Srujan Kumar Peram

+91 7205772307 | peramsrujan@gmail.com

Professional Summary

Data Scientist with 6+ years of experience in fintech and supply chain, specializing in machine learning, time-series forecasting, feature engineering, and MLOps. Skilled in designing data pipelines (BigQuery, S3, Snowflake, APIs), building scalable ML models, and deploying them into production with Airflow, Docker, and AWS EC2. Proven track record of driving measurable business impact, including +20% loan collections and 30–40% supply chain waste reduction through predictive modeling and automation.

Technical Skills

- **Programming:** Python, SQL, R, C
- **ML / Stats:** Regression, Random Forest, XGBoost, ARIMA, Clustering
- **Tools:** Airflow, Docker, Snowflake, Tableau, Metabase
- **Platforms:** AWS EC2, Git, Jenkins, Jira, Confluence

Professional Experience

Senior Data Scientist II **Nov 2021 – Aug 2025**

Rappi (acquired Fountain9 Pvt. Ltd. - YC W21), Mumbai

- Designed and deployed scalable ML time-series forecasting models (Gradient Boosting, APIs, Docker) into production pipelines, reducing out-of-stock losses by **30%** and inventory waste by **40%**.
- Built automated data pipelines (Google BigQuery, S3, Snowflake, APIs), including feature engineering, preprocessing, and monitoring workflows, ensuring high-quality input data for ML models.
- Integrated real-time promotion and event signals into forecasts, boosting adaptability to market shifts and improving predictive accuracy.
- Automated reporting and replenishment planning systems with Airflow, cutting runtime by **30%** while tracking KPIs (WMAPE, bias, precision).
- Implemented continuous model monitoring and collaborated with product and customer success teams to ensure adoption and improve performance over time.

Data Analyst **Jun 2019 – Oct 2021**

Kinara Capital, Bangalore

- Delivered business insights to Board, Investors, and CXOs by building dashboards in Metabase, leveraging statistical tests and visualizations for decision-making.
- Built a payment-default prediction model (statistical + ML techniques) with **92%** accuracy, automated via APIs and Airflow, improving loan collections by **20%**.
- Developed and optimized APIs for the loan origination system, implementing business logic, unit tests, and continuous monitoring to improve loan processing.
- Designed a risk-flagging system using credit bureau data (Highmark) to identify high-risk customers, enabling targeted collections and improving efficiency through dashboards.

Education

B.Tech in Computer Science and Engineering, 2013 – 2017
Indian Institute of Technology **(IIT)**, Bhubaneswar

Certifications

Post Graduate Program in Data Science and Engineering (Great Learning) 2018 – 2019
