SUDARSHAN DUMBRE

CAREER OBJECTIVE

8+ years of expertise in the IT sector, including 4+ years in AWS and 4 year in supply chain management, where planning, implementation, administration, and problem-solving are all part of the job.

EXPERIENCE

- **Cloud Platforms:** AWS (EC2, S3, IAM, ECS, VPC, ALB, SG)
- **Infrastructure as Code:** Terraform
- **CI/CD:** Jenkins
- **Networking:** VPC design, Subnets, NAT Gateway, Internet Gateway, Route Tables, VPC Peering
- **Load Balancing:** Application Load Balancer
- **Security:** IAM Policies, Roles, Security Groups, NACLs, SCPs
- **Containers:** Amazon ECS with Fargate
- **Monitoring:** CloudWatch, CloudTrail
- **Version Control:** Git, Github

CLOUD ENGINEER (AWS)

Vodafone Intelligent Solutions Pune
27th March 2023 – 25th August 2025

- Worked on AWS Terraform for infrastructure provisioning, enabling version-controlled infrastructure management and repeatable deployments.
- Implemented end-to-end CI/CD pipelines using Jenkins (declarative pipelines in Groovy) for deploying containerized applications on AWS ECS Fargate behind ALB.
- Automated Docker image build, vulnerability scanning (SonarQube), and push to AWS ECR, followed by deployment to ECS.
- Managed VPC configurations including public/private subnets, NAT Gateways, and route tables to ensure secure communication between resources.
- Configured and optimized Amazon S3 buckets for scalable storage solutions, implementing lifecycle policies and versioning for data management.
- Created SCPs and IAM policies to enforce security and compliance requirements across AWS Organization accounts
- Implemented Application Load Balancers (ALB) to distribute incoming application traffic across multiple targets, improving application availability.

EDUCATION

PADMABHUSHAN VASANTDADA PATIL INSTITUTE OF TECHNOLOGY
Pune, Maharashtra
BE in Electronics and Telecommunication

ADDITIONAL SKILLS

Language: English, Hindi, Marathi

Cloud Technologies: Amazon Web Services (AWS), Microsoft Azure AD

Provisioning Tool: Terraform

Operating System: Linux, Ubuntu, Windows XP/7/8/10

language-independent data interchange format: JSON, YAML

Other tools: Putty, Puttygen, Visual Studio Code.

Tools: Jira

CERTIFICATIONS

AWS Certified Developer – Associate

Terraform Associate

- Utilized Amazon CloudWatch for monitoring system performance and logging, enabling proactive troubleshooting and resource optimization.
- Developed cost management strategies by leveraging AWS Budgets and Cost Explorer, enabling proactive budget tracking and optimizing resource allocation across projects.

CLOUD ENGINEER (AWS)
Tata Consultancy Services Ltd. Pune
24th Aug 2022 – 10th March 2023

- Developed infrastructure as code using Terraform. Deployed the infrastructure in the Amazon cloud, debugged all issues, and wrote the deployment documentation.
- Working with a strong team of architectures, backend developers to gather function and non-functional requirements.
- Setting up and managing CICD Pipelines by using AWS code commit and code build service.
- Monitoring each service deployment and validating the services across all environments.
- Create, manage, and delete users and groups as per the request using Amazon Identity and Access Management.
- Setup dev and QA environment infrastructure using AWS
- Managed AWS services like EC2, S3, ELB, IAM, VPC, ECS, cloud watch, security groups, family transfer server, code build and code commit.
- Experienced in monitoring and tracking billing dashboards on AWS.

CLOUD ENGINEER (AWS)
MBit Computraining Pvt Ltd
5th May 2021 – 23rd *Aug 2022*
Client: ***TCS***

- Used Agile methodology throughout the project, involved in quarterly basis released management.
- Managed infrastructure automation using Terraform.
- Working with a strong team of architectures, backend developers to gather function and non-functional requirements.
- Deploy and monitor scalable infrastructure on Amazon web services (AWS) configuration management.
- Setting up and managing CICD Pipelines by using AWS code commit and code build service.
- Monitoring each service deployment and validating the services across all environments.

- Create, manage, and delete users and groups as per the request using Amazon Identity and Access Management.
- Setup dev and QA environment infrastructure using AWS.
- Managed AWS services like EC2, S3, ELB, IAM, VPC, ECS, cloud watch, security groups, family transfer server, code build and code commit.
- Worked on S3 cross account replication and key management services.
- Experience in setting up cross account CloudWatch dashboard.

SR. ANALYST
Flextronics technologies India Pvt. Ltd., *Pune*, *Maharashtra*
10th Apr 2017 – 29th Apr *2021*

- Trouble shooting of production issues done and fixed issues.
- Made valuable contributions to planning of promotions, pricing and inventory levels, enhancing inventory flow.
- Reduced downtime in warehouse operations by ensuring reorders were aligned with store sales and backlog.
- Enhanced organization and traceability through implementation of management systems for BAAN V, SAP MM records.
- Input all data into system using BAAN V and recorded order updates with 100% accuracy.
- Researched new vendors and partners to obtain most cost-effective pricing for goods, saving company MAX in one year.
- Determined feasibility of proposed procurement actions by performing market research.
- Negotiated with vendors on freight costs, cutting shipping prices.
- Prioritized important customers by reviewing logistics and handling shortages, delivery schedules and office functions.
