VAMSI KRISHNA MADALA

Ph.: 9440194688 | Email: madala.vamsikrishna9@gmail.com

Sr. QA Automation Engineer | 8+ Years | Selenium | Appium | API Testing | CI/CD | SQL | AI in Testing

SUMMARY

- **QA Automation Engineer with 8+ years of experience** in building scalable test automation frameworks, API testing, and integrating tests into CI/CD pipelines. - Deep knowledge on QA frameworks, Languages and tools such as **Java, SQL, Selenium, Jmeter, Jenkins , Junit , Accelq and Prompt Engineering**
- Being customer-focused, team-oriented and taking ownership of assigned tasks are few of my +ve traits.

SKILL SET

Languages: C,C++, Java, Python.
Web Technologies: HTML5, CSS3, JavaScript (ES6), jQuery
Testing Framework: Selenium Webdriver, UIAutomator, Appium, Appium Inspector, TestNG, JUnit.
Tools: Git, Postman, Jenkins, REST, JMeter, Docker, SOAP UI, JIRA, SauceLabs.
Database system: MySQL, MS SQL server 2008,MongoDB, Oracle 11g
AI & Automation: Prompt Engineering (ChatGPT, OpenAI API)
Scripting: LINUX Shell Scripting
Project Tools: JIRA, Agile, Confluence

PROFESSIONAL EXPERIENCE

Fanatics

Sr. Quality Engineer — *Hyderabad, TS, IND,* ***July 2024 - July 2025***

- Test Strategy & Planning: Develop and maintain comprehensive test strategies and detailed test plans that align with the overall QE strategy.
- Test Automation: Develop, maintain, and execute automated tests using various frameworks and tools Selenium & Appium & Integrate automated tests into CI/CD pipelines like Jenkins, GitHub Actions.
- Design and execute API tests using tools such as Postman, REST Assured, or SoapUI. Validate API responses, ensure data accuracy, and check for compliance with specifications.
- Hands-on experience in database design, performance optimization and developed stored procedures, triggers and views using **SQL.**
- Collaborate effectively with developers, product managers, and other stakeholders throughout the SDLC.

Qentelli

Sr. Software Engineer — *Hyderabad, TS, IND,* ***Oct 2021 - July 2024***

- Validated bug fixes and performed re-testing and smoke testing to ensure product stability.
- Experience in automating test cases using Selenium, Java, Junit and Eclipse for functional testing. Testing the API parameters used for the scanner appliances using the server side JavaScript scripting.
- Experience in testing web services and technologies being used with web services **(REST and JSON, XML, HTTP, Web Server)**. Familiar with Software Development Life Cycle processes**(SDLC)** and (STLC).

ServiceNow

Software QA Engineer — *Hyderabad, TS, IND,* ***Jan 2021 - Jul 2021***
Software QA Engineer — *San Diego, CA, USA,* ***Feb 2019- Dec 2020***
Associate QA Engineer — *San Diego, CA, USA,* ***Jan 2018-Feb 2019***
Software Quality Engineer Intern — *San Diego, CA, USA* ***May 2017- Dec2017***

- Designed and implemented an Automation test framework on web applications using Selenium WebDriver and TestNG as the test framework with a Page Object Model design pattern.
- Hands-on experience with working on Test Automation framework for Mobile**(IOS, Android)** and Web Applications.
- Responsible for creating and designing **Test Plan, Test Design Documentation, Manual Test cases, Automation Testing, Database Testing** and **Performance Testing**.
- Highly experienced in **API testing - RESTful**
- Created and executed detailed test cases and reported bugs, ensuring proper defect tracking and closure.
- Worked on various Test Automation Tools for Reports, Cloud device Management tools like **Browser stack, Perfecto, SauceLabs**

PROJECTS

Spatial Data on Map Viewer (Java Application) ***April 2016 – May2016***

- Created relational databases in Oracle 11g for Image coordinates. Used Eclipse for developing Java EE Application and accessed database from a Java Application using JDBC.
- Databases Management-Creating, updating & deleting tables in SQL, PL/SQL and connecting the ORACLE to JAVA through drivers (JDBC). Used many other SQL queries in the processes of updating tables.

Client-Server Socket Programming ***Feb 2016-Mar 2016***

- Creation of a TCP socket having a client server communication between three different UNIX servers using C. - Successfully created the shell scripts to test the data transfer through the socket application.

Marathon Registration Site ***Oct 2013-Dec 2013***

- **Technologies**: HTML, CSS, JavaScript
- Description: This is a marathon registration site, in which each user gets registered for the marathon. - Login is provided and the details of each individual user are stored in the database and shows up every time he logs in, and provides the basic operation of validating the form.

EDUCATION

Master of Science – Computer Science ***Aug 2015 – Dec 2017***
San Diego State University, California, USA

Bachelor of Technology – Electronics and Communication Engineering ***Aug 2011 – May 2015***
Acharya Nagarjuna University, Guntur, India
