DEEPAK JADHAV (B.E. in Electronics and Communication Engineering)

E-Mail: dajadhav98@gmail.com

Mobile: 7619282982, Ambedkar Nagar, Chikodi, Karnataka - 591201

Summary

Python Programmer available to fulfil all requirements of the position of Python Programmer with a reputable company in need 4.6 Years Hands on experience of Python, MySQL, Pandas, Spark, Aws, Linux,dockerExcellent problem-solving skills, good interpersonal skills, committed, result oriented, hardworking and enthusiastic to learn new technologies.

Work experience and Projects

Total 4years of Experience as a PYTHON DEVELOPER

@ A&H Infotech Private limited, Bengaluru (May 2021 – Present)

Projects at A&H Infotech:

- Worked in Chartmetric raw Project : Data from CSV file to loading into MySQL tables using Pandas, CSV and Request Libraries Writing python scripts for loading and unloading the data.
- Worked in Nielsen Project : Data from CSV file to loading into MySQL tables using Pandas,CSV and Request Libraries Writing python scripts on Linux server for loading and unloading the data.
- Worked in SFTP and MRC Project : Used to create Dataframe using pandas from a CSV generated file and storing it into stage and main tables respectively Used various delimiters to remove special characters and symbols from the generated data.
- Worked in API Charts Project : Used to get the data from xml sheets and storing it in MySQL tables using Dataframes.
- Worked in Data Collector Project : Used to get the input data from client server and those will be dividing into various fields like Enrich data Consumer files and Non-Consumer files Data used to store in datalake-core in Main and Reporting Db by writing the code on Linux server with pyspark,and AWS Crawler.
- Real Time Data Exchange (RDX) Platform, Tools and Services (Deezer) Project : Offer secure, realtime access to services and data from existing and 3rd party systems across the SME digital landscape in a consistent, reliable manner, with lifecycle event notifications to trigger, loosely coupled, cross systems choreographies,stack used-python,Linux,aws,MySQL.

Responsibilities:

- Developed and maintain ETL pipelines using Python and SQL Database.
- Used Python scripting and various libraries to load and unload data, create data frames.
- Technologies implemented: Python, Regex, Data extraction, Spark, ETL Process.
- Knowledge in Deployment and worked in Amazon Web Server (AWS).
- Created and managed job clusters on Databricks, executing jobs and actively monitoring production process.
- Specialized in developing and automating production jobs using Pyspark and SQL, conducting ETL operations on production data.

Technical Skills

Operating System	: Windows7, Windows10, Linux (Ubuntu).
Programming Languages	: Python Programming Language, Basic of C
Others	: Known Skills in Python like RegEx, Pandas, NumPy, ML, Pyspark, Request libraries, AWS, Basic of Django, HTML, CSS, Redis, Kafka, Linux Big Data.
Database	: MySQL, Redshift , Postgresql

Education Details

- Bachelor of Engineering: Electronics and Communication Engineering [2020]

  Grade: First Class (6.83/10.00)

- PUC (XII) [2016]

  Grade: First Class (69.50%)

- SSLC (X) [2014]

  Grade: First Class (68.32%)

Personal Details

DOB	: 19/10/1998
Languages Known	: English, Hindi, Marathi, Kannada

PLACE: CHIKODI
