EXPERIENCE

Pegasus InfoCorp, Mumbai— Senior Software Developer
Oct 2022 - present | Javascript | Node Js | SQL | Microservices | Sequelize | ElasticSearch | React Js | Next Js

- Spearheaded the development and enhancement of a large-scale fintech application, driving consistent monthly lead generation of 1 lakh plus users.
- Onboarded 40,000+ users to the production environment, ensuring a smooth transition and superior user experience that contributed to sustained lead growth.
- Collaborated on core fintech modules, leveraging deep financial tech expertise to build high-conversion features supporting monthly lead generation goals.
- Engineered complex application logic aligned with product workflows, optimizing performance to scale for 1 lakh plus monthly leads.
- Crafted simple, effective solutions for complex business and technical challenges, directly enhancing reliability and lead acquisition capacity.
- Identified and resolved key software issues, significantly improving stability and boosting user engagement, leading to higher monthly lead influx.
- Led end-to-end software implementation, from planning to deployment, enabling infrastructure to seamlessly handle 1 lakh plus new leads per month.

AlgoOcean, Mumbai— Software Developer
May 2021 - Oct 2022 | Javascript | Node Js | Nest Js | PostgreSQL | AWS | React JS

- Delivered 5+ projects across social media and e-commerce domains, building feature-rich and high-performance backend solutions.
- Designed and developed scalable, secure, and maintainable APIs using NestJS, aligning with client requirements and industry best practices.
- Built modular, extensible API architectures to support future enhancements and ensure long-term maintainability.
- Collaborated in cross-functional teams to troubleshoot issues, optimize API performance, and ensure seamless frontend-backend integration.
- Integrated 10+ third-party services and databases, maintaining smooth data flow and consistency across applications.
- Implemented robust validation, error handling, and authentication mechanisms to enhance API reliability and security.
- Wrote clean, well-documented code and participated in 50+ code reviews to uphold high standards of code quality.

Outmarch, Remote —Associate Software Developer
Jan 2020 - May 2021 | Javascript | Node Js | SQL | AWS | Mongodb | React JS

- Delivered a robust e-commerce application used by 50,000+ users, scalability, performance, and user experience.
- Designed and built a ticket management system from scratch using Node.js and MySQL, handling 10,000+ tickets monthly with modular, maintainable, and efficient code.
- Implemented automated testing with Jest, achieving 90%+ test coverage and significantly reducing regression issues.
- Created comprehensive API documentation using Postman, improving development efficiency and enabling seamless collaboration with 5+ frontend and QA team members.

EDUCATION

Amity University **MCA**
July 2023 - July 2025

Mumbai University **Bsc.IT**
July 2018 - July 2021

L.S.Raheja College **HSC**
July 2016 - July 2018

SKILLS

Language, Framework, Environment:
JavaScript, TypeScript, Node.js, NestJS, Express.js, React.js, Next.js

Databases:
MySQL, PostgreSQL, MongoDB

Testing:
Postman

API Development:
RESTful APIs, API Documentation (Postman, Swagger)

Tools & DevOps:
Git, GitHub, GitLab

Authentication & Security:
JWT, OAuth2, Bcrypt, Helmet.js, Role-based Access Control (RBAC)

Other Skills:
Microservices Architecture, MVC Pattern, Agile Methodology, CI/CD Pipelines, Code Review, Debugging

Certification:
Certified Relevel Backend Developer
Certified Udemy Full Stack Developer
