Vijay, has over 16+ years of professional software experience in designing, building and supporting Oracle EBS solutions, Oracle fusion and Oracle Integration Cloud for various clients.

Professional Summary:

- Experience in all phases of the system implementation and support life cycle and good technical skills in developing RICE Components in the domain of Oracle Applications E-Business Suite.
- Expertise includes working with the following Oracle technologies: **PL/SQL, Conversions, interfaces, SQL* Loader, Oracle Reports, XML Publisher Reports, Oracle Workflow, Form personalization and OAF.**
- Expertise In Oracle EBS modules like **PO, AP, OM, AR, INV, GL, TM, I Supplier, I Procurement and Incentive and compensation.**
- Good Experience in **OTBI** and **BI Publisher** Reports.
- Experience in developing **OICS** to handle data transformations and orchestrate interfaces between third-party systems and Oracle Cloud applications.
- Responsible for solving Integration Issues and resolving all open issues for reporting changes according to the business requirements.
- Performed various management activities like managing a team of 8+ resources, work allocation etc.

Professional Experience:

- **Hitachi Vantara**
  January 2022 – Present
  Currently employed, focusing on Supporting Multiple clients on Oracle EBS, Oracle Fusion and Oracle Integration Cloud.
- **Cognizant Technology Solutions**
  November 2013 – January 2022
  Contributed to various Oracle E-Business Suite projects, enhancing functionalities in Finance and SCM modules.
- **TESCO**
  December 2012 – November 2013
  Engaged in the development and maintenance of Oracle applications, ensuring seamless integration and performance.
- **Technosoft Corporation**
  January 2011 – December 2011
  Focused on developing and optimizing PL/SQL procedures and reports within Oracle applications.
- **Sonata Software Ltd**
  September 2007 – December 2010
  Worked on various Oracle-based projects, specializing in SQL, PL/SQL, and report generation.

Projects and Assignments:

#1.	EMEA Oracle ERP Support
Role	Senior Consultant
Duration	Feb-24 to- Till Date
Environment	Oracle Applications

Applications: Oracle EBS, Oracle Fusion and Oracle Integration Cloud.

Roles & Responsibilities:

- Interacting with business users and functional consultants to gather requirements and prepare gap analyses.
- Preparing solution design documents and identifying key objects for development.
- Working on PL/SQL objects, OTBI reports, and BI Publisher reports.
- Developing integrations using Oracle Integration Cloud Service (OICS), ensuring efficient data exchange and process automation.
- Preparing and reviewing technical specification documents.
- Participating in code reviews and migration activities.

#2.	Nutrien
Role	Senior Consultant
Duration	Mar-23 to Dec-23
Environment	Oracle Applications

Applications: Oracle EBS R12

Roles & Responsibilities:

- Collaborated with business users and functional consultants to gather requirements and conduct gap analyses.
- Prepared solution design documents and identified key components for development.
- Developed Oracle Application Framework (OAF) pages, extensions, interfaces, and reports to meet business needs.
- Prepared and reviewed technical specification documents to ensure alignment with project standards.
- Participated in code reviews and managed the migration of code across environments.

#3.	Netscout
Role	Senior Consultant
Duration	Jan-22 to Jan-23
Environment	Oracle Applications

Applications: Oracle EBS R12.

Roles & Responsibilities:

- Collaborated with the business team to discuss new changes, enhancements, and effort estimations.
- Assessed the feasibility of proposed changes and developed proof of concepts to validate solutions.

- Assisted the business team in preparing MD50 Functional Specification Documents.
- Worked on Oracle Application Framework extensions.
- Prepared and reviewed Technical Specification Documents, such as MD70, ensuring adherence to quality standards.
- Collaborated with the business team during user testing phases to ensure requirements were met and defects were addressed.
- Identified application-level gaps and proposed process improvements in consultation with the business team.

#4.	**Oshkosh Corp**
Role	Technical Consultant
Duration	Apr-16 to Dec-21
Environment	Oracle Applications

Oracle EBS Applications: I Supplier, Purchasing and Sourcing.

Roles & Responsibilities:

- Evaluated the feasibility of proposed changes and developed proof of concepts to validate solutions.
- Assisted the business team in preparing MD50 Functional Specification Documents.
- Developed Oracle Application Framework (OAF) pages, extensions, and interfaces to synchronize data from third-party systems into the application.
- Prepared and reviewed Technical Specification Documents, such as MD70, ensuring adherence to quality standards.
- Collaborated with the business team during user testing phases to ensure requirements were met and defects were addressed.
- Identified application-level gaps and proposed process improvements in consultation with the business team.

#5.	**VMware**
Role	Technical Consultant
Duration	Nov-13 to- Mar-16
Environment	Oracle Applications

Roles & Responsibilities:

- Analyzed and interpreted Functional Specification documents to provide feasible technical solutions.
- Developed PL/SQL objects, including Packages, Procedures, and Functions, in accordance with specified requirements.
- Designed and implemented Extensions and Interfaces to synchronize data from third-party systems into Oracle Applications.
- Prepared Technical Specification Documents adhering to established quality standards.
- Collaborated with the testing team to identify and resolve defects, ensuring software quality and reliability.
- Maintained the code repository in Perforce and managed code releases to upper environments.

#6.	**TESCO**
Role	Technical Consultant
Duration	Dec-11 to- Nov-13

Environment	Oracle Application Release 12

Roles & Responsibilities:

- Analyzed and interpreted Functional Specification documents to provide feasible technical solutions.
- Registered Concurrent Programs, Executables, Request Groups, Menus, Value Sets, and Request Sets within Oracle Applications.
- Developed PL/SQL objects, including Packages, Procedures, and Functions, in accordance with specified requirements.
- Designed and implemented Extensions and Interfaces to synchronize data from third-party systems into Oracle Applications.
- Prepared Technical Specification Documents, such as MD70 and Technical Design (TD), adhering to established quality standards.
- Collaborated with the testing team to identify and resolve defects, ensuring software quality and reliability.
- Maintained the code repository in Team Foundation Server (TFS) and managed code releases to upper environments.

#7.	**DELL**
Role	Technical Consultant
Duration	Jan-11 to- Dec-11
Environment	Oracle Application Release 12

Roles & Responsibilities:

- Engaged with the business team through regular status calls to discuss project progress and gather requirements.
- Analyzed Change Requests and Functional Specification documents to provide feasible technical solutions.
- Registered Concurrent Programs, Executables, Request Groups, Menus, Value Sets, and Request Sets within Oracle Applications.
- Developed Oracle Application Framework (OAF) pages to facilitate the uploading of master data.
- Authored and maintained PL/SQL Packages, Procedures, and Functions in accordance with provided specifications.
- Designed and implemented interfaces to synchronize data from third-party systems into the application.
- Prepared Technical Specification Documents, such as MD70 and Technical Design (TD), adhering to established quality standards.

#8.	**Hero Majestic**
Role	Technical Consultant
Duration	Sep-09 -to- Dec-10
Team Size	6
Environment	Oracle Application Release 12 – implementation

Roles & Responsibilities:

- Analyzed client business processes and legacy systems to map requirements to Oracle Applications, providing feasible technical solutions.
- Registered concurrent programs, executables, request groups, menus, value sets, and request sets within Oracle Applications.
- Developed and customized reports using Oracle reporting tools to align with specific customer requirements.

- Generated reports in CSV format by leveraging stored procedures and PL/SQL packages.
- Developed control files for loading master supplier data using SQL*Loader.
- Implemented form personalization to enhance user interface behavior without altering base code.
- Extracted and prepared master data for loading into Oracle Applications.

#9.	**AMCO**
Client	AMCO Batteries
Role	Technical Consultant
Duration	Dec'08-to- Aug'09
Team Size	8
Environment	Oracle Application Release 12 – implementation

Roles & Responsibilities:

- Analyzed client business processes and legacy systems to map requirements to Oracle Applications, providing feasible technical solutions.
- Registered concurrent programs, executables, request groups, menus, value sets, and request sets within Oracle Applications.
- Developed and customized reports using Oracle reporting tools, aligning them with specific customer requirements.
- Authored and maintained PL/SQL packages, procedures, and functions to support application functionality.
- Developed control files for loading master supplier data using SQL*Loader.
- Implemented form personalization to enhance user interface behavior without altering base code.

#10.	**SUPPORT APPS**
Client	Essilor and ORBIT (Internal project)
Role	Technical Consultant
Duration	Jun-08 -to- Nov-08
Environment	Oracle Applications 11.5.10 and R12, Oracle Reports, XML Publisher Reports, SQL*Loader and PL/SQL..

Roles & Responsibilities:

- Understood diverse client environments, support processes, and development standards.
- Resolved production defects to maintain system stability and performance.
- Registered concurrent programs, executables, request groups, menus, value sets, and request sets.
- Extensively utilized XML Publisher to develop and customize reports.
- Modified existing codebases to align with evolving requirements.
- Developed packages, procedures, and functions to enhance application functionality.
- Prepared technical documentation adhering to established quality standards.

Education:

Bachelor of Technology (JNTU), India - 2007.
