NITTISH KAPUR

kapur_nitish@yahoo.com | +91 78890-32416

QA Professional with ~9 years of experience in **Manual Testing, Salesforce, Mobile & API Testing** across Finance, Retail (E-Commerce), Medical, Cloud, and SaaS domains. Strong background in Agile methodologies, test strategy, and mentoring QA teams. Proven hands-on experience in **AI Testing (NLP/LLM Chatbots, AI-powered applications),** seamlessly integrating traditional QA strengths with advanced AI-driven testing practices.". Proficient with tools like Jira, Postman, MongoDB, SQL, and Power BI. Open to opportunities as an ***Immediate Joiner***.

WORK EXPERIENCE

ITC Infotech, India
Associate IT Consultant *Jun 2022 – Jul 2025*

- Coordinated test strategies and plans with project managers, ensuring alignment with project objectives and timelines.
- Developed detailed test plans, created comprehensive test cases, and executed testing activities, ensuring thorough coverage and quality.
- Collaborated with cross-functional teams to define acceptance criteria, identify risks, and ensure full test coverage.
- Specialized in testing SAP Commissions and ICM systems for incentive compensation accuracy.
- Tested AI-powered chatbot and LLM-based applications, validating intent recognition, context switching, and fallback/error handling.
- Conducted exploratory testing of NLP-driven conversational flows to assess accuracy, tone, and consistency of AI responses.
- Performed functional, regression, UI/UX, and compatibility testing on iOS and Android devices.
- Mentored and managed a team of QA analysts to deliver consistent and thorough test coverage.
- Reviewed requirements, specifications, and technical design documents to provide meaningful feedback and quality assurance guidance.
- Ensured non-functional quality checks like response time, usability, and accuracy of AI chatbot systems.
- Monitored test results, adapted planning based on outcomes, and introduced metrics to measure test progress and product quality.

Bebo Technologies, India
Module Lead *Jan 2016 – Sep 2021*

- Defined entry, exit, and acceptance testing criteria, ensuring comprehensive validation of application functionality and performance.
- Verified mobile app and backend interaction by validating REST API responses using tools like Postman.

- Experienced in Salesforce Testing, including functional, integration, regression, and UAT, ensuring seamless CRM performance and data integrity.
- Led the testing team, contributing to project activities such as development and integration testing while managing multiple testing efforts.
- Executed backend data validation via complex SQL queries on MySQL/PostgreSQL, ensuring integrity and consistency.
- Participated in Localization, Accessibility, and lightweight performance testing.
- Analyzed business requirements, functional designs, and business rules to develop effective test strategies and scenarios.
- Reviewed AI chatbot conversational logs and reported issues related to bias, irrelevance, or misinterpretation in LLM responses.
- Validated multi-turn conversations for AI systems, ensuring context retention and escalation to fallback/human agent where necessary.
- Coordinated the usage and assignment of test environments with stakeholders, and provided input on test automation strategy and tool selection.
- Analyzed functional and non-functional requirements to identify testable user stories and acceptance criteria for mobile applications.

ACHIEVEMENTS / LEADERSHIP EXPERIENCE

- **Spearheaded a project** that significantly improved software testing efficiency, earning recognition for **outstanding QA performance**.
- Implemented enhanced testing processes that **reduced bug detection time** and **increased overall software quality**.
- Excellent communicator and collaborator, known for **cross-functional team alignment and proactive QA ownership.**
- Worked closely with **developers, product owners, and designers in Agile/Scrum environments** to provide feedback and suggest improvements.
- **Led a team in optimizing** manual test processes, improving test coverage and efficiency, and reducing overall **testing effort by 40%.**

EDUCATION

Master of Computer Applications
Chitkara University, India | 2015

Professional Development (2021–2022):
Took a short professional sabbatical while residing temporarily outside India, focused on freelancing initiatives, QA upskilling, test strategy workshops, and staying current with emerging testing tools and AI practices.

TECHNICAL SKILLS

- **Certification**: Certified Software Engineer by Wells Fargo
- **Testing Methodologies & Types:** Functional Testing | Regression Testing | System Testing | Integration Testing | UAT Testing | Security Testing | Automation Testing| API Testing | Mobile Testing (iOS & Android) | Performance Testing | Database Testing
- **Tools & Technologies:** Selenium | Jira | Postman | SoapUI | Bugzilla | Charles Proxy | TestLink | TFS | BrowserStack | SauceLabs | Eclipse | Salesforce Inspector | Microsoft SQL Server | Mongo DB
- **AI Testing Skills:** NLP/Chatbot Testing (Dialogflow, Rasa, LLM apps) | Fallback/Error Handling | Multi-turn Conversation Testing | LLM Response Validation (accuracy, bias, hallucinations) | AI-assisted Testing Tools (Applitools Eyes and Test Rigor) | Power BI Dashboard Validation | Exploratory AI Testing (recommendation & personalization systems)
- **Databases & Query Languages:** SQL | MySQL (Query Execution, Data Validation, Integrity Testing)
- **Domains & Industries:** Finance | Retail | Medical | E-commerce | Banking | Loan Processing | Cloud-based Applications | Soft AI | SaaS
