Profile

Data Engineer with 6.2 years of IT experience, including 4 years of expertise in Azure-based data engineering solutions. Skilled in designing scalable data pipelines, building big data processing workflows and delivering secure, high-performance data platforms leveraging Azure Data Factory, Azure Databricks, Synapse Analytics, ADLS and Hadoop ecosystem. Adept in SQL, PySpark, Python and modern DevOps practices to ensure data availability, reliability and efficiency for enterprise analytics.

Technical Skills

Cloud computing:	Azure Data Factory, Databricks, Azure Synapse Analytics, ADLS
Data Engineering Tools:	Azure DevOps, Data Modelling, ETL/ELT data Pipeline
Streaming Technology:	Spark structured streaming
Programming Languages:	Python, SQL
Big Data Technologies:	Spark, PySpark, Spark SQL, Hadoop, Hive

Experience

Convergint August 2024 - Present

Data Engineer *Bangalore, India*

- Designed and developed scalable ETL pipelines using Azure Data Factory to orchestrate data ingestion from diverse on-premises and cloud sources.
- Developed and optimized data transformation pipelines in Azure Databricks using PySpark, leveraging partitioning, caching and Delta Lake for enhanced performance.
- Built data models and analytical solutions in Azure Synapse Analytics, enabling near real-time reporting and large-scale data analysis.
- Developed and optimized SQL queries, stored procedures and performance tuning for high-volume transactional and analytical workloads.

Perfexion Information Technology October 2020 - July 2024

Data Engineer *Hyderabad, India*

- Designed and developed scalable ETL pipelines in Azure Data Factory to integrate diverse on-premises and cloud data sources.
- Built and optimized big data processing workflows in Azure Databricks using PySpark for data cleansing, transformation and aggregation.
- Implemented data modeling and analytics solutions in Azure Synapse Analytics, enabling high-performance querying and reporting.
- Designed and optimized complex SQL queries and Python scripts to ensure efficient data retrieval and processing.
- Ensured data governance, security and performance optimization across ADLS, Azure Data Factory, Databricks and Azure Synapse environments.

Cognizant Technology Solutions June 2019 - September 2020

Big Data Engineer *Chennai, India*

- Designed and developed data ingestion and transformation pipelines using Hive, SQL, Sqoop and MapReduce to process large-scale datasets.
- Designed and optimized HDFS-based data storage solutions, ensuring scalability, high availability and efficient data retrieval.

Education

JNTU Hyderabad Hyderabad, Telangana

Master of Technology in Computer Science Engineering *July 2016 - June 2018*
