PROFESSIONAL SUMMARY:

Dynamic and results-driven Salesforce and SAP specialist with over **9 years' experience in Salesforce Administration**, including **5 years working closely with SAP applications.** Demonstrated ability to manage complex CRM environments, lead Salesforce implementations, drive functional integration between systems, and optimize business processes. Experienced in both **administration and business analysis**, with a strong understanding of functional and technical requirements, user support, and inter-system workflows. Proven track record of bridging user needs with technical solutions, even when direct coding is not required.

CORE SKILLS:

- Salesforce Administration & Configuration
- SAP Functional Knowledge (5 years)
- Data Analysis & Reporting (including Tableau)
- Business Process Mapping & Optimization
- User Training & Support
- Requirements Gathering & Documentation
- Project Management, Change Management
- CRM Implementation & Data Migration
- Functional Integration (SFDC & SAP)
- CRM Support & Issue Resolution

PROFESSIONAL EXPERIENCE:

❖ **Principal Analyst, Sales Operations**
TTEC Digital Analytics India LLP — Nov 2024 – Jan 2025

- Lead Salesforce administration for sales and operations, designing automation tools, managing user support tickets, and creating dashboards to aid business decisions.
- Collected and analyzed business requirements, transforming them into optimized workflows using Salesforce automation.
- Managed data migrations and sandbox testing, ensuring reliable deployments and performance consistency.
- Supported advanced features adoption, improved customer/user experiences, and delivered solutions with business teams.

❖ **Salesforce System Specialist (Contractor)**
Salesforce India - Aditi Tech Consulting Pvt Ltd — Mar 2022 – Dec 2023

- Enhanced both Salesforce Classic and Lightning environments, focusing on process improvements and user adoption.
- Specialized in administration, functional integration, and project leadership for system enhancements and business process streamlining.

Keshagoni Raghavender Goud

- Integrated Salesforce with Ripjar for compliance-screening and legal-denied party processes.
- Created and managed user profiles, dashboards, workflows, validation rules, and supported cross-functional data migrations.
- Facilitated training, documentation, and business analysis, directly bridging business needs with technical deployments.

❖ **Salesforce Consultant**
MainstreamTek Corporation — Nov 2021 – Mar 2022

- Administered production Salesforce environments as both administrator and business analyst.
- Handled user support tickets and permissions, and implemented business-driven enhancements via configuration.
- Created custom reports, dashboards, and solutions for improved process visibility.
- Trained users on new features, maintained strict data security, and supported both Lightning and Classic interfaces.

❖ **Salesforce Business Analyst / Administrator**
Penna Cement Industries Ltd — Dec 2014 – Oct 2021

- Managed and improved Salesforce for multiple business units (sales, service, marketing), with direct integration to SAP for account, order, and invoice processing.
- Designed and managed automated workflows, validation rules, and security assignments.
- Led CRM administration and provided business analysis, supporting project lifecycles from requirement gathering to go-live and support.

KEY PROJECTS:

Project Name	Description & Role
Client Management (Manual)	Added Sales Rep info in extra fields; restricted duplicate data.
Client Management (Automation)	Automated assignment of Sales Rep values to client teams using admin tools.
Legal Denied Party Screening	Led integration of Salesforce with Ripjar for customer compliance screening.
Tableau Dashboards	Delivered key Tableau reports and dashboards to support management decisions.
General User Tickets	Administered and resolved user support tickets, ensuring business continuity.
User Stories	Addressed user issues as Admin/Business Analyst, from requirement analysis to resolution.
Account Master (SAP Integration)	Enabled creation of account records fully integrated with SAP.

Keshagoni Raghavender Goud

Order Management (SAP Integration)	Managed process for order punch and seamless SAP integration.
Invoice Generation (SAP Integration)	Linked Salesforce orders to SAP for real-time invoice checks.
Collection Management (SAP Integration)	Enabled payment creation and reconciliation between systems.
Visit Management	Managed check-in/check-out features and reporting for field visits.
Realization & Amount Calculator	Developed solutions for realization and margin calculation by material, region, etc.
Campaign Management (Sales Cloud)	Supported full campaign lifecycle through Salesforce.
Complaint Management (Service Cloud)	Tracked and resolved complaints for customer satisfaction.
Mason Scheme (Service Cloud)	Tracked scheme details, including points and sales incentives.

EDUCATION:

- **M.Tech in Computer Science & Engineering**, JNTU Hyderabad (2014–2017)
- **B.Tech in Information Technology**, JNTU Hyderabad (2009–2013)

CERTIFICATIONS:

- **Salesforce Administrator (WI20).**

TECHNICAL PROFILE:

- **CRM & ERP**: Salesforce (Sales, Service, Marketing Clouds), SAP (Functional Integration)
- **Reporting Tools**: Tableau, Salesforce Reports/Dashboards
- **Languages**: Familiar with Apex basics, JavaScript
- **Integration/Tools**: MuleSoft, SAP, REST/SOAP (admin perspective), Data Loader, Validation Rules
- **Other**: Requirement Documentation, User Training, Business Analysis, Change/Release Management
- **Development Exposure**: Strong understanding of Salesforce development, able to coordinate with developers, review code, but not personally writes custom Apex/VF/LWC code.
- **Business Analyst Experience**: Three years of experience translating user requirements, technical specifications, and cross-system integration, especially between SAP and Salesforce.
- **Functional Integration**: Recognized for the ability to link business needs across CRM and ERP, ensuring high data quality and process efficiency without direct programming.
