Oracle Fusion Techno function (EPM,HCM,ERP),OIC

PROFESSIONAL SUMMARY

- Techno-Functional Oracle Applications Consultant with 15 years of comprehensive experience across Oracle EPM, Fusion Cloud (ERP, HCM, Payroll, OTM), E-Business Suite, and Oracle Integration Cloud (OIC). Proven ability to bridge functional requirements and technical execution, delivering end-to-end solutions and complex integrations for global enterprises.
- Techno-Functional EPM: Expertise in EPBCS (Financials, Workforce, Capital, Projects), EPCM, Tax Reporting, and EDMCS. Hands-on in full life-cycle EPM Cloud implementations, designing complex business rules, and managing cross-module dependencies.
- Fusion ERP & HCM: Strong functional and technical skills in Financials, Global Payroll, and Time & Labor (OTL) integrations with Payroll/Projects. Experience in Inventory, Purchasing, Order Management, and Manufacturing cloud modules.
- Integration & Automation: Advanced OIC integrations (App-Driven & Scheduled Orchestrations, FTP, Publish/Subscribe), REST/SOAP web services, HCM Data Loader, FBDI for Projects/POs, and RIB v13/v16 with RICS.
- Technical Development: Fusion BI/OTBI reporting, BIP, HCM Extracts, ADF pages, sandbox customization, Groovy scripting, and custom object design.
- Administration & Security: SaaS environment management, patching, system monitoring, auditing, custom role/security design, and environment refreshes.
- Architecture & Leadership: Oracle Solution Architect (Financials) adept at aligning financial systems to corporate strategy, ensuring scalability, automation, and compliance

Professional Experience:

- Worked as a Associate consultant, Tata Consultancy Services, 2023 to Feb 2025.
- Worked as Senior Consultant, Emtec Software India Pvt Ltd,Bangalore, 2022 to 2023.
- Worked at Aurigene pharmaceutical Services Ltd as techno-functional Developer,Bangalore 2020 to 2022.
- Worked at Aurigene Discovery Technologies Ltd as techno-functional Developer, Bangalore 2016 to 2020.
- Worked at Aurigene Discovery Technologies Ltd as Manger, Bangalore, 2009 to 2016
- Worked at Chembiotek,Administrator,Kolkata,West Bangal 2007 to 2009
- Worked at Surya Pharmaceutical Ltd,Executive,Chandigarh 2005 to 2007

Eduacation:

- M B A, Indian Institute of Management(IIM), Calcutt 2017 to 2018
- M.Sc., Andhra University 2003 to 2005
- B.Sc., Andhra University 2000 to 2003
- Diploma in Computer Application 2000
- Intermediate(X11) 1998 to 2000
- SSC(X) 1998

.

Project Profile 1

Organization : Aurigene Discovery Technologies Ltd
Client : Eli-lilly,Dove pharma,
Duration : May-2009 to Sept 2016
Role : Manager,Techno-Functional Developer
Team Size : 10

PROJECT DESCRIPTION:

Aurigene is a clinical stage biotech company committed to bringing novel therapeutics for the treatment of cancer and inflammation. Based in Bangalore and Kuala Lumpur, Aurigene has fully integrated Drug Discovery & Development infrastructure from Hit Generation to Clinical Development to the clients of Sanofi, Orion pharma.Orion is a globally operating Finnish pharmaceutical company - a builder of well-being. Orion develops, manufactures and markets human and veterinary pharmaceuticals and active pharmaceutical ingredients. The company is continuously developing new drugs and treatment methods.

Resopnsibilities:

- Implemented and supported Oracle EBS R12 modules including Financials (GL, AP, AR), HRMS, Payroll, OTL, Inventory, Purchasing, and Order Management.
- Designed and developed PL/SQL packages, procedures, and triggers to meet complex business requirements.
- Built and customized Oracle Reports, XML Publisher (BI Publisher) reports, and Discoverer workbooks for financial and HR reporting.
- Developed and maintained interfaces and conversions using Oracle APIs, SQL*Loader, and FBDI to migrate legacy data (items, POs, employees, payroll data).
- Created and maintained workflow customizations (AME and standard Oracle Workflow) for approval hierarchies in HR, Payroll, and Finance.
- Integrated Oracle Time & Labor (OTL) with Payroll and Projects modules, including setup of elements, time categories, approval periods, and workflow notifications.
- Managed Inventory and Purchasing configurations, including item templates, sourcing rules, and receiving/inspection setups.
- Performed system administration: user access management, responsibility and role setup, profile options, and concurrent program scheduling.
- Delivered functional and technical documentation—MD50/MD70 (functional/technical design), MD120 migration plans, and test scripts.Coordinated patching, cloning, and environment refreshes, collaborating with DBAs and infrastructure teams.Provided end-user training and post-production support, resolving incidents and implementing enhancements to improve business processes

Project Profile 2

Organization : Aurigene Discovery Technologies Ltd
Client : Orion Pharma,
Duration : Sep-2016 to Sept 2020
Role : Manager,Techno-Functional Developer
Team Size : 10
Environment : Fusion

PROJECT DESCRIPTION:

Aurigene is a clinical stage biotech company committed to bringing novel therapeutics for the treatment of cancer and inflammation. Based in Bangalore and Kuala Lumpur, Aurigene has fully integrated Drug Discovery & Development infrastructure from Hit Generation to Clinical Development to the clients of Sanofi, Orion pharma.Orion is a globally operating Finnish pharmaceutical company - a builder of well-being. Orion develops, manufactures and markets human and veterinary pharmaceuticals and active pharmaceutical ingredients. The company is continuously developing new drugs and treatment methods.

Resopnsibilities:

- Oracle EPM Cloud & Tax Reporting,Implemented and supported Oracle EPM Tax Reporting Cloud solutions for multinational clients,Gathered and analyzed finance/tax requirements; designed and configured reporting structures to meet local and international tax standards.
- Developed, tested, and deployed Tax Reporting applications following Oracle EPM best practices.Delivered end-user training and provided ongoing techno-functional support to finance and tax teams.Oracle Fusion ERP / HCM
- Built and customized Fusion BI/BIP reports, including Purchase Order Print, Transfer Order (with FTP bursting), Custom Price List, and Check Print reports.Designed dashboards, infolets, data models, and templates to meet business reporting needs.
- Created Fast Formulas for Payroll and Absence management and configured Approval Management hierarchies.Automated HCM Data Loader (HDL) and FBDI processes using Oracle Integration Cloud (OIC) and web services.
- Developed OIC integrations to load GL Daily Rates and other transactional data into Oracle ERP Cloud.
- Time & Labor / Workflowntegrated Oracle Time and Labor (OTL) with Human Resources, Payroll, Projects, and EAM, providing flexible time-entry layouts and highly configurable approval processes.Implemented workflow-driven processes to compress cycle times, reduce operating costs, and lower staffing requirements, with monitoring via Workflow Monitor.
- Additional Development & Documentation Delivered Expense Report Application using Visual Builder Cloud Service (VBCS).Worked on Inventory Management and CIS functional enhancements.Prepared comprehensive technical and functional documentation (MD200, MD120, FS, DS, migration documents) to support implementations and upgrades.

Project Profile 3

Organization : Aurigene Pharmaceutical Seriveces Ltd
Client : Sanofi,Novartis
Duration : Sep-2020 to Oct 2022
Role : Manager,Techno-Functional Developer
Team Size : 10
Environment : Fusion

ROJECT DESCRIPTION:

- At Sanofi, we chase the miracles of science to improve people's lives
- Novartis is reimagining medicine to improve and extend people's lives. As a leading global medicines company, we use innovative science and digital technologies to create transformative treatments in areas of great medical need.

Responsibilities:

- Oracle EPM Cloud – Implemented and supported EPBCS and Tax Reporting solutions for budgeting, forecasting, and statutory reporting. Designed complex business rules, created data integrations, and provided end-user training and ongoing techno-functional support.
- Oracle Integration Cloud (OIC) – Built and maintained app-driven and scheduled orchestrations, REST/SOAP web-service integrations, and publish/subscribe flows. Automated HCM Data Loader (HDL) and FBDI processes and developed integrations to load GL Daily Rates into ERP Cloud.
- Oracle Fusion HCM & Payroll – Developed Fast Formulas for Payroll and Absence and integrated them with HCM Extracts. Created and scheduled extracts, applied security, and generated payroll/HR reports using BI Publisher (BIP).
- Reporting & Analytics – Designed and delivered OTBI and BIP reports, sub-templates, dashboards, and infolets across Financials and Procure-to-Pay modules. Registered reports in ESS jobs with appropriate role-based security.
- ERP / SCM Cloud – Contributed to functional and technical enhancements in Inventory, Purchasing, Order Management, and Manufacturing Cloud modules.
- Database & Customization – Created and maintained tables, views, and sequences in development and production environments using Oracle SQL/PLSQL and Toad. Performed Fusion personalizations and custom page layouts to meet client requirements.

Project Profile 4

Organization : Emtec software India Private Ltd
Client : **Entertainment Partner**
Duration : Nov 2022 to May 2023
Role : Senior consultant
Team Size : 6

PROJECT DESCRIPTION:

Discover the latest news, trends, data, events, and industry moves impacting productions.

Responsibilities:

- Oracle Fusion Financials – Configured AR, AP, GL, FA modules, including new ledger creation, security rules, and multi-ledger reporting.
- Oracle EPM Cloud – Supported Budgeting, Forecasting, and Tax Reporting activities by coordinating with finance teams and performing reconciliations for month-end close. Assisted in Smart View and Financial Reporting Studio template updates for management reporting.
- Requirements & Analysis – Led business requirements gathering, process mapping, and gap analysis; documented solutions using MC050, AN100, BP080, and TE040 standards.
- Database Development – Created and maintained database tables, views, and sequences in development and production using Toad.
- HCM & Payroll – Designed Fast Formulas for payroll calculations, overtime/allowance eligibility, absence validation, and compensation/benefits processing. Built HCM Extracts and U.S. Bank check templates with MICR support.
- Testing & Training – Conducted CRP, UAT, and end-user training sessions; prepared test scripts, SOPs, and solution documentation.
- Production Support – Delivered day-to-day support for AP, AR, GL, FA, and EPM modules, performing month-end close, reconciliation (AP→GL, AR→GL, Cash Management), and issue root-cause analysis.
- Enhancements & Upgrades – Supported Oracle Cloud quarterly release testing and implemented new features/enhancements for both ERP and EPM environments.
- Fixed Assets Expertise – Trained users on mass-additions, direct asset creation, depreciation posting, and FA period close procedures.

Project Profile-5

Organization : Tata consultancy services
Client : Biogen Inc
Duration : Jun 2023 to Apr 2024
Role : Solution Architect

Biogen Inc. is an American multinational biotechnology company based in Cambridge, Massachusetts, specializing in the discovery, development, and delivery of treatments for neurological diseases worldwide.

Project Responsibilities – Tata Consultancy Services | Biogen Inc.

- Oracle EPM Cloud – Implemented and supported EPBCS (Financials, Workforce, Capital, Projects), EPM Tax Reporting, and EPCM, delivering scalable planning, budgeting, forecasting, and tax-reporting solutions.
- Integrations – Designed and developed integrations using Oracle Integration Cloud (OIC) with REST/SOAP services and FDI, ensuring secure, automated data movement between ERP, HCM, and EPM systems.
- Automation & Advanced Tech – Utilized Python scripting and AWS services (Lambda, Step Functions, EventBridge) to automate EPM processes and monitoring.
- Data & Metadata – Managed hierarchies and mappings with EDMCS, Smart View, and Financial Reporting Studio.
- Techno-Functional HCM Lead – Delivered full-cycle Oracle HCM Cloud implementations covering OTL (Oracle Time & Labor) and Absence Management, including complex Fast Formulas for payroll calculations, eligibility rules, absence validations, and time-card validations.

- Custom Reporting & Dashboards – Built OTBI dashboards, custom BI Publisher reports, and interactive infolets for Finance and Procure-to-Pay modules; applied ESS-job security and sub-template architecture.
- Database & Development – Created and maintained database tables, views, and sequences in development and production using Oracle SQL/PLSQL and Toad.
- Process Leadership – Gathered business requirements, performed gap analysis, and reviewed functional designs to propose technical approaches using Agile delivery and design-thinking methodologies.
- Deployment & Support – Managed CI/CD pipelines for EPM deployments, led UAT, provided go-live and post-go-live support, and authored detailed functional and technical documentation.
- Team & Stakeholder Management – Acted as Techno-Functional Lead, mentoring onshore/offshore teams, conducting knowledge-transfer sessions, and engaging directly with business stakeholders for solution design, demos, and training.
- Cross-Functional Integration – Coordinated with finance, HR, and IT teams to integrate HCM Cloud with external timekeeping and payroll systems, ensuring seamless, accurate data flow.

Project Profile-6

Organization : Tata consultancy services
Client : S A B (Saudi awwal Bnank)
Duration : A p r 2024 to Feb 2025
Role : Solution Architect
Team Size : 12
Environment : Oracle Fusion,OIC

SAB is a leading financial institution with a paid-up capital of SAR 20.5 billion, offering integrated corporate banking, investment, private banking, and treasury services.

Responsibilities:

- Enterprise Finance Architecture – Designed and delivered the complete Oracle Fusion Financials architecture for a global finance-transformation program, including COA structure, multi-ledger setup, and multi-country reporting frameworks.
- Integration Leadership – Architected and implemented OIC-based integrations between Oracle ERP and external systems such as Banks, ARIBA, SUNTEC, Payroll, and Treasury, covering real-time and batch processes.
- HCM & Payroll – Led end-to-end Oracle HCM Cloud implementations (OTL & Absence), developing advanced Fast Formulas for payroll calculations, eligibility rules, and time-card validations.
- Custom Reporting & Analytics – Built financial dashboards and operational reports using OTBI, BI Publisher, Smart View, and optimized SQL queries for decision-support analytics.
- Process Optimization – Streamlined Accounts Payable and Ariba integrations, improving invoice processing, supplier management, and payment workflows while ensuring IFRS, GAAP, and local tax compliance.

- Data Management – Managed data migration, archival, and purging strategies for integration files, ensuring storage optimization and adherence to retention policies.
- Real-Time Interfaces – Delivered secure, real-time integrations for payments (Oracle AP → HUB), supplier master (Ariba → Oracle AP), invoice attachments, and GL/payroll journal flows using SOAP/APIs and SFTP.
- Project Budget Control – Automated daily integrations for project budgets and commitments between Oracle AP and Ariba to maintain accurate financial tracking.
- Cloud Platform Support – Administered and monitored Oracle ERP, EPM, and OTM SaaS environments: instance refreshes, quarterly patching, performance tuning, and service-request management in coordination with Oracle Support.
- Security & Compliance – Managed user roles and auditing across ERP, EPM, and OTM; enforced secure file transfer and encryption standards; ensured compliance with Oracle RMC and internal governance policies.
- Environment & DevOps – Oversaw backup/recovery, configuration migrations (OIC, BIP, BICC, ESS jobs), and CI/CD deployment of reporting and integration objects.
- Stakeholder Engagement – Conducted fit–gap workshops with controllers, produced solution blueprints, and led UAT, training, and cutover activities.Advanced Forecasting – Leveraged OCI Data Science for AI-driven planning and predictive financial modeling.

Achievements and Certification:

- Certified in Oracle Multi cloud services
- Certified in Oracle Database SQL Fundamental
- Certified in Oracle PLSQL Developer Associate
- Certified in Oracle Cloud Platform Application Integration
- Certified in Oracle Cloud Platform Application Integration Professional
- Certified in Oracle Cloud Infrastructure AI Foundations Associate
- Certified in AWS Cloud architect
- Certified in Azure architect AZ900 Microsoft azure fundamentals,Azure AI Fundamentals
- Az-104:Azure Administrator Associate,.Azure Developer Associate(Az-204)
