Ravi Kumar

Software Engineer

✉ **ravikumarchowdary415@gmail.com**

📞 **9901354153**

📍 Bangalore, Karnataka

Profile summary

Having **4.1 years** of experience in various areas of Software Development.

- **Web Development:** Extensive experience in developing highly interactive web- based applications using **Python, Django, Flask, Fast API.**
- **Python Proficiency:** Strong knowledge of **Python data structures and algorithms.**
- **Database Management:** Hands-on expertise in designing, implementing, and optimizing **MongoDB, PostgreSQL** databases.
- **MongoDB Integration:** Proficient in integrating MongoDB with various applications and platforms to ensure seamless data management and retrieval.
- **Scalable Solutions:** Proven track record in developing scalable solutions and enhancing database performance to meet business needs. Skilled in **data modelling, indexing strategies** and **query optimization techniques**.
- **Object-Oriented Programming:** Solid understanding and application of **Object-Oriented Programming (OOP)** concepts.
- **Database knowledge:** Familiar with **MySQL/SQL, PostgreSQL** databases and their declarative query languages.
- **Front-End Technologies:** Basic understanding of front-end technology **HTML, CSS.**
- **Version Control:** Proficient in using code versioning tools like **GIT, Bitbucket.**
- **Docker Proficiency:** Good experience with **Docker** containers.
- **Linux Commands:** Hands-on experience with **Linux commands**.
- **Analytical and Problem-Solving:** Excellent analytical, problem-solving and programming skills.
- **Teamwork:** Ability to handle multiple tasks and work effectively as part of a team.

Work Experience

- Working as Software engineer at **Mphasis** from **Mar 2025 to Present.**
- Worked as Analyst in **HUDL** from **Nov 2022 to Mar 2025.**
- Worked as Software associate in **HCL** from **Jun 2021 to Sep 2022.**

Professional Experiences

Mphasis

Title: Global Integrated Order Management System

Role: Software engineer

Technologies: Python, Django, MySQL, GIT, Docker Linux, Jira, Bamboo, Bitbucket

Description: AT&T is the largest provider of local and large distance telephone services in the United States and sales digital subscriber line internet. It supports broadband functionalities like ordering, billing, and servicing.
It is a requirement for GIOM to be migration to the existing system, with a different framework design.
Integrated Order Management System (GIOM) provide to process different orders coming from different external systems.

Responsibility:

- By using Python on Django Web Framework designed backend and created database schema to represent and support business.
- Developing views and templates with Python and Django's view controller and templating language to create a user-friendly website interface
- Involved in building database Model, APIs and Views utilizing Python to build an interactive web-based solution.
- Working with MySQL database on simple queries and writing Stored Procedures for normalization
- Creating Business Logic using Python to create planning and tracking functions.
- Django APIs to access the database by using python Django Template developed the customer service.

HUDL

Title: Hudl Sports Analytics Platform

Role: Analyst

Technologies: Python, Flask, PostgreSQL, Docker, Jenkins, Pytest, Git, Jira, RESTful APIs, HTML

Project Description:
Hudl Sports Analytics Platform is a web-based application built with Flask that provides video analysis and performance insights for athletes, coaches, and teams. The platform allows users to upload, process, and review game footage, tag key moments, and generate performance statistics. It supports secure media storage, multi-user collaboration, and role-based access for teams at different levels. The system integrates with PostgreSQL for scalable data management, leverages Docker for containerized deployments, and uses Jenkins for automated CI/CD pipelines.

Responsibility:

- **API Development:** Designed and developed RESTful APIs in Flask for video upload, tagging, and performance analytics workflows.
- **Authentication & Security:** Implemented secure authentication and role-based access control for teams, athletes, and coaches.
- **Database Design & Media Management:** Built features for media storage, retrieval, and video playback optimization integrated with PostgreSQL, and optimized queries and schema for handling large data volumes.
- **Containerization & CI/CD:** Developed Dockerized microservices and configured Jenkins pipelines for automated build, test, and deployment.
- **Testing & Quality Assurance:** Wrote unit and integration tests using Pytest, and participated in code reviews to maintain high-quality standards.
- **Agile/Scrum Participation:** Collaborated in an Agile/Scrum environment using Jira for sprint planning, task tracking, and bug fixing.

Version Control & Collaboration: Utilized Git for version control, contributing to collaborative development workflows.

HCL

Title: Customer Relationship Management (CRM) Web Application & API Integration

Role: Software Associate

Technologies: Python, Django, Fast API, MySQL, PostgreSQL, AWS, Docker, CI/CD.

Description: Developed a CRM web application to streamline customer interactions, manage sales pipelines, and automate marketing campaigns. Utilized Django, DRF, and Fast API for backend and micro services, with AWS services like Lambda, S3, and Secrets Manager for scalability. Managed PostgreSQL and MySQL databases and used Docker for containerized deployments in an Agile environment.

Responsibility:

- **API Development**: Designed and developed RESTful APIs using Django and DRF for efficient client-server communication and seamless integration with third-party services.
- **Database Design & Management**: Created and managed PostgreSQL and MySQL databases, ensuring optimized schema design, efficient queries, and smooth data migration
- **AWS Integration**: Utilized AWS Lambda for serverless compute, AWS S3 for secure file storage, and AWS Secrets Manager for handling sensitive information securely
- **Containerization & CI/CD**: Leveraged Docker for containerization of applications, ensuring consistency across all environments, and set up CI/CD pipelines for streamlined deployment.
- **Performance Monitoring**: Implemented AWS CloudWatch to monitor application performance, set up logging and alerts for proactive issue resolution, and ensure system reliability.
- **Agile/Scrum Participation**: Collaborated with cross-functional teams in an Agile environment, actively participating in sprint planning, backlog grooming, and daily standups

Issue Resolution & Optimization: Diagnosed and resolved production issues promptly, optimized database queries, and application code to enhance system performance and user experience.

Technical Skills

- **Language**: Python
- **Web Framework**: Flask, Django, Fast API
- **Cloud Services**: AWS Lambda, S3, SQS, Secrets Manager, CloudWatch.
- **Databases Technology**: MYSQL, MongoDB, PostgreSQL
- **Project Management:** Docker, Jira, Confluence, Swagger, Postman
- **Version control & Deployment:** GitLab, Bitbucket, GitHub, Jenkins
- **Libraries:** NumPy, Pandas

Education

Graduation: BCA in Computer Science, Bangalore University.
