# Manoj Nitchenametla

*Sr. Automation Test Engineer / Test Lead – PlayWright & Selenium*

📱 +91 8885608028 | ✉️ manu.n14@gmail.com | 📍 Hyderabad, India

## PROFESSIONAL SKILL SET SUMMARY:

- 12 years in **Automation & Functional Testing**
- 2 yrs with **Playwright** & TypeScript, building robust frameworks.
- 3 yrs with **Selenium** WebDriver (Java) & BDD-Cucumber-Gherkin.
- 3 yrs with **UFT** for desktop & legacy automation.
- 2–3 yrs in **functional testing on UI, API & DB**
- 2+ yrs as **QA Lead**, driving strategies & mentoring teams.
- Experience exploring **AI-enhanced automation** to improve test coverage and reduce maintenance overhead.

## PROFILE SUMMARY:

- Senior QA Automation Engineer with 11.5 years of experience in automation and functional testing across Web, API, and Desktop applications.
- Proven expertise in building scalable test automation frameworks using **Playwright (TypeScript)**, **Selenium (Java, BDD-Cucumber)**, and **UFT**.
- Experienced in integrating **AI-powered testing tools** and intelligent test analytics to optimize regression cycles and defect detection.
- Skilled in CI/CD integration with Jenkins, test management in JIRA, and advanced reporting using Allure.
- Adept at collaborating with cross-functional teams, leading QA strategy, and mentoring teams for high-quality deliverables in agile environments.

## CORE COMPETENCIES:

| | |
|---|---|
| **Automation Testing** | PlayWright with TypeScript (Leveraging AI Integration) |
| | Selenium JAVA with cucumber and Gherkin, UFT |
| **Scripting Languages** | Typescript(PlayWright), JAVA (Selenium) |
| | VB Script (UFT) |
| **Applications** | Web based (Salesforce, ServiceNow, Mulesoft)<br>Desktop based (SAP R3)<br>API Testing |
| **IDEs** | IntelliJ, VScode (with CoPilot), UFT |
| **Testing Frameworks** | Keyword, Data-Driven, Hybrid Frameworks, BPT |
| | TestNG, BDD (Cucumber & Gherkin) |
| **Test Supporting tools** | ALM, SQL Server |
| | Swagger, Postman |
| | Jenkins, QAS dashboards, Allure Reports |
| | JIRA, Rally, TFS (Team Foundation Server) |
| | Splunk - Log fetching |

## RECENT POCs LEVERAGING AI TO IMPROVE TEST EFFICIENCY AND ACCURACY.

(1) **AI Powered Test Case Generation** - Analyzing the application flows, previous bugs and others to generate test cases by passing human misses.
(2) **Self-healing Locators** - Self-healing locators use AI to find the same element by context even if its technical details change, Reducing test maintenance efforts.
(3) **Predictive Defect Analysis** - Referring to historical data of bugs module wise, it can warn the tester that which parts of your app are most likely to have issues in future releases.
(4) **AI driven Visual regression testing** - AI compares the new UI screenshots with older versions and spots visual differences.

## TECHNICAL PROJECTS:

***Project #1*** **: Connect Multi Asset / PlayWright-TypeScript, Selenium-JAVA**
Firm : Intercontinental Exchange
Team Size : 6
Role : Leading a team of 6, Individual contributors for a module called Options.
***Description:***
CMA (Connect Multi Asset) is an application which acts as a broker website for Trading like Options, Futures, Shares. I have led the team of 6 monitoring as well as partially contributing for the deliverables.

***Project #2*** **: J&J CAR-T / Salesforce & Mulesoft**
Business : Deloitte (3rd party payroll -Tek Systems)
Team Size : 5
Role : Track lead for backlog Automation of Salesforce application with Selenium BDD cucumber framework, API Testing
***Description:***
CAR-T is an application named after the CAR-T cells which are used to cure cancer. This application used Salesforce as an application to track the cancer treatment starting from cells collecting from the body, manufacturing drugs, till infusing it into the patient's body. We use Selenium with the BDD-Gherkin framework to automate API and UI components.

***Project #3*** **: Service Now**
Firm : Apps Associates
Team Size : 3
Role : Senior Consultant in Automation testing UFT testing tool in Keyword framework approach.
***Description:***
Service Now (SNOW) is a user issue tracking and solving platform / application which has been used across a few organizations for IT requests. I have automated end to end functionality of SNOW for most of the modules starting from issue creation to sharing surveys on resolutions.

***Project #4*** **: Interact – Special Pricing**
Business : BA Continuum Solutions (Bank of America)
Vendors : Accenture, TCS, Infosys.
Team Size : 8
Role : Automation test engineer using UFT testing tool, SPOC from client QA
***Description:***
Interact is an end to end customer banking functions application which includes credits, debits, credit cards, loans and supportive functionalities. Pricing engine is to apply special pricing to the product opening or maintenance based on the eligibility of the customer, mostly IRA – Retirement accounts in the US.

***Project #5*** **: ATM Technology**
Firm : Tech Mahindra
Team Size : 13
Role : Automation test engineer using RTM tool, part of migration to Selenium.

***Description:***

We are testing majority of the ATM functionalities like Get Cash, Fast Cash, Cheque Deposit, Cash Deposit, Managing the preferences (Language, Fast Cash denominations), PIN change, Check balances, etc., on FIS ATM simulators like Hyosung, NCR, Diebold.

I was In charge of the physical ATM lab as an added responsibility.

## FIRMS I HAVE SERVED:

- Sr. QA Automation Engineer / Team Lead in ICE Data Services
- Team Lead in TEK systems (for Deloitte)
- Senior Consultant in Apps Associates
    - Automated an end-to-end application as a solo tester from the team.
- Worked as a Sr. Software Test Engineer in Aegan Technologies.
    - Received multiple Client Appreciations for Test Suite and planning Excellency.
- Worked as Quality Analyst -1 in BA Continuum Solutions Pvt.Ltd., (non-banking subsidiary of Bank of America)
    - Received Gold (2), Silver (4) awards for successful completion of critical projects in defined time lines with very minimal production issues.
- Worked as an Associate Software Engineer in Tech Mahindra
    - One of the active participants among the team was awarded Best team in quarterly results.

## EDUCATIONAL DETAILS:

| Course | School\College | Specialization/ Stream | Marks in Percentage | Year of Pass |
|---|---|---|---|---|
| Bachelor of Technology | Malla Reddy College of Engg & Tech – JNTU University, Hyderabad | Electronics & Communication Engineering | 70.73 | 2013 |
| Board of Intermediate | Narayana Junior College | MPC | 89.2 | 2009 |
| Board of Secondary Education | Aditya High School | SSC | 86.5 | 2007 |

## KEY CAREER STRENGTHS/ COMPETENCIES:

- Versatile experience working in both **client** and **vendor** environments, enabling a strong grasp of processes, stakeholder needs, and cross-team collaboration.
- Skilled at building **positive, productive workplace relationships** through active participation in team initiatives and engagement activities.
- Strong **analytical and problem-solving mindset**, capable of diagnosing complex issues quickly and delivering practical solutions.
- Quick to adopt **emerging tools and technologies**, with recent focus on **AI-driven testing concepts**
- Highly effective in both **collaborative team settings** and **independent work**, balancing autonomy with open communication.
- Adaptable to diverse organizational cultures, with a proven track record of delivering quality outcomes under evolving priorities.

- **MANOJ NITCHENAMETLA.**
