Experienced Oracle HCM Functional Consultant, specializing in Fusion Cloud implementations, seeking a Consultant position within the IT industry to leverage expertise in Core HR, security, and data migration to optimize HR processes and drive business value. Proven ability to gather requirements, design custom solutions, and configure various HCM modules to meet unique business needs, contributing to successful project outcomes.

Professional Summary

- Oracle HCM Functional Consultant with experience in Fusion Cloud implementations and support across diverse modules.
- Proficient in requirements gathering, gap analysis, custom solution design, and module configuration (Core HR, Absence Management, Payroll, Security).
- Hands-on experience with technical tools including HDL Loader, Spreadsheet Loader, OTBI, Dashboard, Fast Formulas, and HCM Experience Design Studio.
- Experience in creating HCM Extracts & Custom Reports using subject areas in OTBI & BI Publisher (BIP).
- Expertise in developing and modifying data roles, security profiles, job roles, application roles, and duty roles within Oracle HCM Cloud.
- Exposure to AIM (Application Implementation Methodology) and OUM (Oracle Unified Methodology) for Oracle HCM implementations.
- Proven ability to streamline recruiting & onboarding processes through Core HR integrations related to the FORD Project.
- Experienced with the configuration of Absence plans, Absence Types, eligibility profiles, derived factors and repeating periods.
- Involved in Configuring the AOR and creating security profiles based on the AOR's in FORD project.
- Worked with clients like Northwell health, FORD and EXXON
