SKILLS

Backend and Server Side Technology: Node.js, Express.js, JavaScript, TypeScript

API and Architecture: REST APIs, Microservices, OAuth 2.0, Authorization, Authentication, Keycloak

Databases and Caching:- MongoDB, CosmosDB, PostgreSQL, SQL, Redis

Message Brokers: Kafka

Observability and Monitoring:- OpenTelemetry - Tracing, Matrics, ElasticSearch, Kibana, Logs Collection

Testing and Debugging: Postman, Mocha, Jest, Debugging, Unit Testing, Integration Testing

Development Tools:- OpenSourceTech, Docker, CI/CD, Git, GitHub, Ansible, Agile

Operating Systems and Infrastructure: Windows, Linux, RHEL, CentOS, Load Balancing

Cloud Platform and Services: AWS - S3, EC2, Azure

LANGUAGES

English

PROFILE

- Software Engineer with 4+ years of experience designing and optimizing high-performance web architectures.
- Engineering production grade Node.js microservices capable of handling 10K+ RPM, deploying through GitHub for CI/CD automation, Jest for test coverage, and Git for collaborative version control.
- Specialized in building scalable Node.js microservices for demanding production environments.
- Designing distributed event driven architectures using Kafka to enable real-time data processing at scale.
- Optimizing MongoDB deployments to achieve consistent sub 50ms query performance.
- Delivering scalable backend solutions that drive measurable product improvements..

EMPLOYMENT HISTORY

Software Engineer at Excellon Software Pvt.Ltd, Pune
July 2022 — Present

Technology Stack: JavaScript, TypeScript, Express.js, Node.js, CI/CD, Git, OpenTelemetry, ElasticSearch, Jest, Chai Mocha, Keycloak, AWS Services - EC2, S3.

- Designed and implemented high-performance robust JavaScript, Express, and Node.js, optimizing performance to reduce average API response time.
- Implemented GitHub workflows to automate our CI/CD pipeline, ensuring consistent performance while accelerating release cycles by 40%. This enhancement elevated user experience and boosted customer satisfaction scores by 25%.
- Pioneered test driven development (TDD) with Jest & Chai Mocha, achieving 80% test coverage and reducing production defects by 35%.
- Secured the platform by implementing Keycloak based IAM (OAuth 2.0, OpenID Connect), enabling RBAC and eliminating unauthorized access incidents.
- Built secure Keycloak automation APIs that transformed user lifecycle management, replacing a 10 minute manual process with a 30 second automated solution featuring comprehensive data validation.
- Leveraged AWS cloud services (EC2, S3, SNS, SQS, DynamoDB) to build scalable, event driven architectures, improving system resilience and cost efficiency.

Associate Software Developer at Excellon Software Pvt.Ltd, Pune
July 2021 — July 2022

Technology Stack: JavaScript, Node.js, MongoDB, CosmosDB, PostgreSQL, OpenTelemetry.

- Developed with performance-optimized high-performance Node.js microservices utilizing CosmosDB (MongoDB API) for scalable document storage and PostgreSQL for ACID compliant transactions.
- Reduced system latency by 35% under 10K+ RPM loads through database tuning, query optimization, and strategic indexing, while improving query performance by 40% via refined Cosmos DB, SQL synchronization.
- Enhanced observability with structured logging, metrics collection, and distributed tracing (OpenTelemetry), enabling faster debugging and performance monitoring.
- Transformed our service architecture by migrating to nano services with MongoDB, accelerating feature delivery by 30% and cutting cloud costs by 40% through efficient resource utilization.

Software Development Intern at Ekatta Pvt.Ltd, Chhatrapati Sambhaji Nagar
August 2020 — February 2021

Technology Stack: JavaScript, Node.js, Java, SQL.

- Developed full-stack applications using Node.js, Express.js, MongoDB, and ReactJS, delivering seamless end-to-end functionality and responsive user interfaces.
- Engineered and maintained backend systems with Java and SQL databases, ensuring robust performance and data integrity.
- Optimized SQL query performance through targeted research query tuning and execution plan analysis.

EDUCATION

Bachelor of Computer Engineering, Marathwada Institute of Technology, Chh. Sambhaji Nagar, India
July 2017 — November 2020

Diploma of Computer Science, MGM'S Polytechnic College, Chh. Sambhaji Nagar, India
June 2013 — April 2017

CERTIFICATIONS

Red Hat Certified System Administrator (RHCSA)
July 2017 — November 2020
