PROFESSIONAL OVERVIEW

Integration Architect and Technical Leader with a proven track record in delivering AI-driven, scalable solutions on Oracle Cloud and Fusion ERP. Certified in OIC, OCI, and Gen AI with expertise in Oracle 23ai DB, RAG, and vector embeddings. Experienced in leading high-performing teams to deliver intelligent, future-ready enterprise solutions that transform cloud and integration landscapes in Oracle

WORK EXPERIENCE

AI Driven Procurement Automation - Integrations Manager
AI Innovations | PWC

- Automated PO creation by processing purchase orders received via email, extracting relevant data using AI models and creating quotes in CPQ
- OIC, OCI functions, GenAI Document service and REST APIs are used

Intelligent Product Mapper - Oracle 23ai Vector DB Specialist
AI Innovations | PWC

- Architected and implemented a high-precision matching system using Oracle 23ai's vector embedding and Retrieval-Augmented Generation (RAG) to semantically match supplier items with existing ERP catalog items.
- This solution enabled accurate item identification, automated price benchmarking, and generated supplier recommendations, helping users identify the best-value options and reduce manual effort in sourcing decisions.

Mainframe-Oracle ERP- OFFSA Integration
TD Bank , Canada | PWC

- Spearheaded the integration of mainframe systems with Oracle ERP General Ledger and OFSAA using Oracle Integration Cloud (OIC) and BI Publisher reports, ensuring accurate and timely financial data flow across platforms.
- Acted as Scrum Master, coordinating daily standups, tracking progress, removing blockers
- Coordinated with cross-functional teams and client team to accelerate delivery and maintain alignment with business objectives.

EMPLOYMENT HISTORY

PWC (Nov2023-Present)

Wipro Technologies (March 2022 – Nov2023)

Oracle Financial Services & Software -OFSS (Aug 2014-March 2022)

Accenture Services Private Limited (Feb 2006 – March 2012).

QUALIFICATION

Bachelor of Technology in Computer Science & Engineering from Cochin University of Science & Technology

ERP Transformation - Integrations Manager
DHL – Reimagine Project | Wipro

- Led the design and delivery of global integrations for Oracle ERP Cloud, including end-to-end solutions for Purchase Order imports via FBDI and invoice processing for AP and AR modules using OIC.
- Collaborated across cross-functional teams to integrate third-party HR systems with Oracle HCM Cloud, driving seamless data exchange and automation.
- Managed the development environment and took ownership of technical quality, ensuring stability, scalability, and on-time delivery

Oracle Banking Platform – Integration developer
Banking Product |Oracle

- Integrate account origination processes in Oracle Sales Cloud (OSC) and Oracle Banking Platform (OBP) with Siebel Universal Customer Master (UCM) as master data management solution.
- Worked on application tracker and Account contact Address sync to UCM

National Australia Bank – Principal Consultant
OBP Customization |Oracle

- Led the User Interface (UI) development team for the OBP Enterprise Release, delivering ADF customizations aligned with client-specific banking workflows.
- Acted as Scrum Conductor, facilitating sprint planning, daily stand-ups, and sprint reviews to drive Agile delivery across UI and OSB teams.
- Drove implementation of reusable ADF taskflows, enhancing maintainability and accelerating development across modules.

Nokia.com portal – System Analyst
Nokia | Accenture Services

- Developed and maintained Nokia.com pilot sites using Oracle WebLogic Portal 12c, ensuring content delivery across global markets.
- Supported and enhanced the Find & Compare application using ActionScript, improving product comparison experience for end users.
