played a critical role in securing and controlling access to organizational resources. The system facilitated the granting and revoking of access rights, ensuring that only authorized users could access sensitive information and applications.
