6.Company: ZORO, UK Oct 2020 to Mar 2021

PROJECT # 6

Client: ZORO

Role: Salesforce Support Engineer

- Understanding and Analyzing the Business Requirements Document.
- Design and implementing Lightning Web components.
- Created Triggers and Apex Classes.
- Created Scratch orgs from SFDX with VS Code, also created packages.
- Worked on a Agile Environment
- Created Record Pages using Lighting App Builder.
- Design and Invoking the Process Builders to automate the Business Process .
- Used Developer console to update classes. and to execute sosl queries.
- Used SOQL & SOSL with consideration to Governor Limits for data manipulation needs of the application using platform database objects
- Involved in Unit Testing and Test Coverage for Triggers.
- Involved in Deployment Process.
- Integrated SAP to Salesforce using SOAP API.

7.Company: Cloud odyssey, UK. Aug 2020 to Oct 2020

PROJECT # 7

Client: Randstad

Role: Salesforce Data Migration

- DB2 to Salesforce Data migration
- Used DB Visualiser to query(SQL Queries) and extracted data.
- Talend Open Studio transformations using tmap's to combine data and integrate to salesforce.
- Regular field mappings in Excel for Japanese data and transiting to useful salesforce data.
- Worked on a Agile Environment
- Migrated 600 tables from DB2 to Salesforce.
- Worked on Excel for Preparing Mapping Documents.
- Used Excel for Vlookup and Pivot tables.

8.Company: Deloitte Aug 2019 to Jan 2020

PROJECT # 8

Client: Deloitte, USA.

Role: Salesforce QA

- Preparing, Reviewing and Executing Test Cases.
- Performed Smoke Testing, Functional Testing, Integration Testing, System Testing, Regression Testing and Compatibility Testing.
- Design and Invoking the Workflows to automate the Business Process.
- Responsible for customizing custom fields, Page Layouts, Record Types, Workflows and Approval Process, Validation Rules, Report Types.
- Designed and developed Lightning Components for various functional needs in the application.
- Involved in writing Business logics using Apex.
- Involved in creating a web services with legacy mainframes system using SOAP integration.
- Responsible for Loading data into salesforce.com using Apex Data Loader.

9.Company: Capgemini India pvt ltd, Hyderabad FEB 2019 TO AUG 2019

PROJECT # 9

Client: General Electric, Global.

Role: Salesforce QA

- Understanding and Analyzing the Business Requirements Document.
- Preparing, Reviewing and Executing Test Cases.

- Performed Smoke Testing, Functional Testing, Integration Testing, System Testing, Regression Testing and Compatibility Testing.
- Implemented Workflows & Approval Process.
- Implemented validation rules.
- Implemented the Communities and Sites.
- Created and managed custom objects, fields and formulas.
- Deployment into client's environment using Change set.

10.NTT DATA Global Delivery Services, Chennai Jan 2017 to Jan 2019

PROJECT # 10

Client: Integra Life sciences, France.

Role:Salesforce Data migration Tester

- Preparing Metadata components required for the migration
- Used ANT to export Meta data components and Created package.xml file.
- Creating Custom fields including formula fields.
- Creating Workflow rules (Email Alerts), Process Builder, Flows.
- Involved in deploying meta data components for different salesforce orgs using ANT.

- Monitor and manage exception logs for back end system integration with SFDC.
- Migrated from US Salesforce Org to EMEA Salesforce Org.

PROJECT #11

Client: Financial force, UK

Role: Salesforce Admin & QA

- Preparing, Reviewing and Executing Test Cases.
- Performed Smoke Testing, Functional Testing, Performance testing, Integration Testing, System Testing, Regression Testing and Compatibility Testing.
- Design and Invoking the Workflows to automate the Business Process
- Build integration services with SAP using REST.
- Created Relationships according to the requirement.
- Worked on different Standard and Custom objects and record types.
- Used SOQL & SOSL with consideration to Governor Limits for data manipulation needs of the application using platform database objects

PROJECT #12

Client: BMW, Germany

Role: Salesforce QA

- Preparing, Reviewing and Executing Test Cases.

- Performed Smoke Testing, Functional Testing, Performance testing, Integration Testing, System Testing, Regression Testing and Compatibility Testing.
- Used SOQL with consideration to Governor Limits for data manipulation needs of the application using platform database objects.
- Defined lookup and master-detail relationships on the objects and created junction objects to establish connectivity among objects.
- Created Workflow Rules, Tasks, Email Alerts, and Components to suit to the needs of the application.
- Developed and configured various Reports.
- Migrated 14.5 Million records from mainframes to salesforce.
- Used MS Access to split data into chunks.
- Used MS Excel to create Vlookups and Pivot tables.
- Created Reports and dashboards to visually present the data.

11.Company: Jeevan Technologies, Chennai JULY 2014 TO DEC 2016
PROJECT # 13
Client: Deloitte , USI.
Role: Salesforce Admin & QA

- Understanding the User Requirements.
- Creating Profiles, Roles, Permissionsets, Sharing Rules & OWD.
- Used Developer console to update records, debug classes and tested Apps.
- Involved in Building Reports and Dashboards.
- Involved in Data Loader from Taleo to SFDC.
- Manage system changes without interruption to the user.
- Communicate system changes to the users in advance so they understand the change and how to use it prior to implementation.
- Maintain, enhance and create workflows, functions and configurations within the Salesforce.com environment.
- Identified defects, reported and interacted with development team to resolve them.
- Handled test case design and its execution.
- Preparing, Reviewing and Executing Test Cases.
- Performed Smoke Testing, Functional Testing, Integration Testing, System Testing, Regression Testing and Compatibility Testing.
