PROFESSIONAL SUMMARY

Certified **AWS DevOps Engineer** with **4.4 years of experience** in deploying, automating, and managing secure cloud infrastructure. Proficient in **AWS Services**, **CI/CD Pipelines**, **Infrastructure as Code (IaC)**, containerization with **Docker/Kubernetes**, and cloud-native monitoring solutions. Successfully delivered cloud solutions for **US-based clients** across healthcare, e-commerce, and finance sectors. Adept at collaborating with cross-functional teams in Agile environments to accelerate software delivery and ensure high system reliability.

CORE COMPETENCIES

- **Cloud Platforms**: AWS, Azure, Google Cloud
- **CI/CD & DevOps Tools**: Jenkins, GitLab CI/CD, AWS CodePipeline, CodeDeploy
- **Infrastructure as Code**: Terraform, AWS CloudFormation, Ansible
- **Containerization**: Docker, Kubernetes, Amazon EKS/ECS
- **Monitoring & Logging**: AWS CloudWatch, Prometheus, Grafana, ELK Stack
- **Scripting**: Bash, Python, Shell scripting
- **Security**: IAM, VPC, KMS, SSL/TLS, Security Groups
- **Version Control**: Git, GitHub, Bitbucket
- **OS & Server Management**: Linux (Ubuntu, CentOS), Windows Server

---

PROFESSIONAL EXPERIENCE

AWS DevOps Engineer

Accenture, Pune
June 2021 – Present

- Built and maintained secure, scalable cloud infrastructure on AWS for multiple US-based clients.
- Developed automated CI/CD pipelines using **Jenkins**, **GitLab CI**, and **AWS CodePipeline**, improving deployment speed by 50%.

- Provisioned AWS resources using **Terraform**, ensuring consistent and auditable infrastructure across environments.
- Migrated legacy systems to AWS using **EC2**, **S3**, **RDS**, reducing on-prem operational costs by 30%.
- Integrated monitoring tools like **CloudWatch**, **Datadog**, and **Grafana** to identify performance bottlenecks and alert on anomalies.
- Implemented **role-based IAM policies**, S3 bucket encryption, and VPC security groups for secure access and compliance.
- Automated patching, backup, and server provisioning with **Ansible** to reduce manual intervention by 40%.
- Collaborated with development teams to containerize applications using **Docker** and deploy on **EKS**.

KEY PROJECTS

1. CI/CD Monitoring & Automation Dashboard

Client: Ridgewood Retailers
Duration: June 2021 – February 2023
Tools: AWS CodePipeline, GitLab CI/CD, Datadog, Python

- Designed and automated CI/CD workflows across development and QA environments.
- Integrated deployment notifications into **Microsoft Teams** using GitLab Webhooks.
- Pushed pipeline logs to **Datadog**, enabling real-time monitoring of build failures and latency trends.
- Built dashboards to track deployment success rates and alert on anomalies.

---

2. Cloud Infrastructure Modernization

Client: Harbor Health Systems
Duration: March 2023 – January 2024
Tools: AWS EC2, S3, RDS, Terraform, Ansible, CloudWatch

- Migrated EHR and claims management platforms to AWS cloud.
- Used **Terraform** to provision EC2, S3, RDS, and IAM resources with reusable modules.
- Set up **CloudWatch alarms and dashboards** for application health, disk usage, and network metrics.
- Ensured HIPAA compliance through encryption (KMS), access control, and backup policies.

---

3. Serverless Deployment & Infrastructure Automation

Client: Crestline Financial Group
Duration: February 2024 – Present
Tools: AWS Lambda, API Gateway, DynamoDB, CloudFormation, Jenkins

- Deployed serverless applications using **Lambda**, **API Gateway**, and **DynamoDB**.
- Created **CloudFormation templates** to automate infrastructure deployment.
- Integrated serverless applications into Jenkins pipelines, reducing deployment time by 40%.
- Applied IAM roles, logging, and versioning to ensure secure, auditable cloud operations.

EDUCATION

Bachelor of Computer Applications (BCA)
Nagpur University – Graduated: 2022
