PROFESSIONAL SUMMARY:

- Over **9+ years of experience in Software Testing**, specializing in **Quality Assurance for Web-based applications**, with strong proficiency in **Core Java** and modern automation frameworks.
- Proven expertise in **Regression Automation and Manual Testing**, with hands-on experience across **Insurance, Educational, Healthcare** domains.
- Skilled in **Functional Test Automation** using **Selenium WebDriver**, **TestNG**, with understanding of **element handling**, **test execution**, and **defect reporting**.
- Successfully led automation initiatives using **AccelQ**, a codeless automation tool, by creating reusable actions and streamlining test execution.
- Worked on **Playwright** with JavaScript, demonstrating cross-browser automation and faster UI validations.
- Experience working with **Salesforce**, Siebel, CPQ validating complex workflows and integrations.
- Leveraged ChatGPT to accelerate test case authoring and scenario generation—reducing QA cycle times by up to 30%.
- Good Experience on **API Testing** using **POSTMAN**, validating RESTful services, and ensuring seamless backend communication.
- Executed Selenium Testcases and reported Defects.
- Browsers Compatibility Testing using Browser stack.
- Skilled in mobile testing, ensuring quality assurance of mobile applications across various platforms, enhancing user experience.
- Experienced in using **JIRA**, and **TestRail** for defect tracking, test management, and reporting.
- Extensive understanding of Software Development Life Cycle (**SDLC)**, Software Testing Life Cycle (**STLC)**, **Agile**, and **Waterfall** methodologies, with active participation in sprint planning, retrospectives, and client interactions.
- Certified by the **International Software Testing Qualification Board (ISTQB).**

EDUCATIONAL DETAILS:

- Bachelor of Technology (B. TECH) in Computer Science Engineering from Kaushik College of engineering.

TECHNICAL SKILLS:

Automation Testing Tools	Selenium Web Driver, AccelQ, Playwright
Programming Languages	Core Java, JavaScript
Web Technologies	HTML
Databases	SQL
Operating Systems	Windows (All Flavors), UNIX
Other Skills	Compatibility Testing, Cross Browser Testing, Mobile Testing.

Work Experience

- I worked in People link Unified Communications Pvt. Ltd, Hyderabad from October 2015 to November 2018 as Test Engineer.
- I worked as Automation Test Engineer in Value Momentum from Nov 2018 to July 2019.
- I worked as Senior Software Engineer in Value Labs from Dec 2019 to Dec 2022.
- Working as Senior QA Engineer in Digile Technologies Pvt. Ltd. from Jan 2023 to till date.

Project -1

Name: Insta Cloud

Project summary:

InstaVC Cloud is a product portal for Peoplelink Unified Communications, which consists of Video Conferencing, Learning Management System (LMS), and Customer Relationship Management (CRM) on cloud. Complete product is managed by split it into individual modules which allow the organisation to create licenses for one or more products on the same portal. It will be completely a cloud module which reduces the sales workforce extensively.

Responsibilities:

- Prepared test plan, test scenarios from the Use cases.
- Clarification in requirement, finding requirement gaps.
- Designed test cases, test steps and executed test cases in TestRail.
- Involved in the peer reviews. Functional, Compatibility, Regression and Sprint Wise Test Case Authoring, Execute Test Cases.
- Automate the Current Sprint Test Cases and Maintain the Regression Test Cases and
- Browser compatible and OS compatible testing.
- Execute Functional, Compatibility and Regression Test Cases
- Send test execution report on a daily and weekly basis.
- Participate in Daily Scrum

Project -2

Name: GEICO

Project summary: GEICO is second largest auto insurer in USA. INDY is intended to provide quality assurance support for all the projects under the scope of Indy COE e.g., Commercial modernisation, Mobile services rewrite, and other projects. To this effect the scope and out of scope sections are program oriented and are applicable to all the projects that are in scope.

Responsibilities:

- Analysed the business requirements and converted into test scenarios.
- Involved in Sprint planning /retrospective meeting.
- Involved in test design and development, test data preparation, test environment setup, and test execution activities
- Attending daily status and standup calls with the client and other vendors as well.
- Involved in Test Plan preparation and execution using Automation framework.
- Manually executed the test cases in Azure DevOps.
- Identifying the Defects, Reporting the Defects and retesting the defect to ensure defect fix.
- Writing and execute the test scripts in selenium
- Used to Collect the Work Report from the Team send Execution Status report to DM.

Project -3

Name: Benefit Focus

Project summary: Benefit Focus is a Health-insurance application, where it provides more benefits to customers. E- enrolment application deals with enrolment of customers into offers and plans.

Responsibilities:

- Implemented automation using Selenium WebDriver, JAVA, Selenium Grid, and Maven.

- Identifying the automation scenarios for the application.
- Develop the automation scripts.
- Executing the developed features and debugging if any issues.
- Giving the demo of the developed scenarios.
- Running smoke after every deployment.
- Making sure all the required automation scenarios are created properly.
- Managing the automation team resources and helping them if there are any issues.
- Experience in Automation testing for web application and web-API using Selenium, TestNG, Java.
- Involved in Defect raising and defect tracking, Regression testing, Smoke testing.
- Participated in ON-Call Activities.
- Represents QA team.

Project -4

Client Name: Equinix

Project: SFDC Salesforce & Siebel CRM Automation

Tools Used: Siebel, Salesforce, CPQ, Equinix Customer Portal, AccelQ Automation tool, Jira.

Project summary: Equinix is a global leader in digital infrastructure and data centres. The project focused on automating Salesforce (SFDC) and Siebel CRM integration workflows, covering customer onboarding, opportunity tracking, quote generation, and order lifecycle management. The automation ensured seamless synchronization between Salesforce and Siebel, eliminated manual delays, and reduced regression testing efforts.

Responsibilities:

- Integrated ACCELQ with CI/CD pipelines and Salesforce APIs for end-to-end functional and regression testing.
- Designed reusable NLP-driven test assets to optimize regression and reduce maintenance efforts.
- Delivered automation reports and dashboards ensure faster, defect-free Salesforce CPQ releases.
- Collaborated with business and dev teams to validate pricing rules, discount approvals, guided selling, and contracts.
- Automated Salesforce CPQ Quote-to-Cash processes (product configuration, pricing, quote approvals, order, billing) using ACCELQ AI-powered automation.
