Professional Summary

Experienced Cloud Engineer specializing in designing, deploying, and managing cloud infrastructure on AWS. Proven expertise in cloud migration, infrastructure automation, and implementing cost-effective, scalable, and secure solutions. Adept at leveraging AWS services to optimize performance, reduce operational costs, and enhance system reliability. Strong background in system administration and troubleshooting critical issues in complex, distributed environments.

Education

AK Technical University **July. 2011 – June 2015**

Bachelor of Technology in Electronics and Communications *Kanpur, UP*

Certificates & Achievements

- AWS Cloud Practitioner CLF-C02
- Lean & Six Sigma
- Cloud Security Audit
- Agentic AI

Technical Skills

Cloud Platform - AWS: Cloud Platforms: AWS (EC2, S3, RDS, Lambda, CloudFormation, VPC, IAM)

IaC & Automation: Terraform, CloudFormation, Ansible

Monitoring & Security: AWS CloudWatch, AWS CloudTrail, IAM Policies.

Networking: VPC, Subnets, Route 53, VPN, NAT Gateways, Load Balancer

OS: Linux, Windows Server

Tools & Application: ServiceNow, Remedy, Zscaler, Pulse Secure, Cisco AnyConnect, Citrix, Amazon Workspace, Azure remote desktop

Directory Service & Device Management: AirWatch, Absolute Software, Active Directory MS Azure (User Management, GPO)

Concepts: ITIL, Proxy, DHCP, DNS, AD, VPNs, ITSM, IT administration, Backup & Recovery, Security Compliance Knowledge of Gen AI and Agentic AI and its use cases

Experience

Genpact Ind. **October 2020 – Present**

Cloud Engineer *Jaipur*

- Designed and deployed scalable, secure AWS cloud solutions for enterprise applications.
- Implemented infrastructure automation with Terraform and AWS CloudFormation.
- Migrated legacy on-premises workloads to AWS cloud with performance tuning.
- Used IAM roles, security groups, and VPC to enforce security best practices.
- Monitored application health using CloudWatch; set up alerts and dashboards
- Led troubleshooting sessions for VDI and application-related issues.
- Supported Zscaler VPN policies and access control through Azure & Active Directory management.
- Installed and configured hardware/software for internal systems and users.
- Supported VPN, proxy, and cloud-access tools for secure remote access.
- Assisted in patching and physical server setup during data center maintenance.
- Managed applications via AirWatch and Absolute Software, Setup and manage the VDI(Citrix, VMware Workspace, Amazon Workspace and RDP-Remote desktop) for client and end user.
- Performed Active Directory administration: user creation, password resets, and group policy management.

MBSAP Enterprises **April 2018 – March 2020**

Sr. IT Administrator *Noida*

- Provided remote support for desktop and laptop issues across global teams.
- Ensure high availability and reliability of network infrastructure, proactively monitoring performance and implementing optimizations to minimize downtime.
- Installed and maintained operating systems, managed user accounts, and performed Active Directory tasks (user/group management).
- Manage daily operations of local and wide area network systems, conducting diagnostics, scheduling preventative maintenance, and ensuring robust network performance.
- Monitor network performance, generating detailed statistics and reports to inform capacity planning and infrastructure improvements.
- Provide 24/7 support, rapidly addressing critical network incidents to maintain service availability and meet SLAcommitments.
- Assisted in patching and physical server setup during data center maintenance.

Sunworldsoft Technologies **August 2016 – April 2028**

IT Administrator *Noida*

- Provided remote support for desktop and laptop issues across global teams.
- Configured email clients and resolved user-level hardware issues.
- Installed and maintained operating systems, managed user accounts, and performed Active Directory tasks (user/group management).

Projects achievements

Genpact Ind. | *Cloud Infra*

* • Infrastructure Automation: Automated resource provisioning using Terraform and CloudFormation, reducing deployment time by 40%.
* Active Directory Optimization: Streamlined user management and GPO implementation, improving security compliance and reducing ticket resolution time by 30%..
* Key contributor to business transition (UAT, ramp-up/down coordination).
* Received appreciation for IT service delivery and customer satisfaction improvements.
* Certified Lean Six Sigma process contributor – enhanced ServiceNow catalog..

Additional Information

Strong communicator, collaborative team player, and quick learner.
Passionate about cloud computing and staying up to date with tech trends.
